The other instruction refused was properly refused, because it ignored the possibility of negligence, or of wilfulness and design, at the time of the killing. After refusing it, the court gave an instruction in the same language, with the addition of an exception holding the company liable, notwithstanding it was without fault in respect to the fence, provided the killing was done negligently or willfully. This exception is contained in the statute itself, and the ruling upon the point was entirely correct.

The judgment is affirmed, with costs.

☞ The Marine and Collinsville Railroad Company has secured a charter to build a railroad from Marine to Collinsville, Illinois, which will be a continuation of the Collinsville and Venice Railroad, the entire length being about twenty six miles. The corporators are Judge H. C. Gerke, Henry A. Jandt, John Neudecker, and Henry R. Elbring, of Marine, and James R. Lawrence, of Collinsville. The capital stock of the company is $400,000, divided into shares of $100 each.

☞ The stockholders of the Middleboro and Taunton Railroad have voted, 1,025 to 7, to sell their franchise, railroad, equipment and shares to the Old Colony and Newport Railroad Co. for $175,000, cash; the transaction to be dated from March 1st, 1873. This is estimated to yield to the stockholders at least $110 per share, after the payment of all liabilities.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending March 8th are: freight, $32,479 91; passengers, $26,116 49—total, $58,596 40.

☞ The Delaware and Hudson Canal Company took control of the Montreal and Plattsburg and Whitehall and Plattsburg Railroads, on the 11th inst.

☞ Jno. H. Graham, of Richmond, P. Q., has been appointed Managing Director of the Missisquoi and Black River Valley Railroad.

Long Looked For Come at Last!

THE UNIVERSAL MICROSCOPE—The best Low Priced Microscope ever made, exceedingly useful for examining flowers, insects and Minute Objects, Detecting Counterfeit Money, and Disclosing the Wonders of the Microscopic World. It is adapted to the use of Physicians, Teachers, Students and the Family Circle. Requires no Focal adjustment, and can therefore be readily used by any person. Other Microscopes of no greater power cost $3 each and upwards, and are so difficult to understand that none but Scientific men can use them, the Universal always gives satisfaction. One single Microscope will be sent carefully packed, by mail, on receipt of $1. Agents wanted everywhere. Address

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,

MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York, Saturday, March 29, 1873.

Boston, Hartford and Erie Railroad.

Wm. T. Hart, George T. Olyphant, and Charles P. Clark, the trustees under what is known as the Berdell mortgage on the Boston, Hartford and Erie Railway Company, have not been slow to take action on the decision in their favor in the United States Court in Boston. Their mortgage, which is for $20,000,000, provides that on failure to pay interest they may at once foreclose the mortgage, subject, however, to a right in the original company to redeem within eighteen months. Sept. 13, 1871, they took possession, under foreclosure, of the road, subject, of course, to the eighteen months' right of redemption. The recent litigation has been to prevent the completion of the foreclosure, in view of certain provisions of the Bankrupt act. That having been decided in favor of the bondholders, the trustees above named now call for a meeting of all those holding the bonds at Horticultural Hall, Tremont street, Boston, the 17th proximo, to hold an election, to be presided over by the trustees under the mortgage, or those present, for a board of directors, of the same number as now authorized for the railroad, to organized themselves into a corporation with the same privileges as the present railroad.

At this meeting a new corporate name is to be selected; the capital stock is to be the amount of the Berdell bonds outstanding, and each bondholder will be entitled to ten one hundred dollar shares of the new stock for each thousand dollars of bonds when surrendered, and is to vote according to his bonds.

INVESTMENT BONDS.

THE NORTHERN PACIFIC 7-30 FIRST MORTGAGE GOLD BONDS, which we recommend as a profitable and well-secured investment, bear 7 3-10 per cent. gold interest, and have the following elements of security, viz:

1. They are the obligation of a strong corporation.

2. They are a First Mortgage on the Road, its Equipments, Rights and Franchises.

3. They are a first lien on its Net Earnings.

4. There is pledged, in addition, for the payment of principal and interest, a Land Grant of 12,800 acres per mile through the States, and 25,600 acres per mile through the Territories traversed. The Company is already entitled to nearly Ten Million acres of its Grant, and its Land Sales thus far have realized $5 66 per acre.

With nearly 500 miles of the road completed and in operation, the earnings for 1873 will be large.

All marketable stocks and bonds are received in exchange for Northern Pacifics on most favorable terms.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY.

Vermont Central Railroad.

At St. Albans, Vt., on the 21st inst., in the suit of the Vermont and Canada Railroad Company against the Trustees of the Vermont Central Railroad for rent, Chancellor Boyce, in delivering his opinion, said that the court had labored under no embarrassment as to the disposition of this case. This petition is for an order upon the receivers and managers for the payment of the rent. The court could make no such order until they were put in possession of the facts, and the receivers had settled their accounts. It appeared that no accounts have been settled since 1866, and there was no excuse for the neglect of this duty, on the part of the receivers; we think it was a plain duty on the part of the receivers to make a settlement of their accounts annually, and we shall make such an order that the receivers make such a settlement in the Court of Chancery. The court would make no order upon the receivers to pay this rent at the present time.

In reference to the other petitions, praying for the removal of receivers, if they were allowed to lie in this court it would embarrass the managers in their business. The trustees could be removed upon a motion if they should be found unworthy. It would be no particular benefit to the petitioners to allow the petitions to remain, and we decide either to dismiss them without prejudice or permit the parties to withdraw them.

☞ At a meeting of the stockholders of the Middleburgh and Schoharie Railroad Company, held in Middleburgh on the 24th inst., the following persons were elected directors for the ensuing year; D. D. Dodge, P. S. Danforth, L. Sanford, Wm. H. Engle, John A. Goewey, David Becker, Jacob, Neville, D. Beekman, E. Cook, J. M. Scribner, G. N. Frisbie, A. Haines and S. J. Freemyre; and at a subsequent meeting of the directors, the following officers were elected: D. D. Dodge, President; L. Sanford, Vice President; P. S. Danforth, Treasurer; J. Neville, Secretary.

☞ The time for the completion of the Harlem River and Port Chester Railroad, and for said company to comply with the conditions of its act of incorporation, and the amendments thereto, has been extended to January 1, 1874.

Pennsylvania Railroad Company.

Twenty-Sixth Annual Report.

Office of the Pennsylvania Railroad Co.,
Philadelphia, March 10, 1873.

To the Stockholders of the Pennsylvania Railroad Company:

Your Directors have much pleasure in submitting to you the following very satisfactory statements of the business of your Railways and Canals for the past year.

The earnings of your Railway and Branches between Philadelphia and Pittsburg were:

From passengers		$4,022,012 80
From emigrant passengers		240,005 08
From mails		154,914 78
From express matter		449,627 35
From general freights		16,856,891 41
From miscellanous sources		289,073 85
		$22,012,525 27
EXPENSES.		
For conducting transportation	$4,964,932 75	
For motive power	3,826,946 40	
For maintenance of cars	1,305,899 83	
For maintenance of road	3,337,724 69	
For general expenses	329,169 42	
		13,764,673 09
Leaving net earnings in 1872		$8,247,852 18
The total earnings of these works in 1871 were		$18,719,836 85
And for 1872		22,012,525 27
Showing an increase in 1872 of		$3,292,688 42

Of the above earnings, there were received from the 358 miles of Main Line:

In 1872	$20,010,818 80
In 1871	17,338,824 28
Increase from the Main Line	$2,671,994 52

And from the Branch Lines:

In 1872—426 miles in length	$2,001,706 47
In 1871—375 miles in length	1,381,012 57
Increase	$620,693 90
The earnings of the Branch Lines operated by your company in 1872, as already stated, were	$2,001,706 47
The expenses of operating them, including rents of leased branches, were	1,994,121 84
Showing a net direct profit in operating these lines, of	$7,584 63

The sources of revenue in 1872 compared with those of 1871, show an increase in every item as follows:

First-class passengers	$302,748 44
Emigrant passengers	83,612 96
General freights	2,804,586 90
Mails	7,021 66
Express matter	87,277 45
Miscellaneous	7,441 01
Total	$3,292,688 42

The whole number of passengers carried in 1871 was 4,699,985, and in 1872, 5 250,393, an increase of 550,408, or nearly 11 71-100 per cent.

The average distance traveled by each passenger was 38 11-100 miles, being 58-100 more than in 1871.

The number of tons of freight moved (including 614,757 tons of fuel and other materials for the company's use) was 8,459,535 tons, embracing 3,669,071 tons of coal. It was last year 7,100,294 tons, showing an increase of 1,359,241 tons, or over 19 3-10 per cent.

The average charge per net ton per mile upon freights during the year was 1 4168-10000 cents, against 1 3889 10000 cents last year, and per passenger 2 45-100 cents per mile against 2 53-100 last year, or an average increase in the rate of freight charges in 1872 above those of 1871, of 0 0276-10000, or a little over a quarter of a mill per ton per mile; and in passenger charges a decrease of 8-10 of a mill per passenger per mile.

The average cost of moving freight was 0 886-1000 cents per ton per mile, and for passengers 1 837-1000 cents per passenger per mile.

The actual cost of operating your railway, including branch lines in 1872, was 62 53-100 per cent of its receipts; excluding branch lines, it was 58 92-100 per cent.

The earnings of the Philadelphia and Erie Railroad in 1872, were:

From passengers		$647,274 09
From freights		3,177,548 92
From express matter		44,917 87
From mails		27,573 20
From miscellaneous sources		83,438 79
Total (nearly $13,822 per mile of road)		$3,980,752 87
The operating expenses during the same period were:		
For conducting transportation	$841,298 21	
For motive power	915,755 45	
For maintenance of cars	338,019 18	
For maintenance of way	1,192,943 07	
		3,288,015 91
Showing a balance to the credit of Philadelphia and Erie Railroad of		$692,736 96

The number of tons of freight moved upon this line during the year was 2,028,568 tons, against 1,828,491 in 1871, 1,614,287 in 1870, and 1,302,041 in 1869, showing a steady annual increase of traffic.

The average charge made per mile on freights was 1 190-1000 cents per ton per mile, and the actual cost of its movement 0 941-1000 of a cent per ton per mile, leaving a margin of profit of only one quarter of a cent per ton per mile.

The increased tonnage in 1872 over 1871 was 200,077 tons, and the increase in revenue from freights was $377,190 61-100, and from passengers, $61,298 53-100. The total increase of revenues for the year being $438,889 14-100; but the expenses, chiefly owing to the destruction of the Linden Bridge by fire, and the unusually large amount of iron required to keep the track in good condition, has more than absorbed this increase.

The net earnings of the Philadelphia and Erie Railroad have disappointed the expectations of its friends and projectors; not in the extent of its tonnage since the modification of the lease, but in the rates of freight that it has been able to command for what it carried. This line being longer from the commercial centres of the East to all important points of the West than its competitors, and traversing a sparsely populated country, with gradients unfavorable for cheap transportation, the cost of conducting its passenger business has usually exceeded the income from this branch of revenue. This year it shows a loss of $37,933 73.

In working this railway it early became apparent that the continuance of the old lease, which exacted thirty per cent of the receipts without regard to the rates of freight that could be procured, must result in the adoption of charges by the Lessee that would render any participation in the lake trade at Erie, or through traffic from west of the mountains, impossible. For such business the New York and Erie Railroad Company, the chief competitor of this line, charged rates that yielded it little or no profit, and the Lessee consequently had no other resort but to meet this competition, or abandon the through traffic, and rely upon the local business of the line for its support, at rates of freight which would leave a sufficient margin for profit on its transportation, to meet the terms of the lease.

Before adopting the policy here indicated, which appeared to be opposed to the interest and expectations of the public, the question of a modification of the lease to meet the difficulty thus developed by the character of the traffic of the line, was brought before the shareholders of the Philadelphia and Erie Railroad Company, who with great unanimity confirmed the alterations proposed. Under the modified terms, the Lessee agreed to work the line at cost, giving to the shareholders whatever profit the enterprise might develop.

This change in the lease has permitted the Pennsylvania Railroad Company to develop the resources of the country traversed, meet the interest upon its bonded indebtedness, and preserve the property to the shareholders, that they may be able to reap from their investment whatever advantage the future has in store for them, from an increase in the population and wealth of the country traversed or that may become tributary to the line.

Before the lease was entered into, the shares of the Philadelphia and Erie Railroad Company had only a nominal value, being freely offered at five per cent of par. They are now marketable at over fifty per cent (an increase of a thousand per cent), clearly demonstrating that the lease has not had, as represented, a depressing influence upon the stock of the company.

The lease of this line was only offered to the Pennsylvania Railroad Company after it had been declined by the officers of the Philadelphia and Reading Railroad Company, and after all other means for raising the funds required to complete the work, that did not involve the sacrifice of the stock of the company, had failed.

The failure of this enterprise to become at once profitable, is due first, to its having been started with insufficient capital; second, that it was located without reference to the capabilities of the country, it was to traverse, to yield a sufficient traffic for its support. Instead of crossing the valuable coal deposits of the Allegheny Mountains, it passed north of them, and in doing so avoided also the still more important oil deposits of Northwestern Pennsylvania, the existence of which was then unknown, being influenced in the adoption of the present route by two insignificant local subscriptions; thirdly, by commencing and continuing the work of construction at both ends, when the means of the company were insufficient for the execution of any considerable portion of either end, a policy which has ruined many other extended enterprises, and by the temporary adoption of which by the Pennsylvania Railroad Company the early success of that enterprise was jeoparized; fourthly, from its financial sacrifices incurred to secure an early opening of its road, through which mainly its cost with a single track, has amounted to $75,744 per mile, while that of the Pennsylvania Railroad, with a double track throughout and a third track for a portion of the distance, traversing a vastly more rugged country, was but $71,992.

In strong contrast with this policy, it may be stated that all financial sacrifices made during the construction of the Pennsylvania Railroad, as well as the interest that had been paid to shareholders and others until the railway was finished to Pittsburg, were charged directly to the expense account, until returned from the net revenues of the railway, instead of, as in the Philadelphia and Erie and many other cases, having been charged to the cost of construction.

The only way, it is believed, by which the stock of the Philadelphia and Erie Railroad Company can be made more profitable is the employment of more capital to open up the resources of the country naturally tributary to it; this is now being done, and it is hoped will finally enable it to earn dividends to its shareholders.

The earnings of the United Railroads of New Jersey and the Philadelphia and Trenton Railroad, excluding those of the Belvidere Delaware Railroad and Flemington Branch, were, in 1872:

From passengers	$4,573,312 52
From freights	3,263 298 86
From express matter	236,554 95
From mails	48,485 00
From miscellanous sources	144,580 47
	$8,266,226 80

Expenses:		
For conducting transportation	$2,755,690 75	
For motive power	1,595,096 62	
For maintenance of cars	379,637 17	
For maintenance of road	1,224,007 03	
For general expenses	50,735 21	
		6,005,166 78
Leaving net earnings in 1872		$2,261,060 02

The earnings of the Belvidere Delaware Railroad, sixty-eight miles in length, and Flemington Branch of twelve miles, were in 1872:

From passengers	$154,479 83
From mails	4,319 26
From express matter	3,787 31
From general freights	499,499 33
From miscellaneous sources	2,357 45
	$664,393 18

Expenses:		
For conducting transportation	$125,906 60	
For motive power	146,434 90	
For maintenance of cars	44,840 09	
For maintenance of road	198,349 89	
		515,531 48
Showing a balance to credit of Belvidere Railroad for 1872 of		$148,861 70

The earnings of the Delaware and Raritan Canal in 1872 were:

From tolls	$938,832 06
From steam towing	567,053 99
From miscellaneous	18,719 19
	$1,524,605 24

Expenses:		
For maintena'e of canal	$278,930 52	
For canal operation, including drawbacks of $109,448 80	293,388 27	
For steam towing acc't.	443,718 70	
		1,016,037 49
Leaving net earnings in 1872		$508,567 75
After deducting drawbacks allowed to shippers in 1872, and also in 1871, the actual revenues from the Delaware and Raritan Canal, were in 1872		$1,415,156 44
And they were in 1871		1,280,736 84
Showing an increase of		$134,419 60

The earnings of the Philadelphia and Trenton and the United Railroads of New Jersey, Belvidere Delaware Railroad, and Flemington Branch, and the Delaware and Raritan Canal in 1872 were:

From United Railroads of New Jersey, &c	$8,266,226 80
From Belvidere Delaware Railroad and Flemington Branch	664,393 18
From Delaware and Raritan Canal	1,524,605 24
	$10,455,225 22

Expenses:		
For United Railroads of N. J	$6,005,166 78	
For Belvidere Delaware Railroad and Flemington Branch, including net earnings ($146,861 70)	664,393 18	
For canal	1,016,037 49	
		7,685,597 45
Total net earnings of railroad and canal in 1872		$2,769,627 77
The gross receipts from these works in 1871 were		$8,959,157 06
And those for 1872		9,962,461 96
An increase of		$1,003,304 90

The amount required to pay interest on bonds and dividends to the shareholders of the United New Jersey Railroads and Canal, under the lease is		$2,292,987 34
To which add the interest at seven per cent upon the average estimated amount of additional capital employed in conducting the business of the road, "$1,740,890 93," six months		60,931 14
Add interest on loss in operating road in 1871, "$930,238 23," one year, seven per cent		65,116 67
Total		$3,419,035 15
From this deduct the amount contributed to the sinking fund from the earnings of the railways in 1872	$112,920 00	
And the amount of debt of the United Companies paid off by the Pennsylvania Railroad Company in 1872	140,568 12	
Amount received from investments	171,629 92	
		425,118 04
Balance		$2,993,917 11
From which deduct net earnings of railways and canals		2,769,627 77
Leaving the deficit of 1872		$224,289 34
Add deficit that had accrued up to January 1, 1872		930,238 23
The total deficit up to January 1, 1873, was		$1,154,527 57

In considering this statement it will be recollected that no charge has been made against the business of the New Jersey Railroads for the use of the cars of the Pennsylvania Railroad Company engaged in the through traffic over those railroads, or for any part of the general expense account incured for the management of the whole of the works of your company, which should be distributed in due proportion among its own and leased lines.

On the completion of the extensive improvements commenced at and near Jersey City, and the construction of the additional tracks contemplated along the line, it is believed that the cost of moving and handling freights and passengers will be so materially reduced that we shall be able not only to meet the terms of the lease from the profits of the works, but to gradually extinguish the large deficit that has accumulated. Without the additional facilities already provided, the increase of the business of the past year could not have been disposed of at all, and the proper working of the line is still greatly embarrassed for want of the additional facilities which are now being provided.

As large, however, as this deficit now amounts to—if it is never returned from the profits of these works—its creation was fully justified by the absolute necessity there existed for the accommodation of the rapidly increasing traffic of our line from the West, destined to New York and the East, the small profits upon the transportation of which were not considered by the lessors of these railways and canals of sufficient importance to induce them to incur the heavy terminal expenditures required for its prompt and economical delivery.

The number of passengers carried over the United Railroads of New Jersey in 1872, was 7,580,795, and the average distance traveled by each passenger was 21 39-100 miles.

The number of tons of freight moved was 2,536,304 tons, including 55,732 tons of bituminous coal for shipment at South Amboy and 78,027 tons of material transported for the company's use.

The average charge per net ton per mile upon freights during the year was 2 55-100 cents, and per passenger 2 52-100 cents per mile.

The actual cost of operating the Philadelphia and Trenton and the United Railroads of New Jersey in 1872, was 72 64-100 per cent of its receipts, which high rate is mostly due to the want of facilities at the termini of the road for handling economically the large traffic of the line.

The number of tons of freight moved on the Belvidere Delaware Railroad and Flemington Branch, was 914 833 tons, of which 842,749 tons was anthracite coal.

The average charge per net ton per mile upon the freights carried over these lines in 1872, was 1 11-100 cents, and the cost of moving it was but 0 819-1000 cents per ton per mile, reflecting much credit upon the General Superintendent, F. W. Jackson, Esq., and the Superintendent in immediate charge, Mr. John A. Anderson, for the efficient and economical management of the line.

As the accounts of the business of these railways have not heretofore been entered in the form and detail with which those of the Pennsylvania Railroad Company have been kept, we have no reliable data for comparing the results of the business of 1872 with those of previous years.

The lease of the New Jersey improvements between Philadelphia and New York, includes, also, the Delaware and Raritan Canal, the water line between those cities. This work is under the charge of General I. J. Wister as General Superintendent, in place of John G. Stevens, Esq., elected General President of the several companies in New Jersey whose lines you have leased. This canal, though its coal tonnage fell off materially in 1872, has yielded, however, an increase in its net profits over the previous year of over $134,000.

With the lease of the New Jersey Railroads and Canals, this company also received property represented by shares in and bonds of branch railroads, street railroads, turnpikes, bridges and ferries over the Delaware and Hudson rivers, amounting at par to $5,714,444 25, valued at the time of their delivery at $4,065,225 25, and believed to be now worth about that sum. These securities yielded in 1872 a net revenue of $171,629 92, but they cannot be sold without injury to the general interest of this company. This leaves the means necessary to make the improvements so urgently demanded for the accommodation of the large and increasing business of these railways at Philadelphia, Jersey City and along the line, to be obtained from other sources. These improvements, consisting of additional tracks for passing trains, sidings at the termini, shops, engine houses, passenger stations, warehouses, wharves and stock yards, the construction of which could not longer be delayed, have been commenced and will be prosecuted with vigor. Their completion will require a heavy outlay which, if it had been incurred some years since, would at this time have added materially to the revenues of the company, and to a greater extent have diminished the expenses of managing its business.

The live stock traffic of the Pennsylvania Railroad Company destined to Jersey City, New York and points in the East, for want of facilities for its accommodation at Jersey City, has for many years been forced to leave the Pennsylvania Railroad at Harrisburg, 106 miles west of Philadelphia, and reach New York over the East Pennsylvania and New Jersey Central Railroads, thus losing the profit of its transportation for about 200 miles out of 450 miles between Pittsburg and New York.

The New Jersey Central Railroad Company, in consequence, it is supposed, of the crowded condition of its line, has recently demanded specific rates for the transportation of live stock over its railway instead of its share of the rates obtainable in competition with other routes as heretofore. To meet this movement and restore this traffic to its natural channel, this company is under the necessity of at once incurring a heavy expenditure which ought to have been made some years since by the New Jersey Companies.

The estimated expenditures for all these works during 1872, 1873 and 1874, including the rebuilding of the Trenton and Brunswick bridges with iron, has been estimated at $5,250,000. To meet

this sum, the Joint Railroad Company of New Jersey have delivered to us of their general mortgage bonds, $3,000,000, the interest upon which will have to be added to the annual payments to be made under the lease.

The revenues of all the lines operated by your company in 1872, between Pittsburg and Jersey City, and the amounts paid for their working expenses, interest on debts and dividends to shareholders, are as follows:

Receipts:		
From the Pennsylvania Railroad and Branches		$22,042,525 27
From the Philadelphia and Erie Railroad		3,980,752 87
From the United Railroads of New Jersey		8,266,226 80
From the Belvidere Delaware Railroad, including the Flemington Branch		664,393 18
From the Delaware and Raritan Canal		1,524,605 24
From the dividend on stock in the Pennsylvania Comp'y from April 1 to October 1, 1872		240,000 00
Total		$36,688,503 36
Expenses:		
Of the Pennsylvania Railroad and Branches	$13,764,673 09	
Of the Philadelphia and Erie Railroad including net earnings	3,980,752 87	
Of the United Railroads of N. Jersey	6,005,166 98	
Of Belvidere Delaware R.R. and the Flemington Br., including net earnings	664,393 18	
Of the Delaware and Raritan Canal	1,016,037 49	
		25,431,023 41
Net profits for the year upon all the lines operated by the Co		$11,257,479 95
From which deduct dividends declared in May and November (each 5 per cent), with the taxes paid thereon	$4,711,497 00	
Interest paid by this company after deducting interest and dividends received	434,145 95	
Paid for the lease of the Harrisburg and Lancaster Railroad	135,056 34	
Annual payment to the State of Pennsylvania on account of interest and principal due upon the purchase of the works betw'n Pittsburg and Phila	460,000 00	
Dividends & interest paid on account of the United Railr'ds and Canals of New Jersey in 1872 ($3,292,987 34), after deducting interest received from investments transferred with the lease ($171,629 92), showing an outlay in operating them under the lease in excess of their net receipts of $224,289 34	3,121,357 42	
		8,862,056 71
Balance		$2,395,423 24

This balance represents the net results of the operations of your several lines of railway in Pennsylvania and New Jersey for the year 1872, and they are thus stated that you may fully understand the value of your property, nothing having been entered to the expense account except the regular transportation charges against the business of the company. In former years the expense account was increased annually, by considerable payments that might have been charged to construction account, which, had they been divided as profits, would to that extent have increased the present indebtedness of the company.

The Pennsylvania Railroad Company has also a large amount of property that is at present practically unproductive, such as a controlling interest in 22,194 acres of Anthracite coal lands, stock in the Pennsylvania Canal, and in Railroads, the profits of which in a short time will add largely to its net revenues, but which at present are small, and have been devoted to their improvement.

It will be seen from the preceding statement, that the surplus net profits of the company in 1872, without including those from the sources alluded to, were sufficient to have paid a dividend at ten per cent, upon an additional capital stock of nearly $24,000,000, and there is every reason to believe from the daily indications of the future business of the company, that without further outlays the profits of 1873 would be equally satisfactory. But as it is the duty as well as the interest of the company to meet the legitimate demands of the public for increased transportation facilities, the means necessary for that object must be provided. The amount required in 1873 for additional tracks, equipment, shops, wharves, depots, &c., &c., to meet the demands from the increasing tonnage of the company and its existing obligations, is estimated at $22,000,000.

The increase of the tonnage of 1871 over 1870 was 22⅓; per cent and in 1872 over 1871 was 19.3 per cent upon this increased amount. This rate could have been further increased by the possession of additional rolling stock and better terminal facilities.

The amount of rolling stock, &c., added in 1872, though deemed ample to meet the wants of the public, proved inadequate to that object. A further increase of equipment involves also large extensions of third track, sidings, warehouses, and all other facilities that a railroad requires, the business of which is already crowding all of its departments. To raise the means desired to provide for this anticipated increase of traffic, your directors have concluded that inasmuch as the surplus profits of the year were largely in excess of the amount required to pay the usual dividend on its existing capital, the most acceptable mode of raising this sum would be by a distribution of an additional number of shares to the extent of 33⅓ per cent of their present holdings, ratably among all of the stockholders whose names may stand upon the books of the company on the first day of April next, one-half to be paid in between the 1st and 24th of May, and the remainder (50 per cent) to be called for on sixty days' notice, in instalments not exceeding 25 per cent at any one time.

The increase of the tonnage of the Pennsylvania Railroad was chiefly due to the local traffic of the line. This increase of traffic, not however in so great a ratio, will it is believed continue for some years to come.

To meet these annual requirements for additional funds, the directors have thought it best to adopt a revised financial plan, and with that view they have procured an act of the Legislature authorizing an increase of the capital stock of the company one hundred per cent, with the privilege of raising by bonds, to be secured by mortgage, an equal amount. A certified copy of said act is submitted to you with this report for your action.

An application for an act to increase the capital of the company and its mortgage indebtedness in 1869, elicited such strong objections, in consequence of its apparent magnitude, from those who could not appreciate the extent and rapidity with which the traffic of the company would increase, that it was thought expedient to cut down the amount asked for to $35,000,000, an amount which has already proved to be wholly inadequate to the requirements of the company. It has therefore been thought advisable to discontinue the sale of the present general mortgage bonds at the sum of $20,000,000, and provide by an additional general mortgage, an amount sufficient to meet the future necessities of the company. The basis of such a mortgage was increased last year by the issue, at par, of $11,932,000 capital stock, which it is now proposed to further increase by an issue of additional capital, amounting to about $18,000,000; making the basis for the issue of additional bonds under the proposed mortgage $71,000,000; the aggregate amount of the preceding mortgages and prior liens being but $34,911,300.

In addition to the value of the railroad and branches, real estate and equipment and franchises as a basis of security, it will be recollected that among the personal property which will add still more to the security of such a general mortgage are the assets of the company composed of the stock and bonds of other companies, and amounting at their present cash value to $50,396,000.

A communication was submitted at your last annual meeting, in opposition to the continuance of fast freight lines upon the Pennsylvania Railroad, and was referred by you to the incoming board for examination, with instructions to report their views thereon.

The expediency of establishing such lines, owned by individuals or transportation companies, was at the time of their introduction admitted by the directors to be involved in grave doubts, and their introduction upon your road was not entertained by your directors until every argument had been exhausted to induce the railroad companies of New York, contending for the same traffic between the East and the West, to discontinue their employment.

It was found impossible, while these Transportation Companies existed under contracts with the New York Railroad Companies which made it their direct interest to disregard them, to preserve uniform rates, and it was not until after years of remonstrance and the non-enforcement of agreements frequently enter into with the New York Railroad companies to abolish these lines, that this company entertained the propriety of meeting the difficulty by the employment of the same weapons of attack and defence. After much delay and earnest consideration, the subject was finally brought before your board for its determination, and referred by it to the road committee. After a full investigation of the subject, a report was drawn up by it, authorizing the establishment of a fast freight line over the Pennsylvania Railroad and its connections as the best means for meeting this competition.

This report was unanimously adopted by the directors, and a contract entered into with intelligent and active parties, who had spent nearly their whole lives in the business of transportation between the East and the West, upon the State Works of Pennsylvania; gentlemen who thoroughly understood the views and objects of the board, and who entered upon their duties under an act incorporating them as the "Union Railroad and Transportation Company," with ample means and a determination to accomplish the objects assigned to them. In different and less experienced hands the enterprise, under the terms of their contract with your company, would most probably have proved a failure.

When the Union line was established, this company controlled no railway west of Pittsburg or east of Philadelphia, and held but little over 350 miles of road between the eastern and western commercial centres, while the cars of this Transportation Company were expected to traverse many thousand miles of railways in the West; gather up all the traffic that they would secure, and bring it to the eastern markets over your

works, returning them by the same channel filled with the merchandise and manufactures of the East,

The western railways were found by the Union Transportation Company to be generally deficient in car equipment, and the companies owning them gladly welcomed the advent of an enterprise calculated to relieve their ever increasing wants, and eagerly entered into contracts with it for the use of their railroads by its cars, and under these contracts it was enabled to successfully fulfil the objects we had in view.

The Union Transportation Company was organized under great doubts as to its financial success, without solicitation from its proprietors, and against the principles which the board then recognized as those which should govern railway companies in the management of their affairs. But its establishment, under the circumstances that then existed, was considered necessary to the success of the Pennsylvania Railroad Company, and its results have fully justified its organization.

Since your company has acquired control of its extended western connections, east of the Mississippi, and removed the obstructions that interrupted a free flow of traffic over your railway from the trade centres of the West to those of the East, the mission of the Transportation Company has been fulfilled, and its continuance in the sphere it occupied is no longer important to your interest.

It was contemplated on the organization of the "Pennsylvania Company" to manage your western connections in the manner pointed out in previous reports, that it should fill the place occupied by the Union Transportation Company. It has, however, required time to get these extensive works into harmonious and efficient action, and to fully understand their traffic. The Pennsylvania Company is now ready to assume this duty, and arrangements have been made for the transfer of the property and franchises of the Transportation Company to it, which will be carried into effect as early as the transfer can be properly made. The actual value of the property consisting of cars, warehouses, wharves, offices, shops and sidings, to be thus transferred is estimated—without its good will—at over $3,000,000, and it has been purchased by the "Pennsylvania Company" for three millions of its Common Stock at par, thus interesting individuals of experience in the management of this great enterprise—a consideration of material importance and value.

The Union Line having fulfilled the objects that this company had in view at its establishment, in a manner satisfactory to its employers, it is gratifying to be able to state that it has been so efficiently managed that it has also proven a pecuniary success to its shareholders. Their profits have, however, been mainly derived from transportation over the extended system of railways west of Pittsburg and east of Philadelphia, under contracts of their own procurement, with the companies whose roads their own cars traversed. The high rates of transportation that prevailed during the rebellion yielded very profitable results to the line, as well as to your company—the through rates over the Pennsylvania Railroad in many cases having been twice those charged upon its local freights.

It will also be remembered in this connection that neither law nor public opinion would at the time have permitted the assumption of powers by your company that would have enabled it to establish a transportation line to meet successfully the object that your company had in view. When the Pennsylvania Railroad Company commenced business west of Harrisburg (its then eastern terminus) under the influence of the narrow policy which then governed the management of the State Works, it was enjoined from running its cars over the Philadelphia and Columbia Railroad, a work built by the Commonwealth especially to afford equal facilities to all that would use it. A more enlightened view of the subject prevailed, however, in the Supreme Court, and the injunction was dissolved,

In reviewing the facts which induced the confirmation of the contract entered into with the Union Line, your board is fully satisfied that the best interest of the company was promoted by the adoption of the report of the road committee referred to, and that the results of the operations of the Transportation Company have been highly advantageous to your company.

To draw a line that should regulate the interference of a corporation with private enterprises, even where directly authorized by its charter to do so, is a matter of extreme delicacy, and the power should be exercised with great caution, and a disposition to bear the ills that they bring upon the corporation and public—which are not without their compensating advantages—rather than deal harshly with established interests.

The board still believe that where cars have to traverse extended lines of other and different railroad, that it is best for the interest of the railway company, where such lines are necessary, that they should be owned by private corporations or individuals and run under proper special contracts with those controlling the railways to be used.

The extent of the Western connections and the rapid increase of the local and through tonnage of the Pennsylvania Railroad has not only pressed upon your company the necessity of increasing the facilities of its own line by the laying of additional tracks, without which the traffic of the past year could not have been accommodated, but it has also pointed out the necessity of an additional line across the mountains that separate the waters of the Mississippi Valley from those of the Atlantic; to be built especially for freight, and designed for cheap transportation at slow rates of speed.

The route adopted for this purpose has been pointed out in previous reports, and the line is now being constructed, with the assistance of this company, by the Allegheny Valley Railroad Company, connecting that company's road, at the mouth of Red Bank Creek, with the Philadelphia and Erie Railroad, at a point 120 miles west of its eastern terminus at Sunbury.

This line has no gradients against the traffic exceeding a rise of three-tenths in a hundred, or less than sixteen feet in a mile on straight lines—reduced proportionately upon curves. Its route abounds through its whole extent with cheap fuel, consisting of varieties of Bituminous Coal in unusually thick beds, embracing the best coking coals for iron smelting, blacksmith, gas coals, and cannel coal—the latter being the most accessible, of that variety, to the Eastern markets.

This "Low Grade Line" is in rapid progress of construction, and will be opened for use this year or early next spring. When completed, and its connections made with the West, it will be possible for freights to be carried at much cheaper rates than they can be conveyed by any of the proposed canals between the Mississippi and the East.

The branches of your railway have not, in the aggregate, yielded much, if any, direct profit to this company, but they have added materially to the prosperity of the State, and to the revenues of the Main Line. Where built by other companies, they have been leased to this company, to be operated by it at cost, that their proprietors might save the outlay that would otherwise be required for rolling stock and other equipment.

The railroad opened between Lewistown and Sunbury, on the Susquehanna river, the past year, has been thus operated. This line, though it traverses a good agricultural region, and said to contain much undeveloped iron ore, has not secured sufficient traffic to meet its running expenses, leaving the interest upon its bonds, which have been issued to the extent of $1,200,000, wholly unprovided for. The traffic of the line is, however, increasing, and may at a future period yield a profit equal to its expenses and the interest upon its indebtedness.

All the branch lines recently promoted by this company in Pennsylvania have had in view the development of the growing iron ore or coal interest of the State. The branch opened during the past year to the ore banks of Morrison's Cove, in Blair County, promises excellent results, while the line in progress of construction between Lewisburg on the Susquehanna, and Tyrone on the Pennsylvania Railroad traverses a country abounding in rich iron ore deposits, which have for many years supplied the charcoal furnaces of that region with ores that have produced some of the most valuable irons of the Juniata Valley. The ores of this region are by this branch made equally accessible to both anthracite and bituminous coal of the best quality for smelting; and, in view of these advantages, it opens up a most attractive locality for the manufacture of iron, the demand for which must annually increase with the increasing cost of its production in Great Britain, from whence the larger portion of the iron consumed in this and other countries is at present procured. The analyses of these ores also show that many of them are well adapted to the manufacture of Bessemer steel.

The facilities for the distribution of freights in Philadelphia were not enlarged, in 1872, to the extent desired. The City Councils promptly acted upon the suggestion contained in the last annual report of this company in relation to the construction of a railway along the Delaware front between Christian and Dock streets, but the "law's delay" has prevented, during the past year, the completion of the improvements desired. The property owners upon the Delaware front, though anxious for the construction of the work, have not given to it their active co-operation, and, in consequence, the improvement so much needed by the commercial interests of the city cannot be finished before the ensuing summer or autumn. In the meanwhile the existing facilities for the accommodation of freights on Market street are being seriously encroached upon.

The erection of additional elevators for grain traffic has also become important, though it is believed that these may be supplied by private enterprise.

The connection referred to in our last annual report between the Pennsylvania Railroad and the Pittsburg, Virginia and Charleston Railway, crossing the Monongahela river above the mouth of Turtle creek, has been commenced, and if practicable it will be completed this year. Its construction has become a necessity from the impossibility of passing freight trains from the Pittsburg, Cincinnati and St. Louis Railway through Grant's Hill Tunnel without great delay. The cost of this connection is estimated at $550,000. The Pittsburg, Virginia and Charleston Railway, which is to extend along the valley of the Monongahela to the State line of Virginia, is under contract as far as Monongahela City, and will be opened to that point (thirty miles) during the ensuing summer.

Arrangements have been entered into with the City of Pittsburg by which nearly all of the streets of that city will be passed over or under the Pennsylvania Railroad, which will involve an outlay by this company very little short of one million of dollars, an expenditure which it is hoped will be compensated for by the additional safety secured to the movement of trains and the avoidance of delays that occur at the present street crossings.

The Baltimore and Potomac Railroad Tunnel under the City of Baltimore, delayed by the unusual severity of the past winter, will be finished in May next, and will connect by one continuous line the whole of the Southern system of railways with those of the North; and the National Capital with the coal and lumber regions of Pennsylvania. This important work, under an enlightened management of its connecting lines, cannot fail to exercise a most important influence upon the trade and prosperity of the Southern Atlantic States, and its completion may be hailed as an object of national importance.

The Northern Central Railway company, a controlling interest in the stock of which is held by this company, in consequence of the low rates of freight charged, mainly upon its coal traffic in 1872, did not earn its dividend, the means having

been supplied from previous surplus profits. To enable it to do so in the future additional capital is required to purchase increased rolling stock and provide greater facilities for an economical distribution of freights at Baltimore, the cost of which now materially interferes with the profits of the company. The means required for this purpose, it has been suggested, can be most economically raised by a lease of the property of the company to the Pennsylvania Railroad Company. This is not desired by your board, and will only be entered into to promote your interest in the company as shareholders. The floating debt of the Northern Central Railway Company is already sufficiently large, and the means to provide for it will otherwise have to be met by a suspension of dividends until it has been materially reduced.

It has been stated, in previous reports, that your company had transferred to an organization known as the "Pennsylvania Company" all the leases it had taken of railways west of Pittsburg, including the Indianapolis and Vincennes, and Jeffersonville, Madison and Indianapolis Railways; and the control, through a majority of its shares, of the Pittsburg, Cincinnati and St. Louis Railway Company and its leased lines—the Pennsylvania Company to meet the conditions of these several leases, and to pay the losses sustained in working these lines, or either of them. The Cleveland, Mt. Vernon and Delaware Railroad and the bridge over the Ohio River at Cincinnati being at the time in an unfinished condition, were not included in this transfer; in both of which works this company holds a majority of their shares. The Cleveland, Mt. Vernon and Delaware Railroad will be finished this year, while the bridge over the Ohio has been in use for some months.

The capital of the "Pennsylvania Company" was placed at $12,000,000, $8,000,000 of which was to be issued to the Pennsylvania Railroad Company is preferred shares, which amount covers the cost of the property transferred, with interest to April 1, 1872. After that date, dividends were to be paid semi-annually out of the net earnings. The first dividend of six per cent per annum was paid on the 1st of October last, leaving a considerable surplus to the credit of income account. The preferred stock now held by this company will participate equally with the common stock in any dividends of income above six per cent. The rental and cost of operating all these lines, leading from Pittsburg to the Southwest, including the Columbus, Chicago and Indiana Central Railway, have exceeded their income, while those leading to the lakes at Chicago (via Fort Wayne) at Cleveland and at Erie have yielded a profit more than sufficient, after deducting the losses upon the Southwest Lines, to justify the payment of the dividend mentioned.

When the cars of the Union Railroad and Transportation Company have been transferred to the "Pennsylvania Company," the authorized capital of the latter ($12,000,00) will be filled up, and the profits of the company more than proportionally increased.

None of the steamships building for the Liverpool line of the American Steamship Company, in which this company holds a controlling interest, are ready for sea, but it is believed that the "Pennsylvania" the first launched, will be in readiness to sail in May next. The models of these vessels are all alike, and reflect much credit upon their designer, B. H. Bartol, Esq. They appear to be admirably adapted to the traffic of this port, and possess accommodations for passengers, both first class and emigrant, equal in comfort and elegance to any of the steamers that ply between Europe and America. The execution of the work by Messrs. Cramp & Sons, as far as it has progressed, has been faithfully done, and appears to be fully equal in character and substantiality to that of any of the European built steamers. The ships will have all the modern economic improvements, and will not cost on completion much, if any, more than they could now be built for in Great Britain.

E. C. Knight, Esq., one of the most energetic and enterprising merchants of this city, has been made President of the Steamship Company in place of the late Washington Butcher, Esq., deceased. Under his administration we have no doubt but that the line will be managed with credit to this port and profit to the stockholders.

Since your last annual meeting the board of directors have lost the services of three esteemed colleagues:

George Black, Resident Director in Pittsburg, whose decease occurred in August last. His practical business talents and devotion to the interests of the company were always of great service, and highly appreciated. To fill the vacancy caused by Mr. Black's death, Mr. John Scott, of Pittsburg, a gentleman long identified with the manufacturing and leading interests of that city, was duly elected by the board.

Washington Butcher, whose decease occurred early in the present year. Mr. Butcher became a member of the board in December, 1849, and always served the interests of this company with great fidelity and efficiency. As his successor, Samuel M. Felton has been chosen. His long experience and sound judgment in all departments of railway management, cannot but prove beneficial to your interests. Owing to failing health, Joseph B. Myers, a member of the board for the past ten years, has been compelled to tender his resignation as a director of your company. This vacancy has been filled by the election of A. J. Derbyshire, at a former time an efficient member of the board, and who has always evinced a deep interest in everything concerning the company's welfare.

Thomas T. Firth, the Treasurer of the company for many years past, was compelled on account of his impared health to tender his resignation to the board, and thereby be relieved from the active duties of that position. The board accepted the resignation, and assigned Mr. Firth to the duties of secretary and treasurer of the sinking funds of the company. The board also adopted unanimously resolutions setting forth their high appreciation of his services and of the fidelity and ability he has shown in the discharge of the arduous and responsible duties connected with the office which he has filled honorably and creditably for so long a period.

Edmund Smith, late Vice President, who has been connected with the service of the company since 1847, has been elected by the board to fill the responsible position of treasurer—the board having entire confidence in his integrity and ability to perform the duties of that office.

The increase of the business of the company, and the continued disability of some of its officers, has rendered a reorganization of the department for conducting the operations of your railways, important and desirable to increase their efficiency. With this view, A. J. Cassatt, the present manager of the lines between Pittsburg and Jersey City, has been made general manager of all of the railways of the company east of Pittsburg and Erie. C. H. Gardiner, General Superintendent of the Pennsylvania Railroad, assisted by Frank Thomson as Superintendent of motive power and machinery. W. A. Baldwin has been continued as General Superintendent of the Philadelphia and Erie Railroad; F. Walcott Jackson, General Superintendent of the Philadelphia and Trenton and the New Jersey Railroads.

All of these gentlemen have been connected for many years with the administration of the several lines committed to their charge, and have materially contributed by their zeal and attention to their duties to the success of the company.

By order of the Board,
J. EDGAR THOMSON, President.

☞ The Legislature of Pennsylvania has passed a bill incorporating the West Laurel Hill Bridge Co., with authority to erect a bridge "from a point in Lower Merion township, Montgomery county, near Pencoyd station, on the Philadelphia and Reading Railroad, to a point opposite, in the city of Philadelphia."

Commerce of New York.

The foreign imports at New York for the month of February, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$21,088,566	$20,711,242
Do. for warehousing	14,570,487	10,263,357
Free goods	2,424 389	7,751,965
Specie and bullion	177,701	133,953
Total entered at port	$38,206,143	$38,860,517
Withdrawn fr. wareh'use	11,784,891	11,061,672

The foreign imports at New York for two months from January 1, were:

	1872.	1873.
Entered for consumpt'n.	$38,974,078	$37,981,473
Do. for warehousing	29,475,089	21,219,576
Free goods	5,153,449	17,215,267
Specie and bullion.	283,023	247,892
Total entered at port	$73,885,629	$76,664,208
Withdrawn fr. wareh'se.	24,133,903	20,629,590

The foreign imports of New York for eight months of the fiscal year, were:

	1872.	1873.
Six months	$183,028,276	$199,326,050
January	35,679,496	39 803,691
February	38,206,143	38,860,517
Total for 8 mos	$256,913,915	$275,990,258

The duties received at New York for eight months from July 1, were:

	1872.	1873.
Six months	$74.078,181 75	$64,393,092 93
In Jan.	13 317,086 82	10,763,626 44
In Feb.	14,710,928 08	12,893,637 89
Eight months	$102 106,196 95	$88,050,357 26

The exports from New York to foreign ports in the month of February, were:

	1872.	1873.
Domestic produce	$16,746,878	$20,474,949
Foreign free goods	272,341	155,079
Do. dutiable	895,950	508,974
Specie and bullion	972,657	3,670,444
Total exports	$18,887,826	$24,809,446
Do. exclusive of specie.	17,915,169	21,139,002

The exports from New York to foreign ports for two months from January 1, were:

	1872.	1873.
Domestic produce	$34,926,366	$39,854,446
Foreign free goods	858,983	897,200
Do. dutiable	1,580,824	937,906
Specie and bullion	2,518,019	10,798,433
Total exports	$39,879,192	$51,987,985
Do. exclusive of specie.	86,866,178	41,189,552

The exports (exclusive of specie) from New York to foreign ports for eight months ending with February, were:

	1872.	1873.
Six months	$119,604,290	$130,400,814
January	18,951,004	20,050,550
February	17,915,169	21,139,002
Total produce	$156,470,463	$171,590,366
Add specie	24,823,943	45,642,576
Total exports	$181,294,406	$217,232,942

☞ The Clarke (Va.) *Courier* says that H. H. Crumish, contractor on the Shenandoah Valley Railroad, who had to suspend operations owing to the very severe winter through which we have just passed, is again at work, finishing up the ten miles of graduation for which he contracted. But little work remains to be done on the line from the Shenandoah river, near Front Royal to Shepherdstown, a distance of forty-one miles.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "Italics." State-aid Railroads are distinguished by a "$."

American Railroad Journal.

Saturday, March 29, 1873.

Stock Exchange and Money Market.

The Money market has been somewhat less stringent, especially toward the close, the offerings of funds, particularly on private account, having been rather more liberal, and rates on call inclining slightly in favor of borrowers, having been quoted on Wednesday of this week at from 7 per cent currency to the same figure in gold, with occasionally a fractional commission added to charge to the needier of the Stock Exchange operators. The banks have been gaining a little in their reserves, and have been enabled to make rather freer advances to responsible parties. The Government houses have been very promptly supplied, to the full extent of their requirements at the legal rate in currency. There has been a much readier sale noted for the better grades of commercial paper at from 7½@10 per cent per annum for the best names. The very latest call loan business indicated a more active Money movement, in view of the somewhat less favorable financial advices from London. The city banks, last week, lost nearly half a million of their legal tender reserve while adding over half a million to their specie average. Their deposits were further cut down nearly 1½ millions, and their loan and discount averages reduced about 2⅞ millions. The banks are once more above their obligatory reserve, the last statement showing that they had $217,225 more than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of ⅜ths of a million to its coin balance, while losing 2¼ millions of currency. Its currency reserves at the close of the week were $18,236,238; and its coin hoard, $38,720,222.

The city banks, in their latest return, show a falling off of $411,300 of legal tender notes, with an increase of $525,600 in their specie, and a reduction of $1,471,900 in their deposits, also a contraction of $2,829,800 in their loan and discount averages, and an addition of $3,200 to their item of circulation. The city bank exchanges, last week, averaged 109⅞ millions.

The clearances of the banks averaged through the week 109⅞ millions a day, and amounted in the aggregate, for the whole week, to $658,903,673 as against $781,569,065 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $2,225,192 and enlarged its coin reserve $381,315 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $17,472,300, against $19,436,600 same time last year. The city bank deposits are now $194,623,500 against $203,717,000, week ending March 22, 1872. The legal tender reserve amounts to $38,304,200, against $42,618,300 same time last year. The circulation now stands at $27,613,600 against $28,018,300 same time last year. The loans are now $275,198,800 against $277,761,500 at this date last year.

The coin reserve of the city banks is now about 17½ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is under 38⅜ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 194⅝ millions, against 47½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $4,578,950 of currency, and $1,489,852 of gold, the latter including $3,228,000 from customs; and disbursed $6,804,142 of currency and $4,108,537 of gold, the latter embracing $283,934 of coin interest.

Government revenues have been yielding moderately, since our last. The excises yielded within the week 1¾ millions, and thus far in the current fiscal year beginning with July 1, 1872, $83,956,429. The customs at the port of New York, for the week, were $3,231,640, and at the outports, about $1,100,000 more, in coin or coin certificates.

The Gold speculation has been quite buoyant, since our last. The tendency of the price has been upward. The speculative demand has been more confident, and the customs drain heavier then usual of late. The export movement, however, has been moderate. The range of the price during the week has been from 115@116¼ and the closing quotation on Wednesday was 116⅛ against 115½ on Wednesday of the preceding week. The specie outflow last week, was $781,774. The Gold Exchange Bank clearances have averaged about 46⅛ millions per day during the week.

The cash balances in the Treasury Department on Wednesday were as follows: Currency, $2,316,996 04; special deposit of currency for the redemption of banking certificates of deposit, $29,380,000; coin, $67,549,014 02. Coin certificates are outstanding for $24,480,000.

The customs demand for Gold last week, averaged $531 452 a day. The arrivals of specie from Europe, Havana and foreign other ports during the week were $30,145, and thus far in 1873 have been $627,834 against $535,210 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $100,596,285 against $116,024,794 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $60,744,087, against $62,109,020 during the same time in 1871-2.

The export drain of specie was $781,774 last week, against $675,626 same week preceding year. The shipments since July 1, 1872, have been $48,789,091 against $26,969,780 during the same portion of 1871.

Foreign Exchange has been quoted higher, and offered less freely, with a firm inquiry noted for prime bills. Bankers' sixty day bills on London closed at 108⅛@108⅜; sight bills on London, at 108⅞@109⅛. The week's exports of Domestic Produce have been to the currency value of $5,260,047.

There has been a much more active demand noted for Government securities since our last, mainly from investment buyers, and, in good part for shipment to Europe, at decidedly firmer prices, on quite moderate offerings. The 1867 Five Twenties have been the favorites with purchasers.

Government bought in on Wednesday $500,000 Five Twenties, at from 114 29@113 60 net out of an aggregate offering of $1,427,200.

U. S. sixes of 1881 closed on Wednesday of this week at 119⅞@120⅛ U. S. Five-Twenties of 1862, 117@117¼; U. S. Five-Twenties of 1864 at 117@117¼; U. S. Five-Twenties of 1865, 117¾@118; U. S. Five-Twenties of 1865 consolidated, 116⅜@116½; U. S. Five-Twenties of 1867, 118@118¼; U. S. Five-Twenties of 1868, 117½@117¾; U. S. Ten-forties at 112@112¼; U. S. Fives of 1881 (Funding Loan) 114¾@115⅛; Six per cent. currency Sixes from 114¾@115.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 12.	March 19.	March 26.
Consols	92⅝	92⅞	92¾
U. S. 5-20s, 1865	93⅝	93½	94⅛
" 1867	93¾	93½	93⅞
" 10-40s	89	89	89¼
New Fives of 1881	90⅜	90½	91¼
Erie	52⅝	52¼	51¾

State bonds have been in more general demand and stronger in price.

The Metal trade has been on a restricted scale, since our last. Copper has been quiet but firm; sales, 100,000 lbs. Lake at 34½c.@35c., and 100 tons English on private terms; quoted at 30¼c.@30½c. per lb. Iron has been held with confidence, but has been without notable activity; sales 100 tons Scotch Pig, in lots, including Glengarnock at $57 and Eglinton at $55; and 500 tons English Rails on private terms. We quote; Glengarnock Pig at $57; Eglinton do. at $55;

Gartsherrie at $60; Coltness at $65; No. 1 American Pig at $50; No. 2 do. at $45@$48; Wrought Scrap at $57 50@$60; English rail at $70@$71, gold. Official statistics make the total exports of Iron Rails from Great Britain in February 41,818 tons, including 21,093 tons to the United States; and of Pig-iron, to the United States, 10,079 tons. Pig lead held firmly at 6¾c., gold, for ordinary foreign, but inactive. Other kinds dull, at former prices. Regulus Antimony quoted at 14¾c., gold. Silesian Spelter is quiet at 7¾c.@8c. gold. Of Solder, 20 tons sold at 19½c.@20½c., closing at 21c., currency. Pig-tin quoted strong, with sales of 550 slabs Straits at 33½c.; English quoted at 33c., and Banca at 33½c.@33¾c., gold. Tin Plates in fair request, with sales reported of 1,000 boxes Charcoal at $12 50; 1,00 boxes Charcoal Terne, to arrive, at $11, and 1,500 boxes Coke Terne at $10, gold. Charcoal Plates quoted here at $12 25@$12 75; Charcoal Terne, $10 75@$11 50; Coke, $10 75@$11, and Coke Terne, $8 87½@10, gold, per box. Zinc inactive at former figures.

An improved inquiry prevails for the Railway Mortgages which have shown more firmness. Central Pacific Sixes have been in better demand closing firmly at from 103@103¼. Chesapeake and Ohio Sixes have been selling more freely at 87½ and interest. Western Pacific Sixes have been in fair request at 94¾@95. The Northern Pacific 7-30 Loan continue in good demand at par and interest.

Railway and Miscellaneous share property has been quite active and generally buoyant as to price, though there been frequent and rather wide fluctuations noted.

General business has been more active. Cotton, Breadstuffs and Provisions closed more firmly. The export call for Breadstuffs and Provisions has been more satisfactory. Middling upland cotton, closed on Wednesday at 19¼@20 cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,974,987 bales, against 2,396,055 bales same time in the preceding year; exports 1,813,029 bales against 1,494,586 bales in the previous year; stock at the ports at latest dates, 545,145 bales against 439,679 bales same date 1871.

Foreign goods have been more sought after, and prices have generally shown more firmness. Coffee advanced ¼@½ cts. per lb. The week's imports amounted to $10,997,728, including $8,010,312 of dry goods.

Ocean freights have been more active, since our last, especially in the line of charters, but rates have been quoted easier, influenced by the augmented supply of accommodation available, through the recent more numerous arrivals.

At the Live Stock Markets, Beeves have been in more request at from 9@14¼ cts. Veals in less demand at 7@11 cts.; Sheep at from 5@7¾ cts.; Swine at 5¾@6⅛ cts. per lb., all live weight. The week's receipts were 6,908 Beeves, 1,258 Veal Calves, 10,937 Sheep and Lambs, and 40,817 Swine.

At the Scranton Coal Sale, on Wednesday, 100,000 tons were placed at from $4 15@$5 17½, as against $3 85@$5 27½ in February.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 22@22¼; George's Creek Coal, 118@124.

Newburg and Midland Railroad.

A special meeting of the directors of this company was held in Newburg on the 20th inst., to consider what steps should be taken in view of the movements made by other roads to extend their lines and obtain the business to which the Newburg and Midland Railroad would be entitled by its charter. A letter was received from Mr. Homer Ramsdell, in which he urges a diversion of the subscriptions from the purposes originally intended, to that of building a road about ten miles long, connecting the Wallkill Valley Railroad with the "Short-cut," at Temple Hill. Mr. Ramsdell explained how the new road would build up the business of Newburg, and subserve the same purpose for which the subscriptions to the Newburg and Midland Road were originally intended.

It was then resolved that the subscribers to the stock of the Newburg and Midland Railroad be requested to meet in Newburg, the 10th of April, to consider the plan to be adopted for the construction of a railroad from Newburg to Walden.

☞ Messrs. Crowly, Dickinson & Co., contractors for building the Towsontown Narrow Gauge Railroad, are vigorously pushing forward the work of grading the same, and expect to have the track ready for the cars by the middle of July. The contractors are at present engaged grading at a point near Sumwalt's ice-house. The road is to begin from a point on North Avenue, near Oak street, and will run parallel with Charles street avenue, crossing a portion of the Shepperd Asylum property, and connecting with the proposed Towsontown and Lake Roland road, a short distance beyond the Shepperd Asylum property. The latter road is to be constructed during the coming summer.

☞ The cash receipts of the Philadelphia and Erie Railway for the first two months of the current year were $568,113, against $499,438 in same time last year, an increase of $68,673.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending March 15 are: freight, $44,876 36; passengers, $27,242 86—total, $72,118 72.

Boston, Hartford and Erie Railroad.

We learn from Boston that Judge Shepley, of the United States Circuit Court has refused to grant the injunction asked by the Erie Railway to restrain the trustees of the Boston, Hartford and Erie Railroad, under the Berdell mortgage, from foreclosing and forming a new corporation. Though assuming full jurisdiction under the Bankrupt act both in law and equity, he declined to interfere with the decrees of the State courts as to underlying mortgages, and would not interfere with the operation of the trust until the question of the status of general creditors had been established and power of sale given by the District Court acting concurrently. This decision insures the transfer of the property to the bondholders under the Berdell mortgage, and the speedy completion of the whole road by the new corporation to be formed by the bondholders.

☞ The Staunton (Va.) *Spectator* says that T. M. Almond, Esq., of Page county, one of the directors of the Washington, Cincinnati and St. Louis Narrow Gauge Railroad Company, is now on the line of that road securing deeds of release from damages from persons living along the line. He expresses the opinion that work will be commenced on the road this spring. From Harrisonburg to Point Pleasant, on the Ohio river, a distance of about 280 miles, this road will run nearly midway between the lines of the Chesapeake and Ohio and the Baltimore and Ohio roads, at about an average distance of fifty miles from each.

☞ The directors of the Pennsylvania Petroleum Railroad (recently leased to the Atlantic and Great Western Railroad Company) are: A. H. Steele, J. D. Barton, Thomas Warnock, R. E. O'Brien, J. H. Dynes, W. B. Shattuc and J. T. Warn. The officers are: James B. Hodgskin President, A. H. Steele, Vice-President. The general office of the company is to be removed to Meadville. Work on the road will be commenced at once, and will be speedily completed.

☞ The Chief Engineer of the New York Central and Hudson River Railroad has issued his advertisement for proposals for the graduation and masonry for two additional tracks upon the main line of the railroad of this company between Albany and Buffalo.

☞ Messrs. Grant, Alexander & Co. propose to the Macon, Monticello and Atlanta Railroad Company, to grade the road for $300,000, half in cash and half in stock. The grading would be from Covington to the connection with Macon and Augusta Railroad, 12 miles from Macon.

☞ The completion is announced of the Houston and Texas Central Railroad to Red River City, connecting with the Missouri, Kansas and Texas Road. Trains will now be run through from Galveston and Houston to St. Louis.

☞ The total quantity of coal raised by the Intercolonial Coal Mining Company in 1872 was 134,902 tons, against 55,798 tons in 1871.

☞ The Brooks locomotive works at Dunkirk, N. Y., employ 570 men, and the number will soon reach 600.

☞ A route for a new railroad from Stissing to Rhinebeck is being surveyed.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Mar. 26, 1873.

The SIX PER CENT GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, being secured by a First Mortgage on a completed Road—which is one of the great East and West Trunk Lines, commanding a large through business, and which, from the immense Mineral, Agricultural, and other valuable resources of the country it traverses, is assured of a very remunerative local traffic—are among the most substantial and satisfactory investment securities in the market; and, at the present price, 87½ and accrued interest, yield a liberal rate of interest on their cost.

They are in denominations of $100, $500, and $1,000, coupon and registered; interest payable May and November; principal and interest in gold coin in New York.

We also buy and sell at current market rates, the WESTERN PACIFIC SIX PER CENT GOLD BONDS originally negotiated by us, and now quoted at the Stock Exchange, and widely known as favorite securities in the principal money markets. Coupon bonds of $1,000; interest payable January and July; principal and interest payable in gold in New York. Price to-day is 94¾@95.

We buy and sell GOVERNMENT and CENTRAL PACIFIC BONDS, receive deposits, on which we allow interest, make collections, and do a general banking business.

FISK & HATCH.

Camden and Atlantic Railroad.

The annual report to the stockholders of the Camden and Atlantic Railroad states that, during the year 1872, the receipts of said road were as follows: For passengers, $288,029 22; freight, $112,454 17; express, $23,212 06; ferry, $36,771 75; May's Landing branch, $2,329 46; United States mail, $3,000; miscellaneous, $1,239 37; total, $467,036 03. The cost of operating the road was in the aggregate, $221,598 86. Receipts over cost of working road, $245,437 18. During the year there were carried over the road 78,516 through passengers, 271,569 way passengers, 67,090 excursionists, and 69,324 tons of freight. 811 tons of new rails have been laid, and 200 tons of old cut and relaid. Many essential repairs have been made, and the facilities for accommodating the public are reported upon favorably.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 15, at 326,235 tons, and for the coal year at 2,819,589 tons, against 2,859,478 tons to corresponding time last year, being a decrease of 39,889 tons. The bituminous tonnage for the week is 37,207 tons, and for the year 257,819 tons, giving a total of all kinds for the week of 368,442 tons, and for the year 3,117,408, being an increase as against production to same time last year of 17,202 tons.

☞ The Sandusky, Ashland and Tuscarawas Valley Railroad Company has been incorporated with a capital stock of $200,000, for the purpose of constructing a railroad from Sandusky, through Erie, Huron, Ashland, Holmes, Coshocton and Tuscarawas counties, Ohio, to New Comerstown. The corporators are G. B. Smith, James E. Chase, W. Stilwell, H. C. Breckenridge, D. C. Richmond, A. James Sterling, J. O. Jennings and R. D. Freer.

☞ Intelligence has been received from St. Petersburg that the Russian Government has ordered a land survey to be commenced simultaneously at several points in the early spring for the construction of a direct railway communication between European Russia and Siberia. A definite decision upon this project is expected to be given during the course of the year.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR DAMAGE TO PROPERTY CAUSED BY SPARKS FROM LOCOMOTIVE—NEGLIGENCE.

The case of Rolke *vs.* The Chicago and Northwestern Railway Company, (26 Wisc., 537), was an action for the destruction of the plaintiff's property by reason of running a locomotive by and through plaintiff's land, so negligently and carelessly managing the same that sparks from the smoke-stack and coals from the ash pan or fire-box escaped and set fire to the combustible matter along the track from whence it communicated to plaintiff's premises, and destroyed his property, &c. Verdict for the defendant company, and the plaintiff appealed.

The following is the opinion of the court delivered by—

COLE, J.—Among other instructions asked by the plaintiff, which the county court refused to give, was one in substance and to the effect that if the jury found from the evidence that the engine set a fire on the track of the roadway on the day named, adjoining the premises of the plaintiff, and that the servants of the defendants in charge of such engine and train knew such fire to be set and kindled, then the servants of the company were bound to use ordinary care and diligence to extinguish such fire; and if the servants of the defendant knew the fire was so set at about the time it was so set, and used no efforts whatever to extinguish such fire, but went away and left it burning, such conduct on the part of the servants of the company was evidence of negligence, and ought to be taken into consideration in determining the question whether the train was managed with care with regard to fire. We think this instruction should have been given. It appears that the train in question was a gravel train, engaged in the repair of the road-bed, and had about twenty-eight men on the train. And even if it had been prudent and necessary for the train itself to move off to the proper station as soon as it was unloaded, in order to avoid collision with other trains, what difficulty was there in leaving behind a sufficient number of men to put out the fire? It was a dry time in the summer, when a fire kindled upon the track of the road would very likely spread to the adjoining premises. Men of ordinary care would, under such circumstances, use proper diligence to prevent the fire from communicating to the property of others; and if according to the hypothesis upon which the instruction is framed, the employees of the company knew that after a fire had been kindled on the track by means of the locomotive, they were certainly bound to use ordinary care and diligence to extinguish it; and if they used no efforts whatever to extinguish it, but went away and left it burning, such conduct, we think, would amount to negligence.

These remarks are made with reference to the character and condition of the train in question. It was a gravel train, and there could be no difficulty, even if the train moved off, in leaving behind a portion of the men to look after the fire. In the case of an ordinary freight or passenger train, even if the employees knew the locomotive had kindled a fire upon the track, yet it might not be possible to stop the train and put it out or leave behind any one for that purpose. The safety of the train and passengers would be a matter of first importance, and negligence could not necessarily be imputed if the servants left the fire burning without using any efforts to extinguish it. But the instruction, when applied to the facts of this case, raises quite a different question, and that is, whether, when a fire has been set by a gravel train, which has a large number of men on the train who knew about the fire, they can all go away, leaving the fire to spread and destroy the property of others, without being guilty of negligence. It seems to us that such conduct on the part of the servants of company would almost deserve the warm language used by Juge Breese, in Bass, *vs.* C., B. & Q. R. R. Co., 28 Ill., 9-19, as being "unworthy of civilized and christian men." At all events, if the jury found from the evidence that the supposed facts were established, we have no doubt the company would be liable for the loss occasioned by the fire.

Without alluding to the other questions discussed, we reverse the judgment, and send the case back for a new trial, on account of the error in refusing to give the instruction above referred to.

Judgment reversed.

The Western Connections of the Chesapeake and Ohio Railroad.

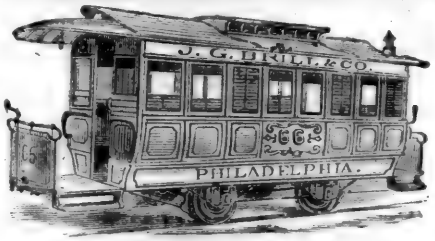
The Richmond *Dispatch* has the following from Huntington, W. Va., the Western terminus of the Chesapeake and Ohio Railroad: The Engineer Corps of the Southern Ohio Railroad completed the survey from Dayton, Ohio, to this point on Saturday last. The charter under which this survey was made contemplates an extension of the Chesapeake and Ohio Railroad from Huntington via Portsmouth, Hillsboro' and Wilmington to Dayton, a distance of one hundred and fifty-five miles, with an alternate coal and iron road via Symmes Creek Valley, Jackson and Piketon, to Hillsboro'. The line by way of Portsmouth, on the Ohio river (forty-six miles below Huntington), is reported to be of very light cost and favorable character throughout, and has the advantage of affording forty-six miles of common line for the Dayton and Cincinnati connections, should the line to the latter city be built down the Ohio Valley. The latter is probably an urgent necessity on the part of the Chesapeake and Ohio Company. No grade of over fifteen feet to the mile is encountered from Huntington to Cincinnati, a distance of one hundred and fifty-one miles, and the subscription of one and a quarter million dollars by Cincinnati, aided by the subscriptions in Clermont, Brown, Adams, Sciota, and Lawrence counties, will go very far toward defraying cost of construction. The coal trade over this line from the Kanawha fields to Cincinnati for home consumption and distribution must necessarily be immense, as well as the freight and passenger travel eastward. Already the present freight from Cincinnati eastward, over the Chesapeake and Ohio line, crippled in transit by the uncertain river navigation and the unfinished condition of the Chesapeake and Ohio road, foots up twenty cars per day. The northwest connection to Dayton is of still more value, traversing, as it does, the richest section of Southern Ohio, and necessarily affording an immense local traffic eastward. At Dayton a direct connection is made to Chicago via the Dayton and Union and the Columbus, Chicago and Indiana Central Railroad, giving a line of 270 miles length through an extremely productive and thickly settled region. At Chicago the northwest system of railroads is fairly tapped, including the uncompleted Northern Pacific. The line from Chicago, via Dayton, Hillsboro', and Portsmouth to Huntington, is forty-two miles shorter than a line passing through Cincinnati to Dayton and Chicago, and affords the latter city the shortest and lowest grade outlet possible to the eastern seaboard. It has been proposed to build an independent line from Day-

ton to Chicago, shortening the distance over the existing lines some twenty miles, and large subscriptions are being made upon this route as inducements to the Chesapeake and Ohio Company for its construction. The tonnage from the Northwest to the East over this extension must be enormous. The distance from Richmond to Chicago (by existing lines between Dayton and Chicago) will be eight hundred and thirty miles. From Richmond via Huntington and Portsmouth to Cincinnati, the route is five hundred and seventy-three miles. Upon the proposed Ohio extensions to Cincinnati and Dayton via Portsmouth a total of two hundred and fifty-nine miles of road, it is reported the local subscriptions foot up nearly three million dollars, which affords conclusive evidence of the great importance attached by the people of Ohio to the Chesapeake and Ohio Railroad as their eastern outlet, and renders the first cost of construction to that company but a slight burden comparatively. The Ohio lines necessitate a bridge across the Ohio River at Huntington, which is the only serious obstacle of delay anticipated in construction. It is understood that the line from Huntington to Cincinnati can be easily graded within nine months after commencement, and the northwestern route to Dayton be as readily completed within a year's time, both lines being of very light cost. With the completion of the Ohio roads, and of the Elizabethtown, Big Sandy and Lexington road to Lexington and Louisville, Ky., all of which two years' time should bring about, the traffic and travel over the Chesapeake and Ohio Railroad will necessarily be very great. It will probably require two tracks to transact the business of the road, even at so early a date, should these connections be perfected. The distance from Richmond via Huntington, Lexington and Louisville, to St. Louis, after the completion of the "Big Sandy" Railroad, will be about 935 miles only, and equal to some thirty-six hours of time. By way of the river line from Huntington to Cincinnati and via the Ohio and Mississippi Railroad the distance to St. Louis will be some twenty miles shorter from Richmond.

Pittsburg, Cincinnati and St. Louis Railway.

The annual meeting of the stockholders of this company was held in Steubenville, Ohio, on the 18th inst.

The first business transacted after receiving the annual report of the directors was to vote on the ratification of the lease of the Cincinnati and Muskingum Valley Railroad, as authorized by the stockholders at their meeting held December 30, 1871. The vote showed 135,841 shares of stock cast in favor of the ratification, and none against, so the lease was declared ratified.



The next thing in order was the election of thirteen directors for the ensuing year, when the following persons were unanimously chosen: Thos. A. Scott, George B. Roberts, Josiah Bacon, H. H. Houston, Thos. L. Jewett, Wm. Thaw, J. N. McCullough, Wm. Phillips, Robert Sherrard, Jr., D. S. Gray, Geo. W. Adams, Rollin C. Hurd and Alfred Gaither.

The members of the board present were immediately qualified, and vote by ballot being dispensed with, organized by the election of the following officers: President, Thos. A. Scott; Vice President, Wm. Thaw; Secretary, W. H. Barnes; Assistant Secretary, Justin G. Morris.

After filling some vacancies in the standing committees the board adjourned *sine die*.

☞ Surveys are proceeding for the construction of a line from the Atlantic to the Pacific, via the Brazilian province of Matto Grosso. A concession of this line has been granted to the Baron de Maua.

☞ At the annual meeting of the stockholders of the Pittsburg, Fort Wayne and Chicago Railway Company, held in Pittsburg on the 19th inst., the following gentlemen were elected directors for four years: William B. Ogden, of Chicago; Jesse L. Williams, of Fort Wayne; Louis H. Meyer, of New York. The President G. W. Cass, and secretary and treasurer, F. M. Hutchison, were continued.

Notice to Contractors.

NEW YORK CENTRAL AND HUDSON RIVER R. R.,
CHIEF ENGINEER'S OFFICE,
ALBANY, March 18th, 1873.

Proposals will be received until Thursday, April 10th, at 12 o'clock M., for the Grading and Masonry for two additional tracks upon the main line of the railroad of this Company between Albany and Buffalo.

The work will be divided into sections, and proposals may be submitted for the entire work upon one or more sections, or for the grading or masonry separately.

The Company reserve the right to reject any or all proposals, if deemed for its interest so to do.

Ample security for fulfillment of contract will be demanded.

Profiles, quantities and specifications can be seen on and after March 26th; those for the First Division (Albany to Syracuse) at the office of A. S. Wurtele, Division Engineer, Exchange Building, Albany; and for the Second Division (Syracuse to Buffalo) at the office of William A. Haven, Division Engineer, Rochester.

Proposals must be enclosed in sealed envelopes, endorsed "Proposals for New Tracks," and addressed to the undersigned, at Albany.

CHARLES H. FISHER,
Chief Engineer.

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH **Tanks, Tank Houses, Stationary Power,** AND **Attendance.**

CAN NOT **FREEZE** IN ANY **CLIMATE,** UNDER ANY **CIRCUMSTANCES.**

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

NEW YORK.

American & English Rails,

LOCOMOTIVES and CARS,

FISH PLATES, SPIKES, &c., &c.,

SOLE AGENT FOR

Atkins Bros' Pottsville Rolling Mills.

Special attention given to filling orders for Small *T and Street Rails*, of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5922.

EDWARD J. ETTING,

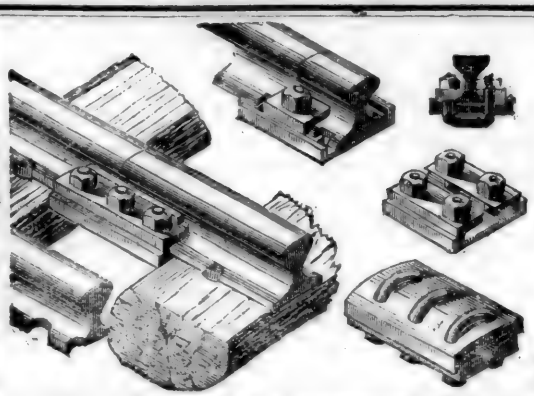
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

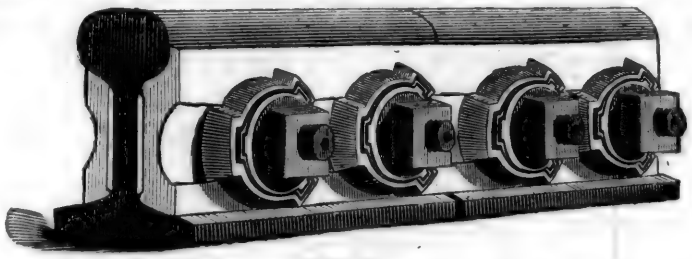
☞ Special attention paid to the Purchase and Sale of Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & CO.,
71 Broadway, New York

The "Cumming Nut-Lock."

This is the name of a very simple, and ingenious improvement in screw-bolts, which will be found very fully described in the advertisement of The Lock-Nut and Bolt Co., of N. Y., who own the Patents, and manufacture bolts with this improvement. The special feature of this device is, that it absolutely secures the nut to the bolt, at any desired point, and yet admits of its being readily adjusted, or removed, by simply applying a wrench. Every Railroad man knows that nuts are continually shaking loose on the tracks, frogs, switches, engines, cars, bridges, &c., and that great annoyance, danger and expense result therefrom; and many devices have been tried to remedy this trouble, none of which heretofore, have fully answered the purpose. Probably many of our Railroad friends are so disgusted with previous experiments, that they do not believe it possible to get a really effective "Lock-Nut." These bolts, however, have now been in use over four years on some of the principal Railroads in the Country, as well as on trip-hammers, mining and other machinery, &c., where their merits have been severely tested, and it is claimed that in no single instance have they ever failed to keep the nuts secure; and the extent to which they are now being used would seem to fully warrant a trial, which is all that the manufacturers ask. The value of such a device on car bolts must be very great, as it not only saves the expense of check-nuts, to a sufficient extent to pay for the whole additional cost, but also prevents the enormous loss of nuts and bolts that drop from the cars, and adds greatly to their durability, and safety. It is claimed that the use of these bolts will very considerably reduce the item of "Car Repairs," and the subject is of sufficient importance to be investigated.

INVESTMENT BONDS.

THE NORTHERN PACIFIC 7-30 FIRST MORTGAGE GOLD BONDS, which we recommend as a profitable and well-secured investment, bear 7 3-10 per cent. gold interest, and have the following elements of security, viz:

1. They are the obligation of a strong corporation.

2. They are a First Mortgage on the Road, its Equipments, Rights and Franchises.

3. They are a first lien on its Net Earnings.

4. There is pledged, in addition, for the payment of principal and interest, a Land Grant of 12,800 acres per mile through the States, and 25,600 acres per mile through the Territories traversed. The Company is already entitled to nearly Ten Million acres of its Grant, and its Land Sales thus far have realized $5 66 per acre.

With nearly 500 miles of the road completed and in operation, the earnings for 1873 will be large.

All marketable stocks and bonds are received in exchange for Northern Pacifics on most favorable terms.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending March 22 are: freight, $45,878 98; passengers, $30,618 51—total, $75,992 49.

Russia's Military Railway System.

A new railway and telegraph chart of the Russian empire has just been published. Russia is shown by this chart to possess railway and telegraph lines actually in operation of which the world outside had not the slightest notice or opinion. There is a complete system of strategical railways, radiating from the three principal lines uniting at St. Petersburg, Moscow, and Kieff, and extending even to the Asiatic frontier in no less than ten lines. All the military centers, even Nova Tcherbask, the headquarters of the Don Cossacks, are accessible by rail; and in a short time, if not at this moment, Russia can move large bodies of troops and concentrate them within a few days at any desired spot. In view of these facts the German journals urge their government to hasten forward the construction of railways on their own eastern frontier, which they will need for their own safety in case of war.

Add—		
Amount applicable to interest fund, as per land office report	$84,163 67	
Amount applicable to free land fund, as per land office report	91,102 90	
		175,266 57
Net amount, as shown in General Balance sheet		$2,278,373 40

The earnings on the line in Illinois were $6,613,433 07; the working expenses $4,024,728 79, and the State tax $442,856 54—leaving net earnings $2,145,847 74. The earnings of the leased lines in Iowa were $1,413,320 71; the working expenses $822,125 53, rent $563,301 52, and taxes $70,634 57—showing a deficit of $42,740 91 in working the Iowa lines, and reduces the net earnings of all lines operated by the company to $2,103,106 83, against $2,732,847 44 in 1871—a decrease of $629,740 61. The proportion of expenses and taxes to gross earnings is 66.78 per cent, against 61 per cent in 1871. The President in his report says:

The receipts from passenger transportation in Illinois, were $135,090 68 less than in 1871, and in Iowa, $84,801 54 less.

The receipts from freight transportation in Illinois, were $432,357 69 less than in 1871. In Iowa, $67,299 06 more than in 1871.

The operation expenses were $204,934 70 greater than in 1871, owing chiefly to the excess in train service required to move the additional tonnage, consisting of coal and other cheap freights; to cost of repairs at Chicago, incident to the fire of October, 1871, and to the protection of the road on the Lake Shore. But little reduction could be effected in the passenger train service, though the earnings were largely diminished.

The net earnings over the Chicago, Burlington and Quincy Railway are increased $189,164 50 as compared with those of 1871, a result caused by the greater distance the Iowa traffic passes over that line under the new contract.

18,831,950 bushels of grain were forwarded from stations in Illinois, and 6,722,520 bush. from stations in Iowa, upon our lines, of which 15,929,230 bushels were delivered at Chicago, and 3,867,850 bushels at Cairo. 82,388 000 feet of lumber were forwarded from Chicago, a falling off of 7,003,000 feet, as compared with the shipments of 1871. The coal traffic reaches 371,600 tons, an increase of 112,300 tons over 1871.

The total quantity of freight transported in 1872 was 2,039,321 tons, equal to 272,290,900 tons hauled one mile, yielding an average revenue of 2.15 cents per ton per mile. In 1871, 262,150,886 tons were hauled one mile, at the rate of 2.32 cents per ton per mile.

Elevator "A" has been rebuilt with a storage capacity of 1,000,000 bushels, giving now, 2,750,000 bushels total storage capacity at our Chicago terminus.

A contract entered into with the Mississippi Central, and New Orleans, Jackson and Great Northern Railways, which are operated under one management, ratified at the shareholders' meeting in May last, provides for the extension of the former railway to Cairo, and a mutual interchange of traffic with this road, on satisfactory terms. In consideration of the performance of the contract by those companies, this company is to invest annually one-eight of its earnings from traffic to and from those lines in the consolidated mortgage bonds of each railway, if they can be purchased at not exceeding par, in currency, the minimum amount of bonds of each road so to be purchased being fixed at $100,000 annually for ten years.

We have obtained from the Cairo city trustees, 1,500 feet of the Ohio levee, in Cairo, north of and adjoining the freight levee of this company, for the freight transfer station and car ferry for the Mississippi Central connection. Lands held by this company upon the Mississippi river in Cairo, and not needed for its use, were conveyed to the Cairo city trustees. They have released this company from all obligations and claims under old contracts. We paid for the lands on the Ohio Levee, and releases, the sum of $75,000, which was charged to account of right of way.

The Land Department sold, in 1872, 41,677.57 acres of the donated lands, for $336,918 68, making the aggregate sales to the close of 1872, 2,250,632.01 acres, for $23,622,553 17, and leaving unsold at that date, 344,367.99 acres.

In view of the large decrease of the earnings during the past year, it is deemed proper to refer to the causes which led to it, in order that our shareholders may see that the past was an exceptional year, and that they may reasonably expect hereafter, if not during the present year, that the results of the operation of the road will be more satisfactory and profitable.

When this railway was projected it was supposed that Illinois and the Northwestern States, as they should be settled, would, after supplying the demand from the Southern States, find the cheapest means of transportation for their surplus products by the lakes and canals to the seaboard, for the consumption of the Atlantic States, and shipment to European markets. On the completion of the railway this expectation was realized, and the competition which has grown up by the construction of railways crossing it at various points, and forming, in connection with the trunk railways, direct lines from all sections of Illinois to the Atlantic Ports, was not sufficient to seriously affect its grain traffic until the last year.

The disastrous fire at Chicago in October, 1871, had left us but one grain warehouse, which was filled early in January, restricting grain shipments to Chicago until the opening of navigation in April. Again, before June 1st we were forced to decline receiving grain for shipment to Chicago faster than it could be disposed of there. A large increase in the price of iron stimulated its production last year in this country, enormously, and created an unusual demand for the iron ores of Lake Superior for the furnaces of Ohio and Pennsylvania. This diverted a large number of vessels from the grain trade, causing a twofold effect upon our traffic. It raised the cost of shipping grain from Chicago to Buffalo to almost double the ordinary price, and enabled the competing lines leading East to divert grain from wider districts upon our line than they had before been able to reach. It caused a dearth of vessels, which, coupled with the lack of warehouse capacity, prevented our disposing freely of the grain offered for shipment to Chicago, and it largely increased the expenses. These causes which have produced the diminution of our net revenue in the past year may continue to affect our traffic the present year, but not to the same extent.

There has been built, and is now building, a very considerable increase in the shipping to navigate the lakes, which will be ready at the opening of navigation. The Dominion of Canada is preparing to increase the size of the locks on the Welland Canal, and thus add largely to the capacity of the trade from Chicago to Montreal, which will furnish a cheap line of transportation of grain for the European markets. The State of New York is improving the Erie Canal, and rendering its capacity greater. This will necessarily reduce the freights upon it and add to the advantages this route offers for shipments of grain via New York to Europe. The great trunk lines of railroad from Chicago to the Atlantic States are providing additional tracks and rolling stock, and new lines East from Chicago are in course of construction. All these improvements will furnish a large increase of the means of carrying from Chicago to the eastern markets the produce of the Northwest, and by furnishing the means to send produce forward without delay, greatly enlarge our capacity for bringing it over our line.

In addition to the expected restoration of our traffic in Eastern bound produce, we have before us the immediate prospects of a large accession to our business southward. For several years after this road was completed, it furnished the only direct railway route from the Northwest to the Southern States. Terminating on the Mississippi river, at the mouth of the Ohio, the line had the advantage of almost uninterrupted river navigation South, but was about twenty-two miles from the northern terminus of the nearest Southern railway. From time to time, other railways have been built, and have diverted portions of the Southern traffic which this line had developed. The arrangement made with the companies, whose lines of road lead from Cairo to New Orleans, heretofore referred to, will, before the close of this year, furnish us, by a short ferry across the Ohio at Cairo, a direct connection with the Southern railway system. This will enable the

line to regain a large traffic, in the distribution of Western products in the South, where the more profitable culture of cotton makes it for the interest of planters to purchase their supplies of food from the northwest. It will afford a more rapid and regular means of forwarding freights to New Orleans than by the river, and tend to relieve us from serious delays of shipments South via Cairo, which have heretofore frequently been caused by a lack of river craft at that point.

There are now five lines of Ocean steamers plying regularly between New Orleans and Europe, and it is found that corn can be carried in these vessels in bulk in perfect condition throughout the year, and reach Europe with less expense and in less time than by way of the lakes and canals to New York. During the last year, we delivered at Cairo nearly four millions bushels of grain, a portion of which was reshipped upon these Ocean Steamers at New Orleans.

There are expenditures, which by the dictates of just economy should be made, commencing during the present year. It is important to build additional docks at Chicago, in order to furnish convenient ground for transfer of lumber and other freights between vessels and the road. We need to relay considerable portions of the track with steel rails, which are, in the end, far more economical than those of iron. We require new facilities at Cairo for the increased business which the Southern connection will open upon us.

It is now ten years since the shareholders have been called upon for money. During this period dividends have regularly been paid, amounting, in the aggregate, to $22,582,407 07, and the debt has been reduced to $8,390,500. Of the debt outstanding $8,390,500 of the Construction Bonds, and $2,500,000 of the Redemption Bonds will become payable April 1st, 1875. You have set apart a Trust or Sinking Fund of $2,761,500, which, with its interest, will nearly provide for the Construction Bonds, leaving $2,500,000 Redemption Bonds to be provided for. The residue of the debt will then consist of $2,500,000 of Bonds payable in 1890. It will be for you to determine whether any, and, if any, what measures may be desirable to raise the means to meet all these requirements. The entire cost of the property has been $34,061,196 56. It is now represented by a share Capital of $25,500,000, debt, which, after deducting the existing Sinking Fund, leaves $5,629,000, making the aggregate $2,932,196 65 less than the actual cost of the whole.

Capital stock has been increased $180 by the conversion of canceled bond scrip; and $203,200 by sale of Treasury stock.

The working stock of supplies consists of wood coal, etc., on Chicago, Northern and Iowa Divisions, $42,844.42; materials and tools in road department, $318 334.14; materials at shops, $380,466.90; stationery, $4.316.22—total, at debit in General Balance Sheet, $745,961.68.

The lands remaining unsold are located as follows: on Main Line—south of Ohio and Mississippi Railroad, 229,532 57 acres; between Scandoval and Decatur, 55,568.39 acres; between Decatur and Dixon 8,146.36 acres; between Dixon and Dunleith, 9,840.89 acres. On the Chicago Branch—between Odin and Tolono, 34,474 28 acres; and between Tolono and Chicago, 1,805.50 acres—total, 344,367.99 acres.

The length of road is as follows: Main Line, Cairo to Dunleith, single track, 455.72 miles; Main Line Junction to Calumet, single track, 235.23 miles; Calumet to Chicago, double track, 14,55 miles; total in Illinois, 705.50 miles. Dubuque and Sioux City Railroad, 142.89 miles; Iowa Falls and Sioux City Railroad, 183.69 miles; Cedar Falls and Minnesota Railroad, 75.58 miles; total in Iowa, 402.16 miles. Track of Dunleith and Dubuque Bridge Company, 1.31 miles—total, 1,108.97 miles. Sidings between Cairo and Dunleith, 61.82 miles; between Main Line Junction and Chicago, 48.02 miles; on Dubuque and Sioux City Railroad, 12.75 miles; on Iowa Falls and Sioux City Railroad, 8.04 miles; on Cedar Falls and Minnesota Railroad, 3.06 miles—total, 133.69 miles. Total, main track and sidings, 1,242.66 miles.

During the year 4 first class engines have been purchased, making the number owned by the company at the close of the year, 197; of these 40 were employed on passenger trains, 112 on freight trains, 27 switching, etc., and 18 undergoing repairs.

The number of miles run by engines with passenger trains, was 1,470,195; with freight trains, 3,512,102; with construction trains, 87,799; switching, 818,130—total, 5,888,226, an increase, compared with the previous year, of 177,372. Cost of repairs $500,987 12. Cost of repairs per mile run, 8.50 cents., against 8.21 cents in 1871, 10.45 cents in 1870, 11.27 in 1869, and 12.72 in 1868. The total cost per mile, including wages, fuel, oil, waste, tallow and cleaning, has been 21.76 cents, against 21.50 cents in 1871, 25.15 cents in 1870, 25.49 cents in 1869, and 27.57 cents in 1868—the total cost being $1,283,379.98, against $1,228,028.89 in 1871, $1,355 465 95 in 1870, 1,381,349 88 in 1869, and $1,266,531 96 in 1868. The cost of oil, waste and tallow per mile run, has been 0.68 cents; of fuel, 6.05 cents. Av. miles run to a pint of oil, 12.80; to a ton of coal, 33.95.

The company have 79 passenger, 7 smokers, 1 officers', 1 pay, 45 baggage, mail and express, 17 sleeping, 2,694 grain, 21 grain and stock combined, 50 Blue Line, 350 stock, 271 flat, 47 fruit, 10 Continental Line, 1,138 coal, 4 powder, 4 derrick, 3 tool and 2 tank cars and 6 large and 10 small snow plows. During the year there have been built at the shops of the company and charged to construction account, 1 first-class sleeping car, 214 box, 30 stock, 21 stock and box combined, and one coal car. The cost of repairing passenger cars has been 2.42 cents, and of freight cars 0.60 cents per mile run.

The total number of passengers carried was 1,352 156. Number carried one mile 51,779,991. Av. number of miles traveled by each passenger, 38.29. Av. fare of each passenger, $1 80.12 Revenue received per mile of road, $1,588 35.

Tons of freight transported 2,039,321. Tons carried one mile, 272 290,900. Tons carried one mile north, 129,384,044; do. south, 142,906,856. Tons of local freight carried one mile, 229,570,778; do., through do. 42,720,122. Av. distance each ton was carried 133.52 miles. Av. revenue per ton per mile, 2.15 cents. Revenue per mile of road, $5,295.39.

The amount of expenditures in road department, has been: for operation, $1,553,252 44; and for construction $258,448 19. There were used in repairs of road, 325,709 cross ties, and 11,744.43 tons rails, of which 1,646 50 tons were steel. 5,584 bars were repaired.

President.—John Newell.

Directors.—His Excellency, John M. Palmer, Governor of Illinois, ex Officio. Lucien Tilton, George Bliss, W. K. Ackerman, until May, 1873; W. H. Gebhard, Wilson G. Hunt, Jonathan Sturges, until May, 1874; J. Pierpont Morgan, Louis A. Von Hoffmann, John Newell, until May, 1875; William Tracy, W. H. Osborn, until May, 1876.

General Superintendent.—A. Mitchell.

Treasurer.—W. K. Ackerman.

Land Commissioner.—Peter Daggy.

Chief Engineer.—L. H. Clarke.

Vermont and Canada Railroad.

Messrs. William Mixter, James R. Nichols, and Francis A. Brooks, executive committee of the directors of the Vermont and Canada Railroad Company, have issued the following statement to the stockholders of the present situation of the property:

To the Stockholders of the Vermont and Canada Railroad Company:

The subscribers, constituting the executive committee of the directors of the Vermont and Canada Railroad Company, consider it their duty to place before you a statement of the situation of your property at the present time.

In 1849 and 1850 your railroad, then incomplete, was leased for a long term of years to the Vermont Central Railroad Company, at a stipulated rate of 8 per cent upon such sum or amounts as should be expended in the construction thereof. This rent, payable December 1, 1854, was not paid. At that time the Vermont Central Railroad was in possession of the trustees of its first mortgage bondholders, and the Vermont and Cana ia Railroad Company brought the suit against the Vermont Central Company and these trustees, for the recovery of the rent. The suit was contested most vigorously, and was not finally decided till 1861, when a decision in favor of the validity of the lease, and declaring the rent to be a first lien or incumbrance upon the earnings of the Vermont Central Railroad Company, was rendered by the Supreme Court of Vermont; and to give effect to this decision, the trustees of the first mortgage bonds were made receivers of the court, and ordered to pay to the Vermont and Canada Railroad Company its rents then due, and thereafter becoming due, and the same made the first charge upon the earnings of said roads in the hands of said receivers. Soon after this decision, the rents in arrears were adjusted by being funded in new capital stock of this company, and ever since this funding of the accumulated rent until the first day of December last, your rents were punctually paid by the receivers, in pursuance of the aforesaid decision of the court, the earnings of said railroads always having been more than sufficient for that purpose; but in the years 1870 and 1871 the receivers appointed to operate your railroads, not being content with the two railroads placed in their hands for management in this suit of yours for the security of your rent, had undertaken to enlarge their operations and to procure leases to themselves as receivers of two other railroads, each of which alone was of nearly equal length with the Vermont Central line originally placed in their hands by the court in your suit, these two acquisitions being the Ogdensburg and Rutland Railroads. They also engaged in buying and operating a line of propellers known as the Northern Transportation Company, and in June 1872, they had incurred a floating debt of upwards of $2,800,000, over $1,500,000 of which grew out of the enterprises above mentioned, undertaken by them beyond the limits of the railroad property of which they were originally put in possession for your benefit by the court. This burden became so great that in September last they failed, and their paper went to protest. A majority of the board of directors elected at your last annual meeting in October, 1872, were of the opinion that the receivers should never have been permitted to engage in these outside enterprises, which had proved a source of so great indebtedness and embarrassment. Your December rent became due, and though the earnings of the road had been larger than ever before, and though the receivers were abundantly able out of such earnings to pay the rent if disposed so to do, yet they did not hesitate to pay out the same for other purposes, and to declare that no provision would be made for your rent until their immense floating debt had been first provided for. As this floating debt had not been incurred for your benefit, and could not operate to your advantage in any way, and as its payment, if made to take precedence of your rent, would necessarily operate a postponement of all your rent payments for years to come, we were unable to perceive the reason or justice of the determination of the receivers in this respect. We therefore applied by petition to the chancellor in Vermont having jurisdiction of your suit, for a summary order upon the receivers to make payment of the December rent, pursuant to the decision establishing your right to the same out of the first earnings of the railroad property. Finding this petition was resisted, and your rights as preferred creditors for the rent under the decision of the court above mentioned was disputed and denied by the very men put in possession of the railroad property in order to carry out such decision, and also finding (as we thought) that these receivers or some of them had been so administering their trust as to derive from the railroad property in their hands very large personal gains at the expense of the railroad property itself, and believing that neither you nor the other security holders would be able to enjoy the full benefit of their rights and property so long as these receivers or some of them were allowed to control the railroad property in their own private interest, and supposing that such facts, if shown to the court, would be sufficient to depose at once these receivers and release your railroad from their grasp, we presented to the chancellor a petition for their removal. At the same time charges of mismanagement, corrupt practices and abuses were presented in a petition of the bondholders to the chancellor as ground for the removal of these receivers from their office. All these petitions came on for hearing on the 18th instant at St. Albans. The points at issue were, whether these receivers should be allowed longer to administer the trust so reposed in them, for their own personal emolument and profit, and to appropriate the earnings of the road in total disregard of the orders of the court establishing the priority of your rent claim to the same; but as it was only during the last months' rent period that they had failed and refused to comply with the order of the court in providing for your rent, we had on your account no interest to inquire into the accounts of the receivers for any period prior to said last six months.

The court listened about three days to evidence offered in support of the charges in the petitions for removal of the receivers, tending to show very large gains individually and gross abuses of their trust; and while engaged in accumulating this proof of the official malversation of said receivers, or some of them, the hearing was, on objection taken by the receivers to the evidence, stopped by the court on the ground that such further evidence would not be received unless the same were presented before masters to be appointed by the court for that purpose, and also for the purpose of taking an account of all the doing of the receivers for the past six or seven years, and ever since the last account rendered by them in court, in 1867.

The petitioners for removal very reluctantly yielded to the suggestion of the court and consented to the appointment of masters for the taking of such testimony and stating of accounts for the period of six or seven years past, and supposed that they had thereby entitled themselves to be finally heard by the court on the question of removal of said receivers. Your rent petition was then argued on its merits and heard by the court with every expectation on our part that the court would decide all the questions presented by it. After a short recess, taken for the purpose of reaching a decision (as was stated), we were informed by the court in regard to the petitions for removal, that they would not be entertained at all, and must be either withdrawn or dismissed, and in regard to your petition for rent, that the court would order an account to be taken of all the doings of the receivers for the last six or seven years for the purpose of determining whether we were entitled to the rent of the last six months, and also for the purpose of determining whether the receivers and managers had been guilty of the malfeasances charged against them in the petitions for removal, and if so, of the amount of loss or injury thereby resulting to the trust property, so-called, and that after such accounting, the parties would be at liberty to renew their petitions for removal, if they saw fit. It is not too much to say that these conclusions of the court constrained us to believe that it was not in your power to derive any of the expected benefits from the proceedings instituted against the receivers and managers, and under this conviction we deem it advisable to withdraw the petition for rent also. We do not wish you to suppose that after withdrawing your petitions we have any less confidence in your rights to rent as preferred creditors from the earnings of the road. We are able to assure you, and do assure you, that the court, in arriving at its conclusions in this case, expressed no opinion whatever at variance with the views entertained by us of your legal rights as preferred creditors for rent, and did not deem it necessary to form any opinions whatever on the subject; that the decision, or rather failure of decision, turned upon a question of practice merely, and studiously avoided all consideration of the merits of the controversy. Our condition therefore, remains unchanged. Your railroad property is unimpaired, and if in your hands, it has all the value it ever had. How long you may be deprived of it, or of the enjoyment of its income, we are not able to say; but we see no reason to doubt that sooner or later you will be able to possess your own, with all back rent withheld by the receivers and managers.

What then, under these circumstances, do you say is to be done? We have endeavored to rid ourselves of an incubus upon our property by alleging charges against the managers. We were told by the court (by which the managers were appointed) that the court would not entertain any such charges, or hear proof thereof, against the managers until the case should have been first referred to a master to state the account for six years, because, among other reasons, such charges were calculated to impair the financial credit of these managers, and this, after they had six months before themselves impaired their financial credit by their own acts and gone to protest on their paper.

Having full confidence in the value of your property, as established by repeated judicial decisions, we trust that at no distant day your rights in the same will be fully recognized by others, and measures will soon be taken to accomplish this result.

WILLIAM MIXTER,
JAMES R. NICHOLS,
FRANCIS A. BROOKS,

Executive committee of directors Vermont and Canada Railroad Company.
Boston, March 26, 1873.

Erie Railway Company.

From the annual reports of this company made to the State Engineer and Surveyor for the years ending September 30, 1871 and 1872, the following comparative statement has been prepared:

	Miles.
Length of main line	459
Branches owned and leased	495
Second track and sidings	319¼
Second track or branches	28¼
Length of track at stations	157¼

This gives a total of 954 miles of road worked by the company, and 1,459¼ miles of track. For the preceding year the company reported 914 miles of road, 241¼ miles of second track, 234¼ miles of side tracks, and 64¼ miles of third rail.

The equipment for the past and preceding years was as follows:

	1870-'71.	1871-'72.
Locomotives	475	488
First class coaches	229	258
Second class and emigrant cars	54	44
Baggage, mail and express cars	71	76
Freight cars (equiv. 8-wheel)	1,866	10,638

The construction and equipment accounts were as follows;

	1870-'71.	1871-'72.
Permanent way and structures	$10,448,188 80	$10,751,184 67
Equipment	9,860,437 49	11,191,472 04
Ferries	549,385 15	568,130 83
N. Y. & E. R. R. Co., and E. Ry. Co. and franchises	86,026,350 78	86,296,899 72
Total	$106,904,362 22	$108,867,687 26

The property was represented by the following stock and debt:

	1870-'71.	1871-'72.
Capital stock	$86 536,910	$86,536,910
Funded debt	86,398,800	26,395,000
Floating debt,	none reported	2,517,301
Total	$112,035,710	$115,449,211

The earnings for the two years under review compare as follows:

	1870-'71.	1871-'72
From passengers	$3 972,064 70	$3,329 346 84
" freight	12,861,999 74	14,509,745 47
" other sources	333,940 72	532,795 49
Total	$17,168,005 16	$18,371,887 80

The expenses of 1871-'72 were as follows:

Transportation expenses	$12,594,504 64
Hudson River Ferry	285 796 43
Operating telegraph	132,918 25
Rents	1,246,890 53
Mileage of foreign cars	398,830 00
Insurance	71,797 90
Miscellaneous (including $139,451 80 for balance of interest)	167,751 37
Total	$14,898 489 72
Interest on mortgage debt	1,742,554 20
Dividends on preferred stock	597,583 70
Surplus	1,133,260 18
Total	$18,471,887 80

This shows the net earnings to have been $3,473,395 08.

The expenses for the two years compare as follows:

1870 '71	$15,272,601 61
1871 '72	14,898,489 72
Decrease (2½ per cent)	$374,111 89

And the net earnings are thus compared:

1870-'71	$1,895,403 55
1871-'71	3,473,395 08
Increase (83 per cent)	$1,577,295 08

The following will show the number of passengers and tons carried, the number carried one mile, and the number of miles run by trains:

	1870-'71.	1871-'72.
Miles run by passenger trains	3,068,701	3 314,453
Miles run by freight trains	7,511,065	9 004 051
Passenger mileage	148,242,790	156,143,351
Tonnage mileage	897,446,728	950,708,902
Passengers carried	3,509,462	3,598,988
Tons carried	4,844,208	5,564,274

The mileage of freight, and earnings therefrom for the past ten years is shown in the annexed statement:

	Tonnage Mileage.	Freight Earnings.
1862-'63	403,070,861	$8,132,234
1863-'64	422 018 644	9,855 008
1864-'65	388,577,212	10 725,264
1865-'66	478,485,772	11,611,028
1866-'67	549,888,422	11 204,689
1867-'68	595,699,225	10,789,976
1868-'69	817,829,190	12,583,794
1869-'70	898,862,718	11,983,547
1870-'71	897,446,728	12,862 000
1871-'72	950,708,902	14,509,745

Street Railroads of Massachusetts.

A tabular statement of the Street Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the fiscal year ended September 30, 1872.

American Railroad Journal.

Saturday, April 5, 1873.

Stock Exchange and Money Market.

The week has been a memorable one in Wall Street. Money has been extraordinarily close and active; Gold very excited and higher; foreign exchanges, wholly unsettled most of the time; and Stock values greatly disturbed, on an extensive business. The operators for an advance in Gold, and depression in fund and stock prices, had substantial control of the general market on Monday, and manifested their power very significantly. Gold was suddenly advanced, Money on call was made excessively dear, and on the Stock Exchange dealings, there was an evident fall in quotations on most of the speculative favorites. The call loan rates on that day went up to fully ¾ths of one per cent, for the use of Money for twenty-four hours. The exactions in this line on Tuesday, were almost, if not quite, as oppressive. The amount of Stocks which are being carried over at extravagrant rates (⅜@⅝ per cent a day,) would seem to be on the increase. It is probable that a large amount of certain Stocks, hypothecated, until recently under loans of London credits made in January and February, have come upon the Street for Money facilities, on the chances and at heavy cost, of being accommodated from day to day. The London credits have undoubtedly been liquidated to a large amount, and renewals declined for the present, so that the total now running, and soon to run off, is estimated as low as £2 000,000 sterling, or only $10,000,000. Under this change in the means of carrying forward the speculation in Western Telegraph and some of the New York and Western Railroad Stocks, the increased cost of Money to the Stock Exchange, generally, is enchanced. The city banks have been weakened in their reserves through the week, though toward the close, the turn is in their favor, some of them reporting the influx of moderate amounts of Money, from the interior. There has been a very moderate movement noted in the discount line, and the better grades of commercial paper have been rated at from 8@12 per cent per annum for the choicest names. The city banks, last week, lost about 1¼ millions of their specie reserve while adding nearly half a million to their legal tender hoard. Their deposits were further cut down nearly 1⅛ millions, and their loan and discount averages reduced nearly ⅞ths of a million. The banks are once more deficient in their obligatory reserve, the last statement showing that they had $377,200 less than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of nearly half a million to its coin balance, while losing about 1⅜ millions of currency. Its currency reserves at the close of the week were $16,906,320; and its coin hoard, $39,184,340.

The cash balances of the Treasury Department on Wednesday were as follows; Currency, $2,600,000; Coin, $69,500,000; Certificates, $24,100,000.

The Secretary of the Treasury has called in all the outstanding Three per cent certificates, amounting to $325,000, interest to cease May 31.

The city banks, in their latest return, show an increase of $425,600 in legal tender notes, with a decrease of $1,293,200 in their specie, and a reduction of $1,114,800 in their deposits, also a contraction of $850,100 in their loan and discount averages, and an addition of $22,100 to their item of circulation. The city bank exchanges, last week, averaged 106¾ millions.

The clearances of the banks averaged through the week 106¾ millions a day, and amounted in the aggregate, for the whole week, to $640,861,782 as against $658,903,673 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $1,329,308 and enlarged its coin reserve $464,118 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $16,179,100, against $21,384,700 same time last year. The city bank deposits are now $193,508,700 against $203,058,800, week ending March 20, 1872. The legal tender reserve amounts to $38,729,800, against $41,649,700 same time last year. The circulation now stands at $27,635,710 against $28,019 400 same time last year. The loans are now $274,848 700 against $276,767,400 at this date last year.

The coin reserve of the city banks is now about 16⅛ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 38¾ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 193½ millions, against 47⅛ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3 322,163 of currency, and $1,861,586 of gold, the latter including $2,967 000 from customs; and disbursed $4,651,480 of currency and $4,397,468 of gold, the latter embracing $376,353 of coin interest. The total receipts of the office in March were $46,871,846, including $12,327,866 from Customs; total payments $51,671,414, including $1,918,101 of coin interest.

Government revenues were moderate in their yield, during the week. The excises yielded within the week 1½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $85,570,739. The customs at the port of New York, for the week, were $2,925,292, and at the outports, about $950,000 more, in coin or coin certificates.

Gold advanced to 118⅛ on Monday, a very brisk and excited movement, almost wholly speculative, under the manipulations of the operators for a rise, who are said to have acquired control of the bulk of the floating supply of the precious metal, outside of the hoard in the Treasury Department. The upward movement was aided by the rise in the Bank of England rate for Money, and the extensive short interest in the local market. There was nothing in the Treasury programme for April, or in the look of the Foreign Exchanges, to justify the sharp rally in price, but the Bulls in the Gold Room have had great success in alarming the Importers and other parties who have been borrowing Gold, of late, to meet their engagements for Customs and Exchange, as to what the price may possibly be later in the season. The opinion has been growing for some time past that we are to have higher Gold this Spring and Summer than in 1872 or 1871, and speculators are not, of course, slow to take advantage of this feeling. There was not much of an export call for specie, and the Customs drain, was not more than a fair average at this season. The Treasury advertises to sell $6,000,000 of Gold in April. By the 20th of the month the Department will probably anticipate the payments of Gold Interest due May 1. These will amount, at all the Sub-Treasuries, to $17,300,000. On the other hand, the Customs demand for Gold for the month will amount to about $11,500,000 at New York, and $4,500,000 at the out-ports. The Gold Notes of the City Bank Averages have been drawn upon pretty freely to pay Customs. This was partly compensated by the sale of $1,500,000 from the Treasury, which went into Bank on Friday of last week. The later dealings indicated a much less confident temper in the speculative movement, influenced, in part, by the report of a further decrease of $1,644,059 in the public indebtedness, during March, as shown by the 1st of April Treasury exhibit. The range of the price during the week has been from 115⅛@118⅛ and the closing quotation on Wednesday was 117⅛ against 116⅛ on Wednesday of the preceding week. The specie outflow last week, was $676,712. The Gold Exchange Bank clearances have averaged about 118⅜ millions per day during the week. Wednesday's clearance were up to $172,817,000.

The customs demand for Gold last week, averaged $494,500 a day. The arrivals of specie from

Europe, Havana and foreign other ports thus far in 1873, have been $627,834 against $535,210 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $103,566,583 against $120,385,925 during the same time in 1871-2.

Government has disbursed through the U. S Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $61,120,440, against $62,117,154 during the same time in 1871-2.

The export drain of specie was $748,012 last week, against $609,196 same week preceding year. The shipments since July 1, 1872, have been $49,528,173 against $27,914,906 during the same portion of 1871.

The foreign exchange market has been very unsettled, through the week, the wide fluctuations in Gold, and the severe stringency in the Money line operating against steadiness in the exchanges. Toward the close, a freer sale was noted for bills, but at very low figures. Bankers' sixty day bills on London closed at 107⅝@107⅞; sight bills on London, at 108½@108¾. The week's exports of Domestic Produce have been to the currency value of $5,361,289.

Government securities have been pressed for sale, by operators, needing Money, and have declined in price, leading to a more active business. The later dealings show a steadier movement, favored by the 1st of April public debt exhibit, which shows a further liquidation of about 1⅝ millions.

Government proposes, under the April programme of the Treasury Department, to sell during the month at least six millions of Gold as follows: Thursday, April 3, $1,500,000; Thursday, April 10, $1,500,000; Thursday, April 17, $1,500,000; Thursday, April 24, $1,500,000. And to buy in a million of Five-Twenty bonds, as follows; Wednesday, April 9, $500,000; Wednesday, April 23, $500,000.

U. S. sixes of 1881 closed on Wednesday of this week at 119¼@119⅝ U. S. Five-Twenties of 1862, 115¾@116⅝; U. S. Five-Twenties of 1864 at 116¼@116⅜; U. S. Five-Twenties of 1865, 117⅝@118, U. S. Five-Twenties of 1865 consolidated 115¾@116; U. S. Five-Twenties of 1867, 116½@117; U. S. Five-Twenties of 1868, 116½@117¾; U. S. Ten-forties at 111¼@111⅜; U. S. Fives of 1881 (Funding Loan) 113½@114½; Six per cent. currency Sixes from 113½@114.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 19.	March 26.	April 2.
Consols	92⅞	92¾	92⅞
U. S. 5-20s, 1865	93½	94½	94½
" 1867	93½	93⅞	93⅝
" 10-40s	89	89¼	89¼
New Fives of 1881...	90½	91¼	91
Erie	52¼	51¾	51¾

State bonds have been in less demand at easier and irregular prices, though closing rather more steadily.

There has been a fair demand noted for the Railway Mortgages which have shown remarkable firmness in view of the Money pressure. Central Pacific Sixes have been in good demand closing firmly at from 102¾@103¼. Chesapeake and Ohio Sixes have been in fair request at 87½ and interest. Western Pacific Sixes have been selling to a fair extent at 94¾@95. The Northern Pacific 7-30 Loan has been attracting a liberal share of attention from buyers at par and interest.

The Railway and Miscellaneous share speculation has been unusually brisk, but the fluctuations in price have been frequent, and violent, Monday's operations showing a very serious depression of values, influenced by the Gold excitement, and the extraordinary stringency in the Money line. The later transactions indicated reviving confidence, though the continued Money pressure was decidedly against buoyancy.

General business has been less satisfactory as to the magnitude of the dealings, as also as to values. The financial disturbances were against commercial activity. Breadstuffs closed weaker. Provisions unsettled. Middling upland cotton, closed on Wednesday at 19¾@20 cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,026,393 bales, against 2,252,223 bales same time in the preceding year; exports 1,864,520 bales against 1,546,561 bales in the previous year; stock at the ports at latest dates, 537,962 bales against 422,490 bales same date 1871.

There has been less animation in the line of foreign goods, the extraordinarily severe Money pressure and the disturbances in the line of Gold and Foreign Exchaeges operating against free dealings. Values, however, were comparatively well supported. The week's imports amounted to $13,884,598, including $3,531,657 of dry goods.

Ocean freights have been moderately active, since our last. Room on the berth has been in light supply and rates have been well supported. Vessels on charter have been offered more freely especially for the Petroleum trade, and on rather easier terms. Recent arrivals added considerably to the available supply of tonnage.

At the Live Stock Markets, Beeves have been in fair request at from 9¼@14¼ cts. Veals in moderate demand and quoted heavy at 7@11 cts.; Sheep at from 5⅝@8⅝cts.; Swine at 6¼@6¾ cts. per lb., all live weight. The week's receipts were 8,687 Beeves, 1,280 Veal Calves, 13,704 Sheep and Lambs, and 30,840 Swine.

☞ The name of Fairbanks is identified with the weighing of the world. In 1830 a Scale manufactory was established at St. Johnsbury, Vt. From small beginnings, their business has increased till their factories cover acres of ground and upwards of 600 men are constantly employed. At first their orders were confined to this country alone, but to-day the whole world is weighed in the Fairbanks Balance.

Office of Fisk & Hatch,
No. 5 Nassau-st., New York, Mar. 31, 1873.

The Six per cent Gold Bonds of the Chesapeake and Ohio Railroad Company, being secured by a First Mortgage on a completed Road—which is one of the great East and West Trunk Lines, commanding a large through business, and which, from the immense Mineral, Agricultural, and other valuable resources of the country it traverses, is assured of a very remunerative local traffic—are among the most substantial and satisfactory investment securities in the market; and, at the present price, 87½ and accrued interest, yield a liberal rate of interest on their cost.

They are in denominations of $100, $500, and $1,000, coupon and registered; interest payable May and November; principal and interest in gold coin in New York.

We also buy and sell at current market rates, the Western Pacific Six Per Cent Gold Bonds originally negotiated by us, and now quoted at the Stock Exchange, and widely known as favorite securities in the principal money markets. Coupon bonds of $1,000; interest payable January and July; principal and interest payable in gold in New York. Price to-day is 94¾@95.

We buy and sell Government and Central Pacific Bonds, receive deposits, on which we allow interest, make collections, and do a general banking business.

FISK & HATCH.

Pittsburgh, Ft. Wayne and Chicago Railway.

The annual meeting of the stockholders of this company was held in Pittsburgh on the 19th ult. After the organization of the meeting, the President submitted a verbal report in which he stated that among the most important matters transpiring during the year was the decision of the Supreme Court of Ohio in what was known as the *quo warranto* case, which was brought for the purpose of compelling the company to show by what authority they exercised the rights of a corporation in that State. The decision was adverse to the interests of the company in some particulars and decidedly favorable in others. It was adverse because it decided that the company was not a corporation of Ohio, but a foreign company. The favorable part of the decision was that the Court held that it could enjoy all the rights accorded to other corporations in the State, subject to provisions of the law.

Passing from this point the President stated that under the authority given by a resolution that "Betterment Bonds" to the aggregate of $2,000,000 had been issued to the lessees to reimburse them for repairs and for bettering the condition of the road. The lessees asked for authority to spend $2,000,000 additional for adding to the rolling stock of all kinds, enlarging the shops, purchasing new tools, and making extensive repairs, etc., and the Board had asked for it. It was not expected that all the improvements and additions would be made during the present year, but they would be by the close of the ensuing year.

The lessees report that the aggregate net earnings for the year of the road, exclusive of the two branches reached $9,839,000, and the total, including the two branches were $10,336,000, or five times as much the General stated, as he ever expected they would reach when he assumed charge of the consolidated roads in 1856. The rents and interest have been paid promptly by the lessees.

The President stated that another very important question had been raised since the decision of the Supreme Court of Ohio, previously referred to, had been rendered. It was whether under that decision the Ohio stockholders would be compelled to list their stock in that State for taxation. If they were, it would force the stockholders to relinquish their stock, which would be alike prejudicial to their interest and a loss to the State. Legal gentlemen had been consulted, and the opinion expressed by them was that the affirmative view of the question was untenable. The State would tax the property of the company as heretofore, and if the stockholders were compelled to pay taxes on their stock they would be paying twice on the same property. He thought, therefore that the Ohio stockholders would not be required to list their stock in that State.

Better progress had been made in bringing the legal business of the company, pending at the time of the lease, to a termination. Two or three suits had been closed, but as many new ones, some more important than those concluded, had been terminated.

There had been paid during the year, of old debts, a little less than $150,000, the main item of which sum was the amount due the Cleveland and Pittsburgh road on a contract for a division of receipts.

The President then referred to the effect of the past winter on railroads and machinery, and remarked that the past four months were the most severe ever experienced since railroads were first operated in this country. The Pittsburgh, Fort Wayne and Chicago Railway had met the fate of other roads, the track having been injured and the machinery impaired. The lessees promise that as soon as the weather will permit the track will be put in first-class condition and the machinery restored.

Reference was then made to the extraordinarily large amount of business which had been and is being thrown upon railroads, the necessity of providing additional facilities in the way of tracks, sidings and equipment in order to accommodate the business offered. The lessees of the road recognizing this necessity had asked authority to construct a double track along the entire length of the road. The request had not yet been acted upon by the Board, but would be at an early day.

The President concluded by stating that the points referred to embrace all that would be alluded to in the written report, although they would be given more in detail.

After the report had been submitted, a resolution was adopted that the election of three directors be proceeded with. The election was by ballot, and resulted in the selection of the following gentlemen, who will serve for the ensuing four year: Wm. B. Ogden of Chicago; Jesse L. Williams, Fort Wayne; Louis H. Meyer, New York.

General Geo. W. Cass was continued as President, and F. M. Hutchinson, Esq., as Secretary and Treasurer of the company.

The meeting then adjourned.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY OF FOR INJURY TO A SERVANT, RECEIVED THROUGH NEGLIGENCE OF A FELLOW SERVANT.

The facts of the recent case of Chicago and Alton Railroad Company *vs.* Murphy, (53 Ill. 336), are fully and clearly stated in the following opinion by—

LAWRENCE, J.—This is an action brought by the appellee, as administratrix of James Murphy, deceased, against the appellants for wrongfully causing the death of said Murphy, who was at the time in appellant's service. There is no dispute in regard to the facts. The deceased was one of several workmen, under the immediate charge of one Hill, as foreman, whose duty consisted in examining all trains on their arrival at the railway station in Bloomington, and making all needed repairs. He and a fellow laborer had been engaged in "jacking up," and repairing a car in a freight train, and having finished his work had started for the shop where they kept their tools, when, in passing down between the rails of the main track, he was overtaken and struck by a switch engine, and so injured that he soon after died. The switch engine was constantly engaged on the station grounds, and although under the immediate control of the yard master, it was used for whatever purpose it might be required, and among others, for switching such car or cars as were to undergo repairs by Hill's men. In that way it was more or less connected with the work in which deceased was engaged, and the engineer managing this engine and the men of Hill's "repair gang," as it was called, were strictly fellow servants of a common master, having different functions, it is true, but engaged in the same general department, to wit: the doing of the needed work upon the depot grounds for the purpose of despatching the various trains. If a car in a train which had just arrived, was found to need repairs, Hill would advise the yard master, and the latter would have the switch engine place the car in such a position in the yard as he might think proper, when Hill's men would make the necessary repairs.

Under the circumstances, we are wholly unable to hold, as insisted by council for appellee, that the deceased and the engineer were not fellow servants in such a sense as to subject them to the well established rule exempting the common master from liability in cases of this character. Admitting, as we do, the carelessness of the engineer upon the switch engine, in neglecting either to ring the bell or blow the whistle, and waiving the question as to whether the deceased was not chargeable with equal negligence, we are clearly of opinion that this case can not in principle, be distinguished from the former cases decided by this court, in which we held, under an analogous state of facts, that no recovery could be had. It is true, we said in Chicago, and Alton R. R. Co. *vs.* Keefe, 47 Ill., 108, that the duties of an employee of a railway company might be so entirely distinct from all occupation upon its trains, as to leave him at liberty to pursue the usual legal remedies for injuries received while a passenger, and we instanced the case of a book-keeper in a railway office, injured upon a train through the carelessness of the engineer. We have no wish to modify what was there said, and we have shown in the opinion pronounced in the case of Labor *vs.* The Chicago, Burlington and Quincy R. R. Co., 51 Ill., 401, that we are not disposed to extend the exemption from liability claimed by railway companies under this rule where one employee has been injured by the negligence of another. In the last named case, we held the company liable on the ground that the plaintiff had been employed to do work only ordinarily hazardous, and had been required to perform other work, for which he was not engaged, and which was extra hazardous. But there is nothing in either of those opinions which would make the appellants in this case chargeable with damages; and to hold the company liable, would be to disregard the almost uniform current of authorities, both in the American and English Courts. It is, of course, not easy to define who are to be considered fellow-servants, in the sense of this rule, with such perfect accuracy that doubtful cases will not occur; but in our opinion the principle announced in one of the instructions asked by the defendant, is correct. That instruction was as follows:

"If the jury believe, from the evidence, that both the deceased and the engine driver, at the time deceased was injured, were in the employment of the railroad company, and that their ordinary occupations in such service bore such relations to each other, that the careless or negligent conduct of the engine driver endangered the safety of the deceased, then such danger was incident to the employment of the deceased, and the plaintiff cannot recover in this case."

This instruction was refused, perhaps because the court considered its substance was embodied in one of those given for defendant, but in that event the court should have set aside the verdict as against the instructions. When the ordinary duties and occupations of the servants of a common master are such that one is necessarily exposed to hazard by the carelessness of another they must be supposed to have voluntarily taken the risks of such possible carelessness when they entered the service, and must be regarded as fellow servants, within the meaning of this rule. The fact that the engine driver received his orders from the yard-master, and the deceased received his from the foreman of the repair gang, we can not consider material in this case. They were still the fellow servants of a common master working in the same place, to subserve the same interests, and with their occupations so related to each other that the safety of the deceased necessarily depended to a greater or less extent upon the care of the engine driver, and this he must have known when he entered the service.

We do not deem it necessary to dwell further on this case; but besides the cases heretofore decided by this court we refer to the following authorities, cited by counsel for appellants, as fully sustaining the views here expressed. Lovegrove *vs.* London, Brighton and South Coast Railway Company, 111 E. C. L., 699. Morgan *vs.* Vale of Neath Railway Company, Law Reports, Q. B., vol 1. p. 149. Tunney *vs.* Midland Railway Company, Law Reports, C. P., vol. 1, p. 291.

A new trial should have been granted by the court. The judgment must be reversed and the case remanded.

Judgment reversed.

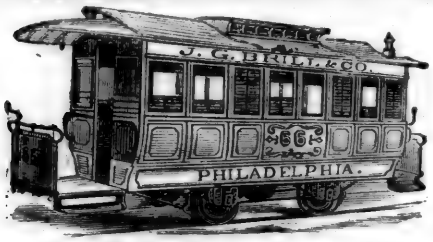
Boston, Hartford and Erie Railroad.

The Boston *Advertiser* gives the following view of the effect of Judge Shepley's decision in the United States Circuit Court in the Boston, Hartford and Erie Railroad litigation:

It is now only a few weeks since the bill in equity of the Erie Railway Company was filed in the Circuit Court for the District of Massachusetts. The substantial purpose sought in that bill was to establish a lien in favor of the complainants upon the franchise and assets of the Boston, Hartford and Erie Company, which lien was claimed to be paramount to, or at least concurrent with, the lien created by the Berdell mortgage in favor of the bondholders. As a subordinate or preliminary step to procuring the main relief sought, an application was made for an injunction to be granted against the trustees under the mortgage, and against the assignees in bankruptcy.

The complainants were especially anxious to prevent the formation of the new corporation by the bondholders, which, unless thus stayed by an order of court was known to be imminent. They asked, therefore, that the trustees should be enjoined from advancing further in the process of foreclosure by summoning a meeting for this purpose. This was the chief object which they had in view. It was also a part of their prayer that the assignees should be enjoined from selling the equity of redemption. But this was a point of much less importance. The main purpose was gained if the organization of the company could be interrupted.

The hearing and the opinion of the court bore upon this application only. The respondents insisted as their first point, that the court had no jurisdiction in the premises. Upon this, however, the court overruled them. But having asserted his power, it remained for the judge to decide whether or not the complainants had shown such a state of affairs that he ought to exercise it for the purpose of preventing or delaying the foreclosure. But he failed to see that the lien of the complainants, if in fact it had any existence, could be in any way affected by the expiration of the time for the completion of the foreclosure, and the formation of the new corporation. Upon this substantial ground he rested his refusal to grant the injunction prayed for against the trustees. There was no necessity for it; it could achieve nothing.



The injunction sought against the assignees was denied on the ground that the request was not properly before the court.

The position in which matters are left is therefore simply this: The bill of the Erie Railway seeking to establish the lien as against the Berdell bondholders is still pending. The question whether or not such a lien exists has not been brought before the court, and of course has not been the subject of any expression of judicial opinion. This litigation remains to be pursued in the future. The bondholders are now free to form the new corporation according to the terms of the mortgage, and to supersede the trustees in operating the road. This they will do forthwith. Had the court granted instead of denied the motion for an injunction, the new company could not have been formed, at least for an indefinite period, and the trustees would have continued to exercise their present functions. This is in substance the whole meaning and effect of the decision. The new company may be formed and may take possession of the franchise and assets. Meantime the Erie Railway may continue to urge its claims set forth in its bill. If it shall ultimately establish its lien upon the corporate property, it can enforce that lien against the new company as effectually as it could have enforced it against the trustees, as effectually against the purchasers of the equity of redemption as against the assignees in bankruptcy who now hold that equity.

☞ From a statement lately published by the Italian Minister of Public Works, it appears that the total length of railways open in Italy at the

end of 1871 was 6,398 (about 4,000 miles) chilometri, and at the end of 1872, 6,753, showing an increase of 355 chilometri, of which 118 were Ligurian, 20 Calabresi, 18 Meridionale, 62 Romane, 35 Alta Italia, and 102 Sardinian.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 22, at 273,214 tons, and for the coal year at 3,071,201 tons, against 3,045,994 tons to corresponding time last year, being an increase of 55,307 tons. The bituminous tonnage for the week is 39,599 tons, and for the year 347,417 tons, giving a total of all kinds for the week of 312 813 tons, and for the year 3,418,618, being an increase as against production to same time last year of 105,-881 tons.

Long Looked For Come at Last!

THE UNIVERSAL MICROSCOPE—The best Low Priced Microscope ever made, exceedingly useful for examining flowers, insects and Minute Objects, Detecting Counterfeit Money, and Disclosing the Wonders of the Microscopic World. It is adapted to the use of Physicians, Teachers, Students and the Family Circle. Requires no Focal adjustment, and can therefore be readily used by any person. Other Microscopes of no greater power cost $3 each and upwards, and are so difficult to understand that none but Scientific men can use them, the Universal always gives satisfaction. One single Microscope will be sent carefully packed, by mail, on receipt of $1. Agents wanted everywhere. Address

D. L. STAPLES & CO.,
Allen, Michigan.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B; water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the **Steam Water Station Company,**

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

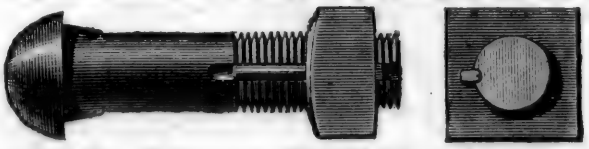
CONSIGNMENTS SOLICITED.



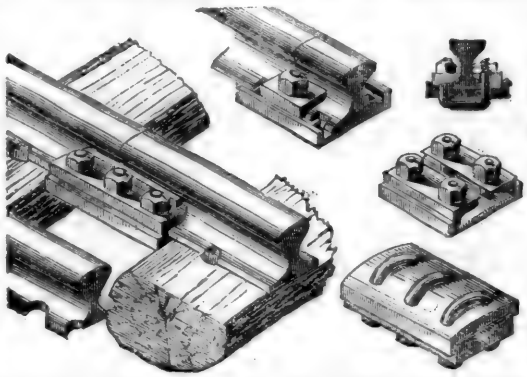
WM. COURTENAY, President. CHAS. F. COBB, Secretary.

THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

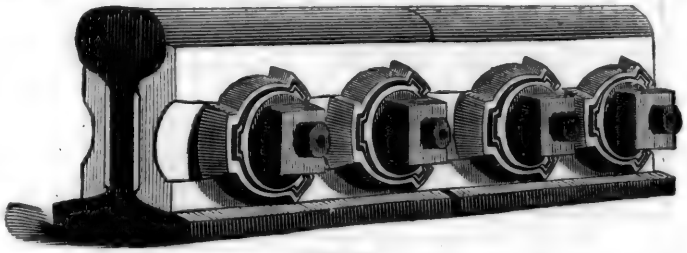
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Copper Mining Statistics.

Operations in copper mining began in the Lake Superior copper region in 1845. Since that time, as nearly as can be ascertained, something like one hundred and fifteen companies have been organized, and upon the shares of these have been assessments aggregating over $17,000,000. The mine upon which the largest amount of assessments has been levied is the Isle Royale, whose shareholders have paid in $910,000. Next to them in amount of expenditure comes the Phœnix, which, in its present condition, represents $820,000 of outlay. The mine which figures lowest in the matter of expenditure is the Sharon, whose proprietors have made a permanent investment amounting to only two thousand dollars. During the year 1872, only three companies levied assessments, the Allouez, Petherick, and St. Clair, amounting in all to $190,000, and but eight companies paid dividends, viz.: Calumet and Hecla, Quincy, Pittsburgh and Boston, Central, Minnesota, Franklin, Pewabic, and National. The aggregate of these was $3,390,000, leaving a net return from the mines last year of $3,200,000. Of this, $2,750,000 came from Calumet and Hecla. During the eighteen years which have elapsed since mining in the Lake Superior region first begun, the aggregate of all dividends paid is $11,910,000, which, taken from the $17,000,000 of assessments, shows a balance of over $10,000,000 against the mining region.

INVESTMENT BONDS.

THE NORTHERN PACIFIC 7-30 FIRST MORTGAGE GOLD BONDS, which we recommend as a profitable and well-secured investment, bear 7 3-10 per cent. gold interest, and have the following elements of security, viz:

1. They are the obligation of a strong corporation.

2. They are a First Mortgage on the Road, its Equipments, Rights and Franchises.

3. They are a first lien on its Net Earnings.

4. There is pledged, in addition, for the payment of principal and interest, a Land Grant of 12,800 acres per mile through the States, and 25,600 acres per mile through the Territories traversed. The Company is already entitled to nearly Ten Million acres of its Grant, and its Land Sales thus far have realized $5 66 per acre.

With nearly 500 miles of the road completed and in operation, the earnings for 1873 will be large.

All marketable stocks and bonds are received in exchange for Northern Pacifics on most favorable terms.

☞ The earnings of the Union Pacific Railroad for February, 1873, were $491,783 55, the expenses $289,266 22, and the net earnings $202,517 33. In February, 1872, the earnings were $534,115 09, the expenses, $392,354 05, and the net earnings $141,761 04—showing a decrease in earnings of $42,331 54, with a decrease in expenses of $103,087 83, making the increase in net earnings $60,756 29. From January 1 to February 28, 1873, the earnings were $1,015,758 41, the expenses $640,883 42, and the net earnings $374,924 99—showing an increase in gross earnings compared with 1872 of $207,707 24, and an increase in net earnings of $338,969 63.

☞ The Boston and Maine Railroad car shops, at Lawrence, Mass., are turning out some elegant parlor cars, which are to be used on the main line of that road, besides 18 fine passenger cars. Two new cars—an express and a smoking car—were taken from the shops a few days since. The

latter is of the monitor pattern, handsomely finished in mahogany and burl ash, and gilt mouldings. The trimmings are in bronze, and the ventilators are of the Howard Brothers' patent. Buntin's patent seats, handsomely upholstered, add much to the beauty of the car. It is fitted with the Miller platform and the Westinghouse brake, and, as a specimen of car-building, is a great credit to the company's shops. The company is now fitting the Miller platform to all its passenger cars.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1872:

	Memphis Branch.	Knoxville Branch.	Main Stem.
Passengers	$104 665 16	$93,614 64	$707,449 29
Freight	180,683 01	193,317 05	1,615,268 64
Express	10,033 09	10,599 31	78,957 23

	$2,797,590 00
From which deduct—	
Interest account	$266,982 10
Discount account	19,158 11
Dividend No. 18	269,313 00
Dividend No. 19	359,228 00
Sundry charges	109,496 01
	1,024,177 22
Balance to credit June 30, 1872	$1,773,412 78

The following is a comparative statement of the earnings of the Main Stem and Branches during the years—

	1870-'71.	1871-'72.
Gross earnings	$3,153,006 90	$3,200,068 09
Operating expenses	2,098,371 34	1,986,874 68
Net earnings	$1,054,635 56	$1,213,193 41

This shows an increase in gross earnings of $47,061 19; with a decrease in expenses of $111,196 66—making an increase in net earnings of $158,557 85. The balance to credit of profit and loss is $1,773,412 78, against $241,398 54, at the close of the preceding year—an increase of $1,532,014 24. The president in his report says:

In 1867 the board by resolution closed the construction account. During the past three years large expenditures have been made for additional rolling stock, machine shops, depot grounds, and steel rails, adding largely to the value of your property chargeable to "cost of the road." The traffic of the road, having grown to an extent not contemplated by its original projectors, made these large expenditures absolutely necessary. The board has by resolution re opened the construction account and debited the cost of the road with these various amounts.

The cost of the road, per last report, was		$13,964,388 27
Improvement account of 1869-'70.	593,107 09	
Improvement account of 1870-'71.	561,651 46	
Charged to construction, 1871-'72.	541,263 11	
Memphis, Clarksville and Louisville Railroad	1,599,774 39	
Showing the total cost of the road to this date		$17,260,184 32
Add to this the cost of Memphis and Ohio Railroad	3,162,667 80	
Other resources after deducting liabilities	2,575,263 32	
Showing the total cost of the property of the company		$22,998,115 44

The actual value of the Memphis and Ohio and Memphis, Clarksville and Louisville Railroads may fairly be estimated as worth $2,000,000 more than they cost this company, making the total value of the company's property $25,000,000, while the liabilities in stock and bonds (the only liabilities), are only $21,224,702 66.

The Memphis, Clarksville and Louisville Railroad has been purchased from the State of Tennessee and operated as a branch of this company since October 1, 1871. The three months prior to that date it was operated under the former contract with the Receiver of the State of Tennessee.

The expenses for the three months closing the operation under the contract with the receiver were	$145,264 52
The earnings for the same period were	119,887 68
Showing an excess of expenditures of	$25,376 84
The earnings for the nine months as the property of this company were	$385,471 10
Expenses same time	351,575 55
Showing an excess of earnings of	$33,895 55
But this does not include the interest on the cost of the road, amounting to	74,128 57
Which would show a deficit of	$40,233 02

The excess of expenditures is due to the large amount for new bridges, machine shops, and depot grounds. The road is in first-class condition, and the expenses will be largely reduced the coming year.

The Memphis and Ohio Railroad is being run under the same arrangement as last year, but it is proposed at an early day to carry into effect the contract for its consolidation.

The gross earnings for the year were		$938,576 68
Running expenses	$697 821 35	
Interest account	242,487 38	
	940,308 73	
Showing a deficit of		$1,732 05

The total earnings of the lines operated by this company were:

Louisville & Nashville & Branches	$3,290,844 53
Memphis, Clarksville and Louisville, 12 months	505,358 78
Memphis and Ohio	938,576 68
Total earnings	$4 653,772 99
Expenses Louisville and Nashville and Branches	1,997.125 57
Interest, do	296,982 19
Dividends, do	628,541 00
Expenses Memphis, Clarksville & Louisville, 12 months	496 840 07
Interest do. 9 months.	74,128 57
Expenses Memphis & Ohio	697,821 35
Interest do	242,487 38
	4 403,926 04
Showing a profit of	$249,853 95
The bonded debt since June 30, 1871, as per last report, was	$8,752,000
Consolidated Mortgage Bonds issued during the year	240,000
	$8,992,000
Redeemed Main Stem Mortgage Bonds	$175,000
Redeemed Memphis Branch Mortgage Bonds	40,000
Paid to sinking fund in consolidated mortgage bonds	33,000
	248,000
Total bonded debt June 30, 1872	$8,744,000
In this sum is included City of Louisville bonds without mortgage	849,000
Making the total debt for which the road is mortgaged	$7,895,000
Memphis and Ohio Railroad Bonds, mortgage on that road	3,500 000
Total mortgage on all	$11,395,000

During the year seven per cent cash dividend on the capital stock has been paid.

The report of the vice-president and general superintendent for the past year shows an increase of gross earnings on all the lines operated by this company of 1.49 per cent; decrease of operating expenses of 2.52 per cent; and an increase of net earnings of 14.97 per cent.

This company took possession July 1, 1872, of the Nashville and Decatur Railroad, which will be run under lease. This will give a direct line to Montgomery (when the South and North Road is opened) of four hundred and ninety miles.

During the past four years this company has added to its lines, by purchase, lease, and controlling interest, the following roads in Tennessee and Alabama:

Memphis, Clarksville & Louisville R. R.	83 miles.
Memphis and Ohio Railroad	130 "
Nashville and Decatur Railroad	122 "
South and North Alabama Railroad	183 "
Total added	518 miles.

This has been accomplished without tax to our stockholders or contributions from cities or counties. On and after October 1, 1872, the company will operate nine hundred and twenty miles of road. With new and improved connections in every direction, now completed and soon to be completed by judicious and faithful management on the part of your officers, the revenues of the company should continue to increase, and by the extension of our lines the country should be developed, and the trade of Louisville, Nashville, Memphis, and the other cities and towns upon the line of the road should be largely increased.

The Louisville and Nashville Railroad is in its infancy, and requires liberal and judicious management to make it what it should be. At no very distant period we may hope for direct con-

nections, via Virginia and Tennessee roads, with the Atlantic ports by the extension of our Lebanon Branch; also with the Mexican Gulf ports via Montgomery; and the Pacific ports via Memphis, Little Rock, and Shreveport, there connecting with the Texas Pacific, about to be built under the auspices of Colonel Thomas A. Scott.

Seventeen consecutive semi-annual cash dividends have been paid to the stockholders. The property of the company is in good condition, and has increased largely in value by additions made.

Our depot accommodations and offices are inadequate to our wants, and should be increased and improved.

The Board acknowledges their high appreciation of the skill and fidelity of the officers, and the employees generally for their efficient services.

Statement showing cost, resources, and liabilities of Main Stem and Branches, exclusive of Lebanon Branch Extension, for the fiscal year ending June 30, 1872:

Total cost of road to June 30, 1872.		$14,198,238 50

		12,244,000 00
Profit and loss account		1,773,412 78
		$26,327,024 32

During August past five hundred thousand pounds sterling bonds of this company, secured by a mortgage upon the Memphis, Clarksville and Louisville Road (recently purchased of the State of Tennessee), having thirty years to run, and bearing six per cent. interest, were negotiated in London at eighty-eight per cent., netting the company in currency (after paying commissions and all other expenses) about ninety-six per cent, showing that the company has good credit upon the London Exchange, where the securities are daily quoted.

President.—H. D. Newcomb.

Vice President—Thos. J. Martin.

Directors.—For one year: Thos. J. Martin, W. H. Smith, Wm. M. Farrington. For two years: H. D. Newcomb, W. B. Caldwell, James Whitworth. For three years: B. F. Guthrie, Geo. H. Hutchings, P. J. Potter.

Secretary.—Willis Ranney.

Assistant Secretary.—A. M. Quarrier.

Vice Pres't and Gen'l Sup't.—Albert Fink.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of Pork Packing in the Western States, of which the following is a recapitulation:

	1872-73.	1871-72.
Ohio	885,827	834,163
Indiana	610,966	566,134
Illinois	1,834,611	1,620,375
Iowa	325,447	280,580
Missouri	894,334	693,949
Kansas	40 885	43,034
Wisconsin	324,072	334,410
Minnesota	24,550	21,000
Nebraska	20 110	12,890
Kentucky	332,456	342,662
Tennessee	29,300	40,180
Miscellaneous	77,756	42,281
Total	5,410,314	4,831,558
Increase in number at four large cities		317,899
Increase at other points		260,857

The aggregate of pounds of net Hogs and Lard compare with last year as follows:

	1872-3.	1871-2.	Increase.
Hogs, lbs.	1,257,519,283	1,099,783,385	157,735,898
Lard, lbs.	216,845,385	188,603,317	28,242,068

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 29, at 315,925 tons, and for the coal year at 3,407,233 tons, against 3,356,700 tons to corresponding time last year, being an increase of 59,538 tons. The bituminous tonnage for the week is 41,820 tons, and for the year 379,236 tons, giving a total of all kinds for the week of 357,745 tons, and for the year 3,786,469, being an increase as against production to same time last year of 122,749 tons.

☞ The following gentlemen have been elected directors of the Panama Railroad Company for the ensuing year: S. L. M. Barlow, Edwards Pierrepont, T. B. Musgrave, A. B. Stockwell, J. M. Burke, G. G. Haven, C. A. Hotchkiss, A. Masterton, S. J. Harriot, H. W. Gray, L. S. Stockwell, C. A. Avery, F. W. G. Bellows. The officers are: President, Alden B. Stockwell; Vice-President, F. W. G. Bellows; Secretary, John Taylor; Treasurer, Henry Smith.

Northern Railway of Canada.

At the annual meeting of the proprietors of the Northern Railway of Canada, held in Toronto on the 8th ult., the report of the Canadian directors for the year ending December 31, 1872, was submitted as follows:

To the Proprietors of the Northern Railway of Canada:

The Canadian Directors have the honor to submit their report for the year ending 31st December, 1872, with the usual appendices in detailed explanation thereof; observing that in consequence of the absence in England, and on the business of the company, of the Managing Director, it seemed to be expedient to postpone the annual meeting until the present date.

The gross traffic receipts for the year have been $894,774 40 (£183 857 15s. 9d. stg.) as against $777,498 94 (£159,760 1s. 1d. stg) in 1871, showing an increase of 15.08 per cent. By reference to "Account No. 1," it will be seen that this increase has arisen in each important class of traffic, viz.: on the Passenger. Local and Through freight Accounts respectively.

The ordinary working expenses of the year have been $528,509 88 (£108,867 18s. 4d. stg.) as against $461,816 44 (£94,791 0s. 11d. stg.) in 1871, giving for 1872 a rate on the gross traffic receipts of 59.06 per cent as in comparison with 59.33 per cent in 1871, and showing a reduction of 0.27 per cent in the rate. Having regard to advances in the wages of labor, and in the price of most articles of railway supply, a rise in the rate of working expenses might have been expected, and would probably have occurred, but that the condition of the Permanent Way, the stock of rails on hand, and the expedient of local re-rolling, enabled the directors to avoid any large purchase of rails at the high price recently ruling; and although the larger the gross earnings, the lower the rate at which they may be earned, it may be prudent to anticipate some advance in future expenditure.

The expenditure upon necessary extensions and additions to works, buildings, rolling stock and general equipment, has amounted to $185,723 38 (£38,162 7s. 2d. stg.) as against $138,478 76 (£28,454 10s. 9d. stg.) in 1871. The details of this expenditure will be found to represent very important, although quite insufficient, additions to the traffic of the Line. The station buildings and wharves have been extended in number and capacity—upwards of 21 miles of new sidings have been laid down—five locomotive engines have been added to the stock—and 120 new cars of all classes (chiefly freight) have been placed on the line; and yet the executive is obliged to acknowledge that the equipment of the railway does not keep pace with the increasing demands of the traffic.

The net revenue carried to the account of interest on the company's debentures with the balance brought forward from 1871, amounted to the sum of $182,762 47 (£37,553 18s. 7d. stg.), and all interest accrued due to date has been paid, and a balance of $3,532 87 (£725 18s. 7d. stg.) has been carried forward to the credit of 1873.

The leased lines of "The Northern Extension Railways Company" now in traffic operation represent a mileage of 45.34 miles, viz., from Barrie to Atherly 24.84 miles, and from Collingwood to Meaford 20.50 miles, and their earnings have already been sufficiently satisfactory to establish a certainty that they will be self-sustaining; whilst, as "feeders" to the main line of this company, they have exercised a very palpable and beneficial influence upon its earnings in extending the sphere of commerce tributary to the City of Toronto.

In presenting this satisfactory review of the operations of the past year, the directors have nevertheless to express their convictions that much remains to be done before the railway can meet the pressing demands of the trade of the district, or secure the profits of it.

There is scarcely an item in the equipment service in which (relatively with the trade and revenue offering) serious deficiencies ought not at once to be supplied, whilst the directors only await additional financial powers to engage, as they propose to do without delay, in the changing of the gauge of the line necessary to put it and the district in unbroken connection with the western peninsula of the Province and with the American railway system. But with a capital account constituted as is that of this company, it is simply impossible to keep pace with the demands upon the resources of the line, or to undertake the change of gauge, and the Canadian Directors have accordingly placed themselves in communication, through the London Board, with the body of proprietors resident in England, to ascertain how far they would concur in such a consolidation and re arrangement of the capital account as would enable the company to undertake the necessary works; and they are happy to state that, consistently with due protection to their existing interests (wholly preferential) the English proprietary has consented in a liberal spirit to whatever course may seem to be proper and necessary to the thorough efficiency of the undertaking; and, conditionally upon due legislation, to afford every assistance and support in raising such an amount of new capital as may be requisite thereto. Notice has accordingly been given of the intention of the company to apply at the present session of the Dominion Legislature for such amendments to its Acts as may authorize the creation of new capital for the purposes referred to.

The directors invite the concurrence of the proprietors to measures so obviously beneficial to local interests, observing that the adoption of the amended Act of course be subject to their authority before being in operation.

The directors cannot close this report without bearing testimony to the continued efficiency of all departments of the service, and therein to the zeal and ability of the chief executive officers, and to the satisfactory and harmonious working of a contented body of employes.

All of which is respectfully submitted.

JOHN BEVERLEY ROBINSON, President.
FRED. CUMBERLAND, Managing Director.

Northern Extension Railways Company.

At the annual meeting of this company held in Toronto on the 19th ult., the following report was submitted:

The directors have the honor to present their report of the transactions of the company to 31st Dec., 1872.

The total receipts on capital account to that date were $351,740, exclusive of any issue of the company's bonds which had not then been sold, and exclusive also of municipal bonuses and of Government subsidy still to be received.

The directors have the pleasure to announce that the company's debentures have since been very satisfactorily placed with Messrs. Grant, Bros. & Co., of Lombard-st., London, to the amount of £129,500 sterling, at the rate $9,000 per mile of line, and it is gratifying to observe that these debentures are now quoted at a premium on the official list of the London Stock Exchange.

The expenditure of the company amounted on the 31st Dec. to $959,500 49, being on the Muskoka line, $634,048 50, and on the North Grey line $325,451 99.

The directors have the honor to submit the report of the auditors on the above accounts.

The portions of the line finished have been duly opened for public traffic from time to time as follows:

From Barrie to Orillia, 22.12 miles, on the 27th November, 1871.

Orillia to Mara, 2.72 miles, on the 30th September, 1872.

Collingwood to Thornbury, 12.68 miles, on the 1st September, 1872.

Thornbury to Meaford, 7.82 miles, on the 25th November, 1872.

The total mileage now in traffic operation being 24.84 miles on the Muskoka, and 20.50 miles on the North Grey line.

The works on the line between Mara and Washago are fully complete to sub-grade; the Severn River bridge is in an advanced state of construction; the rails are now being delivered and distributed, and there is every prospect that this important addition will be open for traffic early in May.

Although the contract has been let for the line between Washago and Gravenhurst, the directors are not in a position to push the work with the vigor which it deserves. No steps have yet been taken by the district of Muskoka for the granting of the bonuses promised; indeed, there is a hesitation on the part of the local authorities which would seem to indicate a desire to evade any burthen in aid of the work. Again, the serious advance which has taken place in the cost of every element of railway construction has reduced the value of the Government subsidy to a proportion of the cost of the line far below that which the Legislature intended to grant. That subsidy amounts, over a considerable portion of the railways, to $2,000 per mile, and over that part of them in actually unsettled territory does not exceed $4,000 per mile; and yet it is a fact that since these subsidies were determined upon as sufficient public aid to induce railway construction the rise in the price of the materials of the track alone (rails, &c.,) represents within a fraction of $2,000 per mile. Under these disadvantages, seeing that the municipal aid lingers, and that the parliamentary subsidy is wholly inadequate (especially in view of the nature of the territory) to the objects it was intended to promote and hasten, the directors are of opinion that the works within the Muskoka District should be prosecuted with great caution, and distributed over such period of time as may ensure financial safety. They submit this recommendation with sincere regret, because the completion of the line to Lake Muskoka would greatly contribute to the traffic of the whole undertaking by opening out a wide field for lumbering and agricultural operation, now only awaiting railway service; and their regret is all the stronger because the postponement of railway service for two or three years will be a serious injury to the district, and a bar to industries and developments of great importance to the Province at large.

The relations of this company with the Northern Railway of Canada, the lessee of these lines are of the most cordial and satisfactory character, and the directors rejoice to report that their anticipations with regard to traffic have been realized to an extent which is an assurance that the lines will be self-sustaining, and will contribute to the main line and to the city of Toronto an important and highly valuable volume of trade.

The Northern Railway Company has officially intimated its intention to change the gauge of its line to four feet eight and a-half inches, and have invited the concurrence of this company to that measure. The directors have expressed their cordial approval of the change, which, when made, must include the lines of this company; and to promote that desirable object the directors recommend the adoption of a petition to Parliament, praying that the necessary powers be granted to the Northern Company.

An arrangement has been concluded under which the steamer Emily May has been acquired in the interest of this and the Northern Company, and the Lake Simcoe traffic thus brought into combination and control. The directors recommend that this measure be concurred in, and the necessary powers be granted to their successors to carry out the agreement referred to.

All of which is respectfully submitted.

FRANK SMITH, President.
JOHN E. FOREMAN, Secretary.

After explanations and remarks by Mr. Howland, Mr. Cumberland, and other gentleman, directors and officers were appointed for the current year: Hon. Frank Smith, President; Mr. N. Barnhart, Vice-President. Directors: Messrs. W. H. Howland, John Turner, H. L. Hime, Jos. Rorke, and Hugh Chisholm.

Pacific Railroad of Missouri.

At the annual meeting of the stockholders of this company, held on the 31st ult., the following gentlemen were elected directors: W. H. Coffin, D. R. Garrison, John B. Henderson and Morris J. Lippman. The board as now constituted is as follows: Hudson E. Bridge, Jas. Baker, N. C. Chapman, W. H. Coffin, T. B. Edgar, D. R. Garrison, J. B. Henderson, M. J. Lippman, F. B. Hays, C. J. Morrill, Andrew Pierce, Jr., A. J. Taussig and C. B. Fisk.

A report was submitted, showing that during the past year 6,931 tons of new rails, part of them steel, had been laid, as also 118,606 ties. Five locomotives, 5 passenger cars, 150 flat cars, and 201 box cars had been obtained in the same time. Reference was made in report to the lease of the road to the Atlantic and Pacific company for 999 years from the 29th of June last, and to the completion of the Carondelet branch.

Western Pacific bonds, 1862-4	1,970,560 00	29,558 40
Sioux City and Pacific bonds, 1862-64	1,628,320 00	24,424 80
Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $18,509,280 90; interest repaid by transportation of mails, &c., $4,185,407 68; balance of interest paid by United States, $14,323,873 22.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, March 31, 1873

WILLIAM A. RICHARDSON,
Secretary of the Treasury.

Our Iron Industries.

Statistics of the iron trade of the United States are always of interest to Philadelphians. During 1872 the total consumption of iron in this country was 4,054,618 tons, of which 1,254,618 tons were imported, and the balance was produced in the United States—2,400,000 tons of it being pig iron and 400,000 tons scrap iron. The aggregate pig iron production of all the furnaces of the country in 1872 is stated at 2,388,250 tons, of which 478,500 tons were charcoal iron, 1,197,010 tons anthracite iron, and the remainder, 712,500 tons, were made with raw bituminous coal and coke. These interesting figures are collated from the last report of the American Pig Iron Association, which also gives an estimate of the annual requirements of the country for various classes of iron. The lion's share is claimed by the railroads, there being 2,478,500 tons of railroad iron annually consumed. Miscellaneous castings require 600,000 tons; stoves, 250,000 tons; nails and tacks, 250,000 tons; nuts and bolts, 250,000 tons; architectural purposes, 150,000 tons; agricultural implements, 183,000 tons; gas and water pipe, 100,000 tons; ship building, 40,000 tons; and sewing machines, 20,000. Few people will imagine that twenty thousand tons of iron are annually wrought into sewing machines, or that 33,000 tons are made into mowing and reaping machines. These various industries consume altogether 4,311,500 tons of iron, so that the supply is manifestly short.

To meet the increasing demands of the market, the American producers last year built or began building 109 new blast furnaces, and they also project the construction of 39 new furnaces this year, the estimated increase in the supply of pig iron by these new furnaces being 327,000 tons. To work up the raw material, fifty new rolling mills are under way, whilst the puddling capacity of those in existence has been increased thirty per cent. Pennsylvania, as usual, stands at the head of this industry, her share of the new structures being seventy-nine furnaces and twenty rolling mills. Ohio is the State approaching us the nearest, her share of the increase being thirty furnaces and eleven rolling mills. The others, chiefly small establishments, are scattered among the Western and Southern States, Michigan, Wisconsin, Missouri, Indiana and Tennessee leading.

Thus far the figures are accurate, but in classifying the iron production among the various States it is difficult to apportion to each its proper amount. The total yield of iron ore of the United States in 1872 is stated at 6,421,836 tons, but of that product in the Lake Superior region over a million tons were shipped eastward for reduction, the furnaces in Ohio and Pennsylvania getting the most of it. The greater part of the pig iron production was, as usual, in Pennsylvania 702,819 tons, Ohio coming next with 230,636 tons, and New York next with 159,164 tons. In Missouri there were 126,713 tons manufactured, Wisconsin 67,000 tons, New Jersey 63,413 tons, Michigan 63,195 tons, Maryland 41,500 tons, and Georgia, Alabama and Tennessee 26,000 tons. These figures, however, are stated to be only partial, on account of the great difficulty of getting returns from all the furnaces.

Auxiliary to the iron interest is the manufacture of Bessemer steel, which is growing into great importance, there being no less than fourteen new Bessemer works building and projected, the most of them in this State. There were 125,361 tons of Bessemer steel made during the year, of which 99,000 tons were steel rails. It is the rapid extension of the railroad system of the United States that causes the great demand upon the iron markets of the country. The average increase is seven thousand miles of new railway a year, and this requires 700,000 tons of bars or 1,050,000 tons of pig iron, whilst the amount required for repairs is 1,225,000 tons a year. This is exclusive of the railway demand for machinery, engines, cars, &c., and it is further stated that the consumption of iron by the railroads of the country for all purposes exceeds the entire production of all the American works. The iron industry of this country seems now to be based on a solid foundation, and its prosperity is to a large extent the prosperity of Pennsylvania, and Philadelphia, while the great advantages of it go towards making up the prosperity of the whole country.—*Philadelphia Ledger.*

☞ A new iron steamship, called the Grenada, for the Pacific Mail Steamship Company, was launched from the yard of the Harlan & Hollingsworth Company, at Wilmington Del., on the 1st inst. The ship is 300 feet long over all, 40 feet beam and 30½ feet depth of hold. Her frame of angle iron and heavy plating makes her one of the most substantial iron steamers yet afloat. She has four water-tight bulkheads, all extending to the middle deck, except the collision bulkhead, which goes to the upper deck. She will have accommodations for one hundred and eighty first-class passengers and three hundred in the steerage.

☞ The National Railway Company was organized at Trenton, N. J., on the 2d inst., and the articles of organization and surveys filed in the office of the Secretary of State. The officers are: President, Samuel K. Wilson; Secretary, Robert R. Carson; Treasurer, W. W. Stelle; Engineer, A. J. Gillette.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, April 12, 1873.

Stock Exchange and Money Market.

The Money market has been decidedly active all through the week, early in which very high rates were exacted for aid to speculative borrowers, though toward the close the tendency was toward an easier movement, and call loans were quoted at from 7 per cent currency and gold to $\frac{1}{16}$@$\frac{1}{8}$th of one per cent added for carrying stocks from day to day. The available supply was gaining on the more urgent requirements of the street firms. The city banks were receiving considerable amounts of currency from the interior, giving promise of a more encouraging showing on the next weekly statement of averages. The last was the most unfavorable exhibit of the season, which has been a memorable one for the protracted closeness of the market. The discount business has been somewhat brisker within the range of 8@12 per cent per annum on the best grades of mercantile credits. The city banks, last week, lost about 1⅛ million of their specie reserve and 3¾ millions of their legal tender board. Their deposits were further cut down nearly 5⅞ millions, and their loan and discount averages reduced nearly ⅞ths of a million. The banks are once more deficient in their obligatory reserve, the last statement showing that they had $3,245,800 less than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of nearly 1⅝ths of a million to its coin balance, while losing about 1⅛th millions of currency. Its currency reserves at the close of the week were $15,739,987; and its coin hoard, $40,767,765.

The cash balances of the Treasury Department on Monday were as follows; Currency, $2,-305,003; Coin, $70,423,591; Certificates, $23,-420,500.

The city banks, in their latest return, show a falling off of $3,789,300 in legal tender notes, with a decrease of $514,700 in their specie, and a reduction of $5,821,700 in their deposits, also a contraction of $814,700 in their loan and discount averages, and an addition of $80,100 to their item of circulation. The city bank exchanges, last week, averaged 130 millions.

The clearances of the banks averaged through the week 130 millions a day, and amounted in the aggregate, for the whole week, to $780,498,464 as against $640,361,782 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $1,166,933 and enlarged its coin reserve $583,426 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $15,664,400, against $19,764,100 same time last year. The city bank deposits are now $187,687,000 against $201,065,100, week ending April 6, 1872. The legal tender reserve amounts to $34,940,500, against $38,695,200 same time last year. The circulation now stands at $27,715,800 against $28,014,700 same time last year. The loans are now $273,198,800 against $278,483,400 at this date last year.

The coin reserve of the city banks is now about 15⅝ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 34⅞ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 187⅝ millions, against 247½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3,869,599 of currency, and $4,515,112 of gold, the latter including $2,247,000 from customs; and disbursed $5,036,532 of currency and $2,931,687 of gold, the latter embracing $198,-590 of coin interest.

Government revenues have been yielding moderately since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year beginning with July 1, 1872, $87,578,923. The customs at the port of New York, for the week, were $2,187,672, and at the outports, about $750,000 more, in coin or coin certificates.

Gold has been active and buoyant in price. The speculative movement has been quite spirited and the export drain has been heavier, with a fair average customs demand noted. The highest price of the year has been reached during the week, 119⅛ having been realized on Saturday. The later dealings, have shown a less confident movement. The range of the price during the week has been from 117¼@119⅛ and the closing quotation on Wednesday was 118⅛ against 117½ on Wednesday of the preceding week. The specie outflow last week, was $1,246,188. The Gold Exchange Bank clearances have averaged about 85 millions per day during the week.

The customs demand for Gold last week, averaged $374 500 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $367,654, and thus far in 1873 have been $1,030,506 against $575,216 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $105,906,333 against $123,776,090 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $61,318,804, against $62,274,942 during the same time in 1871-2.

The export drain of specie was $1,246,187 last week, against $916,474 same week preceding year. The shipments since July 1, 1872, have been $50,774,360 against $27,831,380 during the same portion of 1871.

Foreign exchange has been very irregular; and at the close weak in price on a restricted business. Bankers' sixty day bills on London closed at 107⅛@107⅜; sight bills on London, at 107⅞@108⅛. The week's exports of Domestic Produce have been to the currency value of $5,-010,645.

Government securities have been quite active, with very free purchases noted for investment, largely on foreign account, at buoyant prices. Government proposes, under the April programme of the Treasury Department, to sell during the month Gold as follows: Thursday, April 17, $1,500,000; Thursday, April 24, $1,500,000. And to buy in Five-Twenty bonds, as follows; Wednesday, April 23, $500,000.

U. S. sixes of 1881 closed on Wednesday of this week at 120¾@121; U. S. Five-Twenties of 1862, 117¾@118; U. S. Five-Twenties of 1864 at 117¾@118; U. S. Five-Twenties of 1865, 119⅝@119⅞; U. S. Five-Twenties of 1865 consolidated, 117¼@117½; U. S. Five-Twenties of 1867, 118⅞@119⅛; U. S. Five-Twenties of 1868, 117½@118; U. S. Ten-forties at 112¼@112¾; U. S. Fives of 1881 (Funding Loan) 115½@116; Six per cent. currency Sixes from 113⅞@114.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 26.	April 2.	April 9.
Consols	92¾	92⅞	93¼
U. S. 5-20s, 1865	94⅛	94⅛	94¼
" 1867	93⅞	93⅝	93⅝
" 10-40s	89¼	89¼	89
New Fives of 1881	91¼	91	90¾
Erie	51¾	51¼	51⅛

State bonds have been in fair demand but at irregular prices.

Railway Mortgages have been quoted quite firm in view of the Money pressure, and have been in good request. Central Pacific Sixes have been in fair demand closing firmly at from 102¾@103. Chesapeake and Ohio Sixes have been selling to a fair extent at 87½ and interest. Western Pacific Sixes have been in demand at 94¾@95. The Northern Pacific 7-30 Loan also in request at par and interest.

There has been an active business noted in Railway and Miscellaneous share property, but prices have been fluctuating widely, mainly influenced by the condition of the call loan market.

The Metal trade has been very quite, as a rule. A limited movement has been noted in Ingot Copper at rather lower figures; 50,000 lbs. sold at 34c.: 5 tons English at 31c. Iron has been generally dull, with prices of Scotch Pig favoring buyers. Sales, 175 tons Scotch Pig, in lots, including Eglinton at $54, Glengarnock at $55@$56, and Gartsherrie at $60, and 400 tons No. 2 American Pig at $45@$48. We quote: Glengarnock Pig at $55@$56; Eglinton do. at $54; Gartsherrie at at $60: No. 1 American Pig at $50; No. 2 do. at $45@$48; Wrought Scrap at $57 50@$60; English rails at $70@$71, gold. American Rails at Works, $80@$85; Russia Sheet, 17c. Pig lead inactive at 6⅝c.@6¾c. gold, for ordinary foreign. Silesian Spelter quiet at 7⅛c., gold. Pig-tin in slack demand with Straits quoted at 33c., and English at 32¾c. gold. Tin Plates have been in less request, but at steady rates, with sales reported of 500 boxes Charcoal Plates at $12; 500 boxes Charcoal Terne, and 1,000 boxes Coke on private terms. Charcoal Plates quoted here at $12@$12 37½; Charcoal Terne, $10 50@$11 25; Coke, $10@$10 62½; Coke Terne, $8 75@10, gold, per box. Zinc dull and unchanged. Of Regulus Antimony, 10 casks sold at 14½c. gold.

General business has been on a moderate scale, since our last, with prices of Cotton, and Breadstuffs quoted weaker, and Provisions and Petroleum steadier. Middling upland cotton, closed on Wednesday at 19⅝@19¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,078,119 bales, against 2,463,428 bales same time in the preceding year; exports 1,909,900 bales against 1,608,796 bales in the previous year; stock at the ports at latest dates, 535,745 bales against 388,140 bales same date 1871.

Foreign goods have been in quite moderate request as a rule, on the previous basis as to values. The week's imports amounted to $7,576,073, including $2,104,060 of dry goods.

Ocean freights have been more active, and rates have shown more steadiness.

At the Live Stock Markets, Beeves have been in moderate request at from 9¼@14¼ cts. Veals at 7@11 cts.; Sheep at from 5⅝@8⅝ cts.; Swine at 6⅛@6½ cts. per lb., all live weight. The week's receipts were 6,419 Beeves, 1,685 Veal Calves, 14,538 Sheep and Lambs, and 39,986 Swine.

☞ Ground was broken on the 31st of March at Maysville, Ky., for the branch of the Kentucky and Great Eastern Railroad, between Maysville and Newport.

New York Central and Hudson River R. R.

For the purpose of consolidating its funded and mortgage debts, and providing the necessary means for laying the additional two tracks, procuring terminal facilities, and to make other improvements as its business may require, the New York Central and Hudson River Railroad Company have determined to issue bonds to the amount of thirty millions of dollars, payable on the 1st of January, 1903, with interest at the rate of seven per cent per annum, payable semi-annually, and two million of pounds sterling, payable at the same time, with interest at the rate of six per cent, payable semi-annually, in the City of London, and to secure the payment of such bonds, have mortgaged all the right, title and interest of the company in the New York Central and Hudson River Railroad, together with all the rolling stock, shops, etc. (excepting the Athens Branch) to Cornelius Vanderbilt, Jr., and William K. Vanderbilt. The instrument is to be recorded in all the counties in which the company owns property.

New Jersey Railway.

The New Jersey Railway Company was organized at Trenton, N. J., on the 7th inst., under the General Railroad Law, to construct a railroad from some point on the Delaware river, four miles above Trenton, to Bound Brook, and thence to Waverly station, in the city of Newark. The following gentlemen were elected directors: Delos E. Culver, Benjamin Fish, John G. Stevens, Isaac W. Scudder, G. Morris Dorrance, William I. Sewell, Charles E. Green, William Bettle, Sr., Benjamin Williamson, William G. Cook, Robert F. Stockton, Edward T. Green, Isaac B. Culver, Richard F. Stevens, Barker Gummere and Ira M. Harrison. The directors appointed the following officers: President Edward T. Green; Secretary, William J. Sewell; Treasurer, R. D. Barclay. The surveys of the route are filed together with an affidavit that the requisite number of shares have been subscribed and the amounts paid in, and that it is intended to construct the road in good faith.

☞ A special meeting of the stockholders of the Atlantic and St. Lawrence Railroad Co. was held on the 2d inst. at the office of the company in Portland, Me., to see: First, if they would accept an act of the Legislature additional to the act establishing the company, authorizing the company to increase its capital stock to one million dollars; and second, to see if the stockholders would ratify and confirm the action of the directors in authorizing and instructing the treasurer to indorse in the name of the company the bonds of the Grand Trunk Railway of Canada, issued in renewal of the bonds of the St. Lawrence and Atlantic Railroad Company. Both these propositions were accepted by the stockholders.

☞ The directors of the Second Avenue Railroad Company, recently elected, are: Thomas Crane, Edward Haight, Waldo Hutchins, Julius Wadsworth, Legrand Lockwood, George Bell, Joseph Richardson, John J. Donaldson, Augustus E. Masters, Solomon Mehrbach, Wm. S. Thorn, Frederick De Billier, James D. Fisk.

☞ It is stated that the Fort Wayne, Muncie and Cincinnati Railroad Company will soon consolidate with the Detroit, Ft. Wayne and Logansport Railroad.

Northern Pacific Railroad.

A dispatch, dated San Francisco, April 7, says: The Northern Pacific Railroad committee, consisting of Vice President Rice, of Maine; Messrs. Moorhead of Philadelphia, Frederick Billings of Vermont, and W. Milner Roberts, Engineer-in-Chief, will return East this morning, having completed on favorable terms, and below the estimated cost, an arrangement for the extension of the road northward during the present year to a practical connection between the road already completed, and the waters of Puget Sound. The contractors on Saturday, by telegraph, put men at work on the line.

With this railroad connection effected, the entire railroad system of Oregon, as well as the navigable waters of the Columbia are put in connection by rail with the waters of Puget Sound.

The committee deemed it inexpedient to press an immediate prosecution of the work on that part of the line between the upper navigable waters of the Columbia and Lake Pend d'Orielle, among other reasons, because on that portion of the route it is necessary to make arrangements in the fall for getting out crossties and bridge timbers, which can only be obtained on the mountains in the winter, and must be floated down during the spring rise of the streams.

Absecom and Great Bay Railroad.

The incorporators and stockholders of the proposed railroad from Absecom to Great Bay or Leeds' Point, a charter for which has recently been obtained, met in Camden, N. J., on the 29th ult., for the purpose of organizing. The following gentlemen were elected directors of the new company: Jonathan Sovy, Peter Boice, Wm. Moore, Jr., B. W. Higbee, J. L. Warner, Theodore J. Shuster, Horace J. Subers, Wm. M. Burke, Jonathan G. Sterrett, E. Stanley Perkins, Charles E. Henry. Subsequently the directors elected H. J. Subers President, Theodore J. Shuster Secretary and Treasurer, and Wm. Moore Jr., Solicitor. Stock amounting to $300,000 was subscribed. Work on the road is to be commenced immediately. The following executive committee was also appointed: E. S. Perkins, J. L. Warner and J. G. Sterrett. The distance from Absecom to Great Bay is about seven miles. From its terminus at Leeds' Point a steamboat will be run across the bay to Salt Island, Tucker's Beach, and also to Tuckerton, where connection will be made with the Tuckerton and New Jersey Southern Railroad.

☞ The export of rails from Great Britain to the United States for the month of Februry was 21,063 tons, against 53,131 tons in February 1872, a decrease of 32,068 tons. The total shipments from Great Britain to all countries during the month were 41,318 tons, against 71,361 tons in corresponding time last year.

☞ At the annual election for directors of the Pennsylvania Railroad, held at the office of the company in Philadelphia, on the 25th ult., the following board was chosen for the ensuing year: J. Edgar Thomson, Josiah Bacon, Wistar Morris, Edward C. Knight, Samuel T. Bodine, John M. Kennedy, John Rice, John Scott, Pittsburg, Alexander J. Derbyshire and Samuel M. Felton.

☞ The construction of the Lexington and Big Sandy Railroad has been let to contract, and the following gentlemen from Staunton are among the contractors: Capt. C. R. Mason, Major E. McMahon, T. R. Menifee and Charles Hoge.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, April 10, 1873.

The SIX PER CENT. GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, being secured by a First Mortgage on a COMPLETED road—which is one of the GREAT EAST AND WEST TRUNK LINES, commanding a large through business, and which, from the immense Mineral, Agricultural, and other valuable resources of the country it traverses, is assured of a very remunerative local traffic—are among the most substantial and satisfactory investment securities in the market; and, at the present price, 87½ and accrued interest, yield a liberal rate of interest on their cost.

They are in denominations of $100, $500, and $1,000, coupon and registered; principal and interest payable in gold coin in New York; interest May and November.

We also buy and sell at current market rates, the WESTERN PACIFIC SIX PER CENT. GOLD BONDS originally negotiated by us, and now quoted at the Stock Exchange, and widely known as favorite securities in the principal money market. Coupon bonds of $1,000; principal and interest payable in gold coin in New York; interest January and July. Price to-day is 94¾@95.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, receive deposits, on which we allow interest, make collections, and do a general banking business.

FISK & HATCH.

☞ The Chesapeake and Ohio Railroad Company, which will secure a continuous line from Richmond to Louisville, Ky., by the completion of the Lexington and Big Sandy Railroad have subscribed $200,000 towards the construction of a new bridge across the Ohio river at Louisville, and will form a western connection at that point with the St. Louis air-line.

☞ The earnings of the Central Pacific Railroad for March 1873, were $974,460, and for March, 1872, $875,763, an increase of $98,697. For the first three months of 1873 the earnings were $2,521,335, against $2,039,822 for the corresponding period of 1872—an increase of $481,513. Compared with the first three months of 1871, the increase is $884,900.

☞ The Levant *Herald* says that M. Roussin, one of the chief engineers of the Enterprise Generale of railways and public works, left Constantinople on the 26th ult. for Athens, in connection, it is understood, with the projected line of railway from Athens to Lamia, of which the concession was recently granted by the Greek Government to Mr. Syngros, the well known Galata banker.

☞ The earnings of the Ohio and Mississippi Railroad Company for the month of March, 1873, were $332,849—an increase of $43,997 over the corresponding month of last year.

☞ The earnings of the Chicago and Northwestern Railway Company for the month of March, 1873, were $959,911 36, an increase, compared with March, 1872, of $113,517 40.

☞ The Burlington and Missouri River Railroad Company, it is said, has thus far sold its land in Nebraska at the average rate of $8 42 per acre.

Journal of Railroad Law.

RAILROAD COMPANIES—PASSENGERS ON FREIGHT TRAINS WITHOUT TICKETS MUST BE PUT OFF AT A STATION—MEASURE OF DAMAGES.

The facts in the recent case of The Illinois Central Railroad Company *vs.* Sutton, (53 Ill. 397), are fully and clearly stated in the following opinion by—

BREESE, CH. J.—This was an action on the case, tried in the Ford Circuit Court, on a change of venue, brought by Joseph J. Sutton against the Illinois Central R. R. Co., for damages resulting to the plaintiff, by reason of his being put off a freight train on which he had taken passage without first procuring a ticket.

The jury found in favor of the plaintiff, and assessed his damages at eleven hundred and fifty dollars, on which the court rendered judgment.

To reverse this judgment the defendants appeal to this court.

Appellants make the point that it was not proven that the train on which plaintiff was embarked, was employed in carrying passengers. It may be true no proof was offered that this particular freight train was so employed, but it is proven by the appellants' witness, Oliver, that notices were posted up around the window of the ticket office, that passengers on freight trains must first obtain a ticket, and it was proved by Mr. Ayers that appellants were, at the time of this occurrence, accustomed to carry passengers on freight trains. This train is not shown to have been an exception, besides it is proved there were several passengers upon this train who had procured tickets. This is sufficient to show that this train was *pro hac vice*, a train for the conveyance of passengers.

They make the further point, that the averment in the declaration of the defendants undertaking to convey the plaintiff from West Urbana to Tolono, is not sustained by proof of an undertaking to convey from Champaign City to Tolono.

It would appear, from the testimony, that West Trbana and Champaign City are one and the same place, consequently there was no variance.

The principle objection of appellants is made upon the instructions given for the plaintiff, the first, especially.

There is one objection to that instruction, in that part of which it directs the jury to consider, in estimating the damages, any mental sufferings the plaintiff may have undergone, consequent upon the injury. The law is well settled, where the injury is not willful, mental suffering forms no part of the inquiry by a jury. 2 Greenleaf Evidence, § 267.

The plaintiff had entered the caboose car of a freight train without a ticket, and though he offered to pay his passage, he was told by the conductor the rules of the company forbid him taking fare, and as he had no ticket he must leave the car, which the plaintiff did, and this not at a regular station of the company. Here is an absence of anything like willfulness or malice on the part of the conductor, and being so, mental suffering, by which we understand such as is produced by an injury to one's reputation, by circumstances of indignity and contumely, under which the injury was done, and the consequent public disgrace to the plaintiff. This case is robbed of everything of this nature, and the only inquiry for the jury was, the bodily injury and such consequential damages as were the necessary result of the injury. It appears there had been a previous trial of this cause, in which the plaintiff recovered four hundred and fifty dollars damages. How much this instruction may have contributed to swell the verdict, under the same facts, to more than eleven hundred dollars, if it contributed in any degree to that result, can not be known, but in looking into the evidence, it is very apparent the plaintiff was a great sufferer by the act of appellants, in his body and business, and the amount found by the jury is no more than just compensation therefor, if they really reach the measure to which he was entitled. The conductor, when the money was offered for the fare, was informed by the plaintiff he was sick and unable to walk back one mile and a half to the station, through the mud, and if the doctor is to be believed, the consequences of this effort were of the most serious character, he, at the time, having a distressing disease.

The disease was aggravated, confined him to his bed, compelling him when partially restored to leave his business and resort to a water cure establishment, disabling him from giving that attention to his affairs their importance required, and resulting in great pecuniary losses to him.

This being so we would not, for the error pointed out in this instruction, reverse the judgment, for the evidence shows a clear violation of the law in causing the plaintiff to leave the train not at a regular station, and under circumstances of considerable aggravation.

The objections to the third and fourth instructions are not tenable, as the evidence that appellants' freight trains carried passengers, included the particular train in question.

Cases of this nature have been frequently before us, and it seems strange, when the law is so plain, that a passenger shall not be put off a train except at a regular station, it should be so often violated, and when there appears no necessity for such violation. In this case, the train had not advanced more than a mile and a half from the station. How much more in consonance with the dictates of humanity would it have been for this conductor to back the train a few hundred rods, so that a sick man should be subjected to as slight inconvenience as possible. But even this would never be necessary, if the order was given conductors of freight trains, before leaving a station, to visit a caboose car and demand a sight of the tickets, and if any passenger is there without a ticket, peremtorily decline to take him, and if he persists in remaining, then forcibly, if necessary expel him from the car. Either this rule must be adopted, or the conductors of such trains must be authorized to receive fares, or, and to that the public will not submit, decline to receive passengers on freight trains. If they will leave a station without first seeing that the passengers are provided with tickets, and then in violation of law, require them to leave the car, not at a regular station, it must be expected that juries will not be slow to visit them with the most exemplary damages, by way of punishment for such conduct. Courts will interpose in vain in setting their findings aside as excessive, for a second verdict, as in this case, will usually be greater than in the first.

Upon a review of the whole case, we do not perceive any grounds on which to reverse this judgment, and must affirm it.

Judgment affirmed.

Alabama and Chattanooga Bonds.

A proposition having been made by the State of Alabama, and approved of by the Council of Foreign Bondholders, that the bondholders should accept for the overdue coupons eight per cent currency bonds, repayable in 20 years, at 82 per cent, and join in the advance to the State of $250,000 to enable the State to complete the purchase of the railway, at a meeting of the bondholders, held on the 17th inst., the proposition submitted was unanimously agreed to. From the report of the committee read at the meeting by the secretary to the council (Mr. Hyde Clarke) we learn that the committee was appointed at the general meeting held last January, and having communicated with the financial firms connected with the issue of the previous railway loans, the following facts as to the financial transactions and position of the company were obtained. The total issue of bonds in connection with the Alabama and Chattanooga Railway by the State is $6,800,000. Of this $4,800,000 are 8 per cent first mortgage bonds, secured by the first mortgage on the entire property of the company, including 1,900,000 acres of land and guarantee of the State. There was a further additional issue of $2,000,000 eight per cent gold bonds, secured upon the entire revenue of the State. Thus as long as the railway remains unproductive both classes of bonds must be exclusively a charge upon the revenue and taxes of the State. Up to the present the railway was unable to lighten the charge involved in the State guarantee, and the State of Alabama has not yet recovered from the effects of the late American war, and was consequently unable to meet its engagements to foreign creditors. The railway has become involved in litigation and embarrassment to such an extent that it had been forced into Chancery, andthe railway being offered for sale the State bought it for $314,000 over and above the first mortgage. The State has paid $100,000 of the purchase money, and is bound to pay the balance, with costs, interest, &c., before the 15th inst.—amount $250,000, and if unable to find the amount the railway will be resold. Under these circumstances the State legislature has authorized the issue of $1,500,000 8 per cent cerrency bonds at 82, to cover the unpaid coupons, and meet other liabilities, and the State has voted the necessary increased taxes to meet its future obligations. The committee urge the advantages offered by the investment, quite irrespective of the fact that by assisting the State in this way they are improving the position of their holding, inasmuch as they are adding to the solvency of their debtor.

Mr. Gerstenberg, in supporting the resolution, showed that the holder of $1,000 having 8 per cent overdue to receive, would be entitled to receive in payment for them $92, an equivalent sum in the new 8 per cent at the rate of 82 discount. The committee, on behalf of the bondholders, had expressed themselves ready to tend on the following securities. The Government would give an equivalent sum in these bonds at the rate of 50 per cent, while they secured the option of purchase at 82. If Government did not repay the advance, the bondholders would be at liberty to sell the bonds in the market. A financial house of this country had offered to purchase the railway, which was worth from one to two millions of dollars. The Alabama Government had also made arrangements with a Mr. Ingram to buy the property and repay the advance of $250,000 within 90 days.

The bondholders have acted wisely in accepting the proposition, and rescuing the property from the hopeless condition in which it at present stood.—*Herapath, March* 22.

☞ Hereafter trains on the Cairo and Fulton Railroad will run no further north than Moark, the station on the State line, at which point there will be a change of cars. Prior to this date they have run to Poplar Bluff, about twenty-five miles north of the line.

☞ A bill has passed both branches of the Pennsylvania Legislature, incorporating the Turtle Creek Valley Railroad, which is to run from Wall's Station, on the Pennsylvania Railroad, to connect with the West Pennsylvania Railroad in Westmoreland, Indiana, or Armstrong Counties. The bill is drawn in the interest of the Pennsylvania Railroad Company, and will open and develop a rich coal field.

☞ The Pennsylvania Railroad Company proposes to spend $19,000,000 during the present year. A great portion of this vast amount will be expended in laying the additional double tracks between Pittsburg and Philadelphia. The work of grading for the new tracks has already been commenc d.

Long Looked For Come at Last!

THE UNIVERSAL MICROSCOPE—The best Low Priced Microscope ever made, exceedingly useful for examining flowers, insects and Minute Objects, Detecting Counterfeit Money, and Disclosing the Wonders of the Microscopic World. It is adapted to the use of Physicians, Teachers, Students and the Family Circle. Requires no Focal adjustment, and can therefore be readily used by any person. Other Microscopes of no greater power cost $3 each and upwards, and are so difficult to understand that none but Scientific men can use them, the Universal always gives satisfaction. One single Microscope will be sent carefully packed, by mail, on receipt of $1. Agents wanted everywhere. Address

D. L. STAPLES & CO.,
Allen, Michigan.

LANSDELL'S
Patent Steam Railroad Water Station.

DISPENSES WITH Tanks, Tank Houses, Stationary Power, AND Attendance.

CAN NOT FREEZE IN ANY CLIMATE, UNDER ANY CIRCUMSTANCES.

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

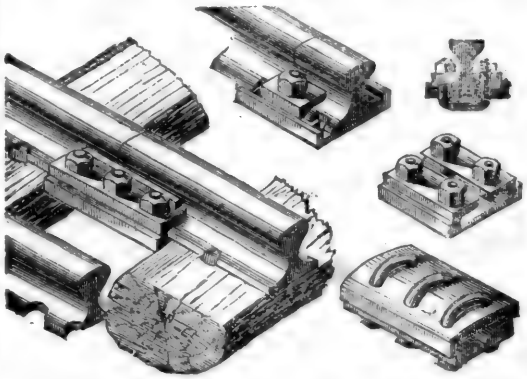
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

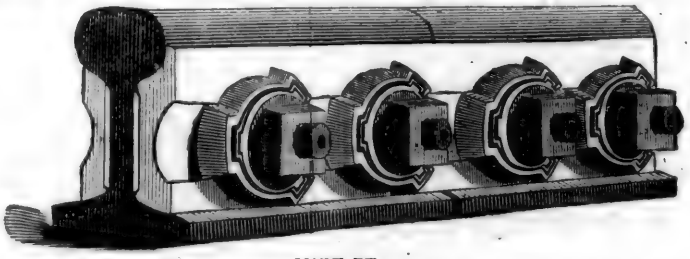
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BALDWIN LOCOMOTIVE WORKS.

NOTICE OF DISSOLUTION.

The partnership heretofore existing between the undersigned, under the firm name of M. BAIRD & Co., having expired by limitation, is this day dissolved. Matthew Baird having disposed of his interest in the Baldwin Locomotive Works to his late partners, and having retired from the business, they are authorized to liquidate the affairs of the late firm.

MATTHEW BAIRD,
GEORGE BURNHAM,
CHARLES T. PARRY,
EDWARD H. WILLIAMS,
WM. P. HENSZEY,
EDWARD LONGSTRETH.

April 8th, 1873.

The Baldwin Locomotive Works have been purchased from the late firm of M. Baird & Co. by the undersigned, who will carry on the business under the firm name of BURNHAM, PARRY, WILLIAMS & Co.

GEORGE BURNHAM,
CHARLES T. PARRY,
EDWARD H. WILLIAMS,
WM. P. HENSZEY,
EDWARD LONGSTRETH.

April 8th, 1873.

INVESTMENT BONDS.

THE NORTHERN PACIFIC 7-30 FIRST MORTGAGE GOLD BONDS, which we recommend as a profitable and well-secured investment, bear 7 3-10 per cent. gold interest, and have the following elements of security, viz:

1. They are the obligation of a strong corporation.
2. They are a First Mortgage on the Road, its Equipments, Rights and Franchises.
3. They are a first lien on its Net Earnings.
4. There is pledged, in addition, for the payment of principal and interest, a Land Grant of 12,800 acres per mile through the States, and 25,600 acres per mile through the Territories traversed. The Company is already entitled to nearly Ten Million acres of its Grant, and its Land Sales thus far have realized $5 60 per acre.

With nearly 500 miles of the road completed and in operation, the earnings for 1873 will be large.

All marketable stocks and bonds are received in exchange for Northern Pacifics on most favorable terms.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY.

☞ The Pennsylvania and Delaware and the Delaware and Pennsylvania Railroad Companies have been consolidated under the name of the "Pennsylvania and Delaware Railway Company." The road of the former company extends from Pomeroy, on the line of the Pennsylvania Railroads, to Landenberg; and of the latter company from Landenburg to Delaware city. The consolidation places the whole line from Pomeroy to Delaware city under one management. It is expected that the new road will commence operations about the 17th of this month.

☞ The Baltimore and Ohio Railroad Company has declared a dividend of 5 per cent on the stock of the Main Stem for the half-year ended 31st March, payable on and after the 1st proximo. Also, a dividend of 5 per cent on the stock of the Washington Branch for the half-year ended 31st March, payable on and after the 17th instant.

The Beach Pneumatic Railroad.

The Beach Pneumatic Railroad bill has been signed by the Governor. This act originally provided for the transmission of letters, packages and merchandise in the cities of New York and Brooklyn, and across the North and East Rivers, by means of pneumatic tubes, to be constructed beneath the surface of the streets, squares, avenues and public places in said cities, and under the waters of said rivers. Another act was subsequently introduced for an underground railway for the transportation of passengers and property in the city of New York, extending from the Battery or Bowling-green, under Broadway to Madison-square; thence under Broadway to its junction with Central park and Eighth avenue with a branch railway from and under Madison-square, under Madison-avenue to Harlem River, and across and under the bed of said river to the northerly shore thereof, by means of tubes of enlarged interior diameter sufficient for the construction of a railway or railways therein.

In answer to inquiries as to what action would be taken now that the bill had become a law, Mr. A. E. Beach, the President of the company, stated that it would be premature to give a definite reply, as the first thing to be done was the appointment of a board of commissioners by the Governor for the purpose of arranging and directing the execution of the necessary works. The appointment will be made within thirty days, and until

then no idea could be formed of the character or nature of the works. The company think that the road should be on the pneumatic principle which is generally considered best for underground traffic. The works will be pushed forward with all possible dispatch as soon as a decision shall have been arrived at.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey, present to the stockholders their report for the year 1872, including the general balance sheet at the close of the year.

The comparisons made of the receipts, expenses, &c., of the past year with those of the one that preceded it, include those of the Lehigh and Susquehanna Railroad and its branches, run under lease, the whole 180 miles of main line and 111 miles of branches, having been operated as one concern.

The Lehigh equipment is included in the general statement of equipment, which also includes that of all the branches; and the repairs of the same are included in the general expense accounts.

SERVICE OF THE ROAD AND FERRY.

The service of the whole road, as compared with that of the previous year, has been as follows:

	1872.	1871.
Miles run by passenger trains.	1,388,147	1,164,823
" merchandise "	1,060,742	808,795
" coal trains	2,142,348	1,556,905
Total by transportation trains.	4,601,237	3,530,523
Miles run by wood, gravel and construction trains	288,654	171,850
Total miles run by trains.	4,889,891	3,702,373

The ferry boats have made 40,828 trips between New York and Jersey City, against 39,993 trips the previous year. The ferry between New York and Elizabethport has been regularly kept up.

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1872 with the previous year gives the following results:

	1872.	1871.
Number of passengers	4,478,513	3,944,103
Miles traveled by passeng'rs.	49,272,020	44,808,654

A similar comparison of merchandise business gives as follows:

	1872.	1871.
Number of tons carried	1,490,689	990,591
Tons carried one mile.	88,560,282	59,557,173

A similar comparison of the coal business gives the following results:

	1872.	1871.
Number of tons carried	3,619,349	2,958,046
Tons carried one mile.	294,376,287	229,342,245

The coal tonnage over the Central Division, since the transportation of coal was commenced, has been as follows:

	Lehigh Tons.	Lackawanna Tons.	Total Tons.
1856	33,325	98,670	131,995
1857	84,841	209,950	294,791
1858	122,923	417,726	540,649
1859	183,277	455,681	638,958
1860	263,906	590,863	854,769
1861	254,345	568,869	823,214
1862	314,195	502,375	816,570
1863	435,927	613,954	1,049,881
1864	474,221	675,743	1,149,964
1865	509,819	494,687	1,004,506
1866	511,076	778,173	1,289,249
1867	513,425	855,620	1,369,045
1868	765,657	853,188	1,618 845
1869	733,485	822,567	1,556,052
1870	997,504	1,054,680	2 052,184
1871	1,244,998	632,066	1,877,064
1872	1,538 591	689,626	2,228,217
Total	8,981,515	10,314,438	19,295,953

There was an increase in Lehigh Coal of 293,593 tons, and in Lackawanna Coal, of 57,560 tons, on the Central Division.

EQUIPMENT.

The company now own 227 engines, of which 219 burn hard coal and 8 wood. The condition of these engines is reported as follows: 156 in first-class order; 30 in good working order; 14 require general repairs, and 25 are now in shops repairing. During the year 9 new passenger engines, 10 new freight and 2 new shifting, and 5 new work engines have been added to the equipment. One engine has been condemned and cut up.

The equipment of cars is as follows: 115 first-class and 13 second-class passenger, 34 baggage and smoking, 10 baggage and mail, 3 express, 351 8-wheel and 7 4-wheel house freight, 32 8-wheel stock, 9 8-wheel and 78 4-wheel caboose, 414 8-wheel platform, 311 8 wheel gondola, 1 8-wheel pavillon, 10 8-wheel, 136 6-wheel and 14 4 wheel iron and lime, 740 8-wheel, 14,034 4-wheel and 367 4-wheel coal, 19 6 wheel and 4 4-wheel wood rack, 4 8-wheel derrick, 4 8-wheel tool and 36 8-wheel work (flat) cars.

During the year the following additions have been made to the car equipment. There have been purchased 16 passengers cars, 1,730 4-wheel coal cars and 80 4-wheel gravel cars. There have been built in the company's shops, 2 baggage and smoking cars, 25 box cars, 4 stock cars, 17 flat cars, 36 work train flat cars, 1 pavilion car and 2 tool cars, all 8-wheeled; and 130 4-wheel coal cars, 8 4 wheel caboose cars, and 2 4-wheel gravel cars. The following changes were made: 3 first-class passenger cars were changed to combination cars; 1 baggage car to baggage and mail car; 1 second class passenger car sold, and 1 changed to a combination car; 1 second-class passenger car, 5 4-wheel box cars, 13 6-wheel iron and lime cars, 90 8-wheel coal cars, and 3 4-wheel caboose cars, have been broken up or destroyed.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses of both roads for the year 1872, compared with those of 1871.

Receipts:	1872.	1871.
Passengers	$1,391,209 29	$1,275,091 82
Merchandise	1,894,640 84	1,562,947 54
Coal	3,718,236 90	3,900,571 71
Mail	19,499 95	15,809 90
Express	26,417 16	28,429 55
Rents	19,618 90	25 516 49
Miscellaneous	17,771 70	17,424 59
Car service	33,323 25	15,587 59
Total receipts	$7,120,717 99	$6,841,379 19
Expenses:		
Running expenses	$1,594,236 09	$1,266,095 94
Fuel consumed	346,360 21	328,436 98

Miscellaneous exp.	96,027 92	71 979 59
Ferry running exp.	90,032 00	88,995 50
Ferry boat repairs	29,662 35	34,895 67
	$4,236,806 31	$3,706,144 48
Balance net earnings.	$2,883,911 68	$3,135,234 71

The gross receipts per mile run have been as follows: From passenger trains, $1.00 against $1.09 in 1871; from merchandise trains, $1.79 against $1.93; from coal trains, $1.74 against $2.55. The average receipts per mile run, from all trains, have been $1.46 against $1.85 the previous year.

The gross expenses per mile run have been 87 cents, against $1.00 the previous year.

The following table shows the receipts, expenses and net earnings, from the beginning of 1853, to the present time, including since 1870 those of the Lehigh and Susquehanna Division.

	Receipts.	Expenses.	Net Earnings.
1853.	$349,018	$197,629	$151,389 or 43 p.c.
1854.	378,145	197,849	180,796 or 48 "
1855.	393,729	208,856	184,873 or 47 "
1856.	553,479	258,308	295,171 or 53 "
1857.	682,314	340,502	341,812 or 51 "
1858.	836,934	345,614	491,320 or 58 "
1859.	971,702	385,716	585,986 or 61 "
1860.	1,185 818	475,457	710,391 or 60 "
1861.	1,201,895	522,452	679,443 or 57 "

Coal and iron stocks	2,991,343 73
Lands, material, &c. increase	267,748 94
Interest account for year, balance	453,041 78
State taxes for year	65,918 14
Rent of Lehigh and Susquehanna Railroad	810,455 50
Dividends for year, 10 per cent	1,755,569 63
Accounts receivable	2,287,928 98
Balance cash, December 31	218,685 71
	$14,719,326 45

The profit and loss account stands as follows:

Gross earnings during the year	$7,120,717 99
Balance of former profits to credit of account	166,155 62
	$7,286,873 61
It has been debited as follows:	
Ordinary expenses	$4,236,806 31
Rent of Lehigh and Susquehanna R.R.	810 455 50
Interest account	453,041 78
State taxes	65,918 14
Dividend account	1,755,569 63
	7,321,791 36
Balance to debit of account	$34,917 75

This may be regarded as a favorable result to the business of a year in which the company increased its coal transportation 851,153 tons, and received for the larger amount, $182,334 81 less

than for the smaller transportation of the previous year.

The cost of the Central Railroad, double tracked, with its ferry houses, ferry boats, coal wharves, station houses, shops, and other appendages, stands at $12,447,741 43, and that of the equipment of both roads at $7,882,235 45.

BUSINESS OF THE YEAR.

The passenger and general merchandise business continues to show a healthy growth and steady improvement, but without any marked feature calling for comment.

The coal business continued during most of the year, to be a severe struggle by producers and transporters to get the largest possible tonnage forward to a market, which though capable, as shown, of taking all the coal offered, became utterly demoralized in prices by the idea of over production. The prices for coal fell steadily, transportation rates being correspondingly reduced, until they had reached a point at which little was made by any one in the trade. No corresponding benefit accrued to the public, as consumers knew they could not rely upon these low prices as permanent, and consequently made no reduction in the prices of manufactured articles. In the autumn, however, a change for the better took place, and there is every reason to believe that during the year 1873, without any reaction to high prices, coal will realize, to all concerned in the trade, a very different result from what it did the past year, while the supply called for will be even greater than the amount produced in 1872, large as it was. It is the opinion of those best informed in the trade, that we are not likely to suffer again soon from the same causes that cut down profits so severely in 1872.

The business of the Lehigh and Susquehanna Division has steadily increased. The division of business between the two roads has been as follows:

	Central.	Lehigh & Sus.
Passengers	$1,191,965 38	$199,243 91
Merchandise	1,463,635 37	431,005 47
Coal	1,856,681 81	1,861,555 09
Other receipts	114,206 09	2,424 87
Total	$4,626,488 65	$2,494,229 34

CONSTRUCTION.

Many works of construction for facilitating business or improving and enlarging the roadway and its adjuncts, are reported in the Consulting Engineer's Annual Report, but few of these need to be here specified.

The tangent line between Westfield and Plainfield, through Fanwood, is so far advanced that it is expected to transfer the trains from the old to the new route during the summer. The elevation of the roadway through Plainfield proper, is left for subsequent decision; and, dependant on this, is the location and erection there of a new and handsome station house.

The work on the widening of the roadway for third and fourth tracks has been continued as required. Much has also been done in correcting and straightening the original tracks; all such work being included in the expense accounts.

A handsome stone arch bridge of the proper width for four tracks has been erected over the creek at Elizabeth. Extensive grading and filling has been done at Westfield, on the station grounds both sides of the track, with surplus material from the new line through Fanwood. At Evona, the centre of a new and rapidly increasing neighborhood, a neat and commodious station has been built, the grounds neatly graded and planted, and a new stone and iron railway bridge built over the public road. Many public roads have been carried over or under the roadway by permanent structures, with great increase of safety thereby to the public and to the company's trains.

NEWARK AND NEW YORK RAILROAD.

This branch has been further perfected this year by filling in the trestling across the salt meadows between the Hackensack and Passaic Rivers. The reduction of grade through Bergen Hill has not been pushed, and is therefore still incomplete.

The branch across the meadows, via Elizabethport and Brill, has been regularly run all the year as a local line between Elizabeth and Newark, and has had a satisfactory business. By this route a close connection is furnished the inhabitants of Newark, from and to nearly all the trains on the Central road, which has proved a great public convenience.

PERTH AMBOY AND LONG BRANCH.

The road from Elizabethport to Perth Amboy has been mainly graded, bridged and prepared for the track. The work is light except in a few spots. Track laying has begun from the eastern end, and can be pushed as fast as desired. It is expected to open the road to Perth Amboy this summer.

The bridge over the Raritan river or bay is considerably advanced. The pile bridging, of about 3,000 feet in length, is nearly completed. All of the standing piles are driven, most of the spur-shores are in and fitted, and the superstructure is done, with the exception of laying the floor planks and putting on a few braces. About seven tenths in value of the masonry for the draw and the Howe Truss Bridging to rest upon, is completed. The pivot pier, and north abutment to the draw, together with the three Truss Bridge piers north of the draw, are finished, except the coping and a couple of courses of masonry on the extreme northerly pier. The pile foundation for the extreme southerly pier is in, and all of the platforms and caissons for the piers not built are ready to be put in place. The iron superstructure of the draw is mostly made, and is ready to be delivered. About five-sixths of the timber for the Howe Truss Bridging is delivered.

The right of way on the road through to Long Branch has been secured and mostly paid for, and extensive station grounds purchased in the most eligible part of Long Branch.

LEHIGH AND SUSQUEHANNA DIVISION.

It proved, upon trial, to be inconvenient and, in fact, impracticable to do by contract the graduation and masonry for the second track, except at a limited number of points, from the impossibility of procuring materials for the embankments and masonry, without hauling them in the cars of the company for considerable distances and with their locomotives and train-men. Consequently, much of the work has been done by the day and under the direction of the road masters.

During the year, 7¼ miles of second track have been laid. There are now 20 miles additional ready, or nearly ready, for the rails. All permanent work on this division is charged against the lessors as a loan at seven per cent.

STEEL RAILS.

The relaying of the main tracks of the Central Division with steel rails has been continued, though more slowly than intended, owing to the failure of the makers to deliver the rails. There were 34½ miles laid and brought into use, being 80 miles in all, or more than half of the main tracks. They continue to give perfect satisfaction.

On the L. and S. Division, 16 miles of steel were laid.

COMMUNIPAW.

Work on the bulkheads, filling and dredging, has been continued at Jersey City, in Communipaw Cove, by this company, by the American Dock and Improvement Company, and by their several grantees, and much progress has been made. Everything is being carried on systematically, economically, and with the best results.

COAL SUPPLY.

The efforts of the company have been steadily directed to securing a steady, reliable supply of coal from sources within their own control, independent entirely of other companies; and also to securing proper markets for the coal transported. In both, their success has been very gratifying, and every year is likely to place this their most important business on a firmer basis. It is easy to see also that the substitution of a smaller tonnage over the entire length of the roads will give a better return and at less expense than a larger tonnage over a part only of one road.

STOCK AND BONDS.

During the year the remaining instalments on the $5,000,000 scrip stock were paid in, and after the close of the year the amount was added to the capital stock, making the whole amount $20,000,000.

In order to supply funds for the purchases of coal interests, and for the other general purposes of the company, an issue of $5,000,000 of seven per cent bonds was decided on, making the bonded debt ten millions. These bonds are due in 1902, but are convertible between November 1st, 1875, and November 1st, 1877, into stock at par. Of these bonds $1,725,000 were issued at par; the remainder will be disposed of as required.

CONTRACT WITH DEL., LACK. AND WESTERN R. R. CO.

In the postscript to the last annual report, it was announced that an agreement had been entered into on the 16th of March, for consolidating and uniting the interests of this company and those of the Delaware, Lackawanna and Western R. R. Co., and the agreement was set out in full. Subsequently it was submitted to the stockholders for approval, and with the greatest difficulty the assent of three quarters in interest was obtained. From the first it was extremely unpopular, owing mainly to distrust of the motives and management of the Delaware, Lackawanna and Western Railroad Company. Unfortunately, this distrust was justified by experience.

At the very outset of the meetings of the joint committee dissensions began. The financial condition of the Delaware, Lackawanna and Western Railroad Company was unexpectedly found to be such that an immediate issue of $3,000,000 convertible bonds by their company was demanded, and had to be acceded to. After the bonds were all sold, and proceeds expended by them, that company still showed a very large amount of liabilities. Without charging deception, it is safe to say that no such state of urgent indebtedness had been exhibited to our committee.

Nor was this all. In addition to the formal terms of the contract for merger, it is natural to suppose that the representatives of two such large interests would have some definite understanding, in advance, about the organization and general policy of the united companies. To suppose anything different is an insult to the common sense of all concerned. It was soon found, however, that the understanding on the subject of permanent organization either did not exist or was not to be recognized. A committee on organization was appointed with a prominent Lackawanna Director as Chairman. Finding the committee to be in favor of the organization proposed by the Central, he refused, for six weeks, to call a formal meeting, and only then consented with the understanding that they should disagree and be discharged—which was done. In matters of policy there was the same lack of accord. Auction sales of coal were obnoxious to the trade generally and objected to by the Central. It was understood that this was to be an open question; on the contrary the sales went on without consultation, and accelerated the fall in prices. Instant steps were to have been taken to secure the removal of the broad guage rails from the two roads. Instead, the only anxiety shown was to extend the broad guage over the Central from Elizabeth to Jersey City; and though resolutions were passed in the committee looking to the substitution of the narrow guage, the change was practically deferred to some unknown period. Annual reports to stockholders and quarterly dividends were tolerated for the present, not adopted. In fact it was soon evident to the Central Directors that it was expected that Lackawanna principles should supersede those on which the Central had been so successfully managed. Having gone into the union

however, they were most earnestly desirous to carry it out. Repeated and persistent efforts were made to reconcile matters, but without any result. The only reply to warnings that the union would be dissolved was: "You can't get out of it; you are fast." After exhausting every effort for harmony, the Central Directors decided to avail themselves of organic lack of power, and other good grounds, for annulling the contract, (which had never really gone into operation, with the exception of meetings of the Joint Committee), and the final rupture took place on the refusal of the committee to allow the regular quarterly dividend to be made in October. Then it was that, for the first time, it was discovered by our counsel that, owing to a failure to record the agreement, it was, by statute, invalid and of no effect. Though a technical ground, yet, as one from which there was no escape and which gave immediate relief, it was used in the litigation which followed, with the result of a prompt decision in the company's favor on the above ground, though on a collateral issue. The question of a re execution of the contract was then submitted to the stockholders, when 112,610 shares voted against it, while only 5,917 voted in its favor. Notice of the result was given to the Delaware, Lackawanna and Western Railroad Company, and the union finally ended so far as this company, was concerned. Litigation however, continued, and the whole matter has been taken up to the Court of Final Appeals, where it will be heard and decided at as early a day as possible. After the Central had withdrawn from the agreement by the above decisive vote, and while the matter was pending in the highest court, an attempt was made by Act of the Legislature to validate the agreement, "any law to the contrary notwithstanding." The Act was forced through, without debate and without a hearing. In the opinion of our counsel, "the Legislature can pass no law that will stand; the very law must show the contract to have been void, and the stockholders at liberty to reject or adopt it; and, if three-quarters did not agree to it, the Legislature cannot make a valid contract for the company." In this opinion any lawyer will concur.

During this unpleasant controversy the board have been united on every point. No variation of opinion has occurred, and each step taken has been fully sanctioned by the judgment of every director; and if they were unanimous in recommending the union, they were much more heartily so in their action for annulling it. It is just also to add, that it was the earnest desire of the chief executive officer of this company to retire, hoping thus to end a part of the difficulties, but the board objected unanimously to entertaining the proposal.

The damage to both companies from this controversy and litigation has been considerable. The market prices of the stocks have been materially affected, and money negotiations interfered with. Had matters gone on as originally expected, it is still thought that, even with the large floating debt of the Lackawanna, the consolidation would have been a good thing for this company. As matters turned out, however, there was no course open to, or desirable for this company, but the one pursued.

Thus ended in six months a contract meant to be perpetual. In December the contract of 1854, also meant at the time to be perpetual, but which had been openly and persistently violated by the D., L. and W. R. R. Co., was formally annulled by this company, and a final suit for heavy damages begun. The attempt at union has ended in a total division.

DIVIDENDS.

Quarterly dividends of two and a half per cent have been made, amounting in the whole to ten per cent for the year.

CONCLUSION.

The prospects for results from the business are much more favorable the present year than the past, and a handsome return on the capital is expected. All that can reasonably be expected from the general management in the superintendent department is that it should be kept up to the excellent standard of the past. No passenger injured out of the millions carried, and no serious accident of any sort, is again the report. The company are proud of their employees.

President.—JOHN TAYLOR JOHNSTON.

Directors.—John Taylor Johnston, John C. Green, Adam Norrie, Sidney Dillion, James Boorman Johnston, New York; Benjamin Williamson, Elizabeth; F. T. Frelinghuysen, Newark; Henry D. Maxwell, Easton, Pa.

Secretary and Treasurer—SAMUEL KNOX.
Superintendent and Engineer.—R. E. RICKER.
Consulting Engineer.—JAMES MOORE.

Alabama and Chattanooga Railroad.

The London *Times* says that at a meeting on the 17th of March of holders of Alabama and Chattanooga Railroad Bonds and of Alabama Gold Bonds, Lord William Hay in the chair, it was resolved to accept, in satisfaction of the coupons respectively overdue since the 1st of July, 1872, and the 1st of January, 1873, a new issue of 8 per cent currency bonds, at the rate of 82 per cent, the overdue coupons being calculated at the rate of exchange of the day. It was also decided:

"That should it be necessary to advance to the State of Alabama the sum of $250,000 currency, to enable it to complete the purchase of the railroad sold in bankruptcy, and thus to secure the said railroad for the benefit of the bondholders, the Council of Foreign Bondholders and Committee of Alabama and Chattanooga Bondholders should be authorized to make such advance on such terms and conditions and on such security as they may deem fit, and to invite the Alabama and Chattanooga bondholders to participate in such advance in proportion to their holding. At the same time the council and committee were empowered to pay all expenses and commission which may be necessary for raising the moneys to make the advance to the Government and other outlay, and to make a reduction *pro rata* on the bonds to be received for coupons in repayment of the same."

Allegheny Valley Railroad.

The annual meeting of the stockholders of this company was held in Pittsburgh on the 10th inst. The meeting was organized by calling Henry Wheeler, Esq., of Philadelphia, to the chair, and appointing N. P. Sawyer Secretary. The minutes of the last annual meeting, held February 20, 1872, were then read and approved.

The report of the President was read and approved, and ordered to be printed together with the report of the Superintendent, Chief Engineer and Treasurer.

On motion it was resolved to go into an election for a Board of Managers for the ensuing year. Messrs. Edward Greeg, D. Lands, and P. F. Howley, being duly qualified, were selected to hold the election. The election resulted in the choice of the following gentlemen as Managers: Wm. Phillips, Wm. M. Lyon, Wm. K. Nimick, J. Patton Lyon, B. F. Jones, F. E. Brunot, and James Park, Jr.

The following is the report of the President:

To the Stockholders of the Allegheny Valley Railroad Company:

GENTLEMEN—Your managers respectfully submit to you the following statements and report of the business of your railroad during 1872:

The earnings and expenses for the fiscal year ending December 31, 1872, were as follows:

The receipts were:

From freights	$1,584,317 20
From passengers	582,739 14
From express	12,000 00
From mails	22,505 20
From rents	4,353 67
From miscellaneous	33 244 12
Total	$2,239,159 33

The expenses were:

For conducting transportation	$330,846 48
For motive power	352,604 84
For maintenance of way	341,622 59
For maintenance of cars	118,971 18
For general expenses	134,430 73
Total	$1,278,475 82

It will be perceived from the above statements that the gross earnings for the year ending December 31, 1872, were $2,239,159 33.

The operating expenses for the same period were $1,278,475 82. Leaving the net earnings of your road for 1872, $960,683 51. Showing an increase over the previous year of $127,681 03.

It will be perceived that the net earnings for the year 1872 (amounting to $960,683 51) are amply sufficient to pay the annual interest on the entire bonded debt of the Allegheny Valley and Low Grade Roads, without having as yet received any income from the latter road.

The expense of working the road have been 57 1-10 per cent of the gross earnings, being an increase on last year caused principally by the unusually severity of the winter.

It will be observed that the company have been called upon to make large expenditures during the past year for the equipment and operating of your road, and for construction and maintenance of way, for the details of which you are referred to the full and satisfactory report of the General Superintendent and Chief Engineer.

The bonded debt of your company remains without material change, as set forth in the last report published by your board; for full details thereof you are referred to the reports of the

Treasurer and Auditor, which are herewith submitted. A large amount of construction work has been done along the line of the road during the past year. The work done embraces the completion of a double track, wrought-iron Linville trues bridge over the Kiskiminitis, 726 feet in length, being a substantial structure, highly creditable to the Keystone Bridge Company, which erected the bridge and superstructure; the building of a double track boiler plate bridge, of two spans, over Plum creek; important repairs upon the bridge crossing the Allegheny river at Brady's Bend; masonry, consisting of arched culverts and box culverts; grading for depots, sidings, &c.; the building and extension of passenger, freight and water stations; the replacing of trestle work with solid embankments; the erection of turn tables at Clarion bridge and South Oil City; almost the entire rebuilding of the important bridge spanning the Allegheny river at Oil City; the laying down of about eleven miles by siding connected with the main line; the distribution and laying of a large quantity of new rails, together with various other minor improvements, found to be necessary in order to add to the safety of your road.

The increasing tonnage upon your road demanding greater facilities than it is possible to provide over a single track, your manager thought proper that another track should be constructed from Pittsburg to the mouth of Red Bank, there connecting with the Low Grade road.

The additional track thus authorized has already been completed from Pittsburg to Hulton, a distance of twelve miles, and that portion of the second track extending from Hulton to Red Bank has been put under contract, and will be built as rapidly as the means of your company will permit.

The location of the Plum Creek Branch was commenced late in the summer of 1871, and completed in December of that year.

Leaving the main line of the Allegheny Valley Railroad at Verona, the route of this branch passes up the valley of Plum Creek through valuable coal fields in Penn township. The main track was completed to the first coal works and sidings laid, so that coal was regularly shipped therefrom on and after the 1st of October, 1872. The total length of the line and sidings finished is 9 3-10 miles. Located and built, in order to reach and develop valuable coal mines, this branch gives satisfactory promise of fair profits in the future upon the cost of its construction.

During the summer of 1872, it became known to your board that the Philadelphia and Erie Railroad Company were willing to dispose of a controlling interest which it held in the stock of the Oil Creek and Allegheny River Railroad Company, and had already commenced negotiations for the sale of the same to a rival company.

Impressed with the great importance of preventing this stock from passing into the possession of parties whose interests might be adverse to your company, the President immediately opened negotiations for its purchase, and on the 8th day of August, 1872, a contract was closed by which the Allegheny Valley Railroad Company became owner of a sufficient amount of this stock to give your company control of the Oil Creek and Allegheny River Railway, and it is now operated by your company.

By the purchase thus made your company is effectually protected from all prejudicial interference by rival interests in the future management of the Oil Creek and Allegheny River Railroad.

The route selected for the Low Grade starts from the Philadelphia and Erie Railroad at Driftwood, crosses the Sinnamahoning and Bennett's branch and follows along the hills on the south side of the valley, passing through Caledonia Point twenty two and one-half miles from Driftwood by a tunnel four hundred and twenty-five feet long, crosses Bennett's branch twice on Section 25, and continues along the South side of the valley to the Summit on Section 39, where it passes through the hill which forms the dividing ridge between the Susquehanna and Allegheny rivers by a tunnel 1,950 feet long. The elevation of the road bed at this point is 1,440 feet above tide level. The line connects with the Allegheny Valley at the junction of the Red Bank Creek with the Allegheny river, a distance of one hundred and ten miles from Dritwood.

There is a tunnel five hundred and five feet long at Anthony's Neck on Section 92 and over six hundred feet through Long Point on Section 101. In June, 1871, contracts were made for the graduation and masonry of the heavier sections of the work, which were commenced at once, and the remaining sections were placed under contract from time to time as the progress upon the heavier work made it available. The Summer and Fall of 1871 were very favorable for putting in the foundations of bridges.

The large amount of railroad construction going on throughout the country during the past two years made labor scarce and high priced, and much difficulty has been experienced in keeping a sufficient force upon the work. A portion of the line is also deficient of access, making it necessary to haul food, provisions, tools, &c., a distance of forty miles from the railroad stations at Mahoning, Clearfield and St. Mary's. But notwithstanding the difficulties of the position in which our contractors were placed, they have generally made good progress with their work.

On December 31st, 1872, all the masonry between the Summit and Allegheny river was completed, except at one bridge east of Brookville, which would require about three weeks to finish when the weather should be favorable. East of the Summit all foundations are in, and two months in the spring will complete the masonry. The bridges on this portion of the road are mostly framed and raised, and the material for the balance is being delivered and framed for raising as the track advances.

The track laying is now in progress, about thirty miles being already laid from the main line of the Allegheny Valley Railroad eastward. Satisfactory progress has been made upon the Summit tunnel, it being nearly ready for arching. No good building stone being found in the neighborhood of this tunnel, it became necessary to procure stone at a point some distance west of the Summit.

The prospective advantages and value of the line known as the Low Grade Road is spoken of in high terms. Your managers think that they will be ready to open that portion of your road extending from the mouth of Red Bank to New Bethlehem, a distance of twenty one miles, by the middle of April. They expect to reach Brookville, a further distance of about twenty miles, by the first of June, and the Summit tunnel, a further distance of twenty-four miles by the 1st of July, and they hope to complete the line through to Driftwood, where it connects with the Philadelphia and Erie Railroad, by the middle of September or the 1st of October, 1873.

Your managers cannot close their report without expressing satisfaction at the earnest endeavors, made by each head of department in your company's organization to discharge, to the fullest extent, the duties which they severally owe to your company. By order of the board.

W. PHILLIPS, President.

☞ Mr. George Westinghouse, Jr., of Pittsburg, inventor of the Westinghouse air brake, has just received a patent on an improved brake coupling, which is thus described: Each half of the coupling has a nozzle and socket at its inner end on and in a corresponding socket and nozzle of the next coupling, so that the half-coupling on either end of either car will couple on to any other half-coupling on the train. Spring hooks and hand levers are used on the coupling to hold the two halves together, and are duplicated in each half and arranged opposite to each other in each half of the coupling.

Washington City, Virginia Midland and Gt. Southern Railroad.

At a meeting of the stockholders of the Orange and Alexandria and the Lynchburg and Danville Railroads, in Lynchburg, on the 8th inst., Col. John S. Barbour presented a special report, setting forth that the object of the meeting was to consolidate the two roads, in accordance with the act of the Virginia Legislature, under the corporate name and style of the Virginia and North Carolina Railroad Company. In order to do this the several acts of Assembly had to be accepted. The acts referred to are four in number, and relate, respectively, to a proposed change of the corporate name of the consolidated company, to provide for a new issue of bonds by the company, and the execution of a mortgage on the road and its property to secure the same, to authorize the company to extend its road from the present northern terminus at Alexandria to a point opposite to or above the cities of Washington and Georgetown, on the Potomac river, and to allow the lands purchased by the company to be free from the liens of all other indebtedness, and to be held primarily as security for the purchase money due on same, and the proceeds of sales to be applied only to payment of the land bonds of the company.

Mr. Barbour offered a resolution to the effect that bonds of the company not exceeding $8,000,000, with a mortgage on the road, be issued for the purpose of discharging existing liens on the road and completing it, which was adopted. A resolution accepting the new name of the company, the "Washington City, Virginia Midland and Great Southern Railroad," as provided by act of Assembly, was unanimously adopted. A resolution was also passed that the company accept the act of the General Assembly of Virginia, approved February 15, 1873, entitled an act to authorize the Washington City, Virginia Midland and Great Southern Railroad Company to issue bonds to provide for the payment of the bonds and debts of the Orange, Alexandria and Manassas and Lynchburg and Danville Railroads and for other purposes.

Col. John S. Barbour was elected president of the road, with a salary of $6,000. A resolution was passed favoring the extension of the road into North Carolina by the most eligible route after the completion of the road to Danville. The following directors were elected: W. G. Cosenove, C. F. Settle, Alexandria; S. A. Coffman, Rockingham; E. C. Marshall, Fauquier; D. F. Slaughter, Culpeper; W. D. Hart, Albemarle; R. A. Cogbill, Amherst; C. M. Blackford, T. C. S. Ferguson, Lynchburg; G. T. Pace, W. T. Clark, Danville; W. E. Sims, Pittsylvania.

☞ Mr. Thomas R. Sharp, who has been since the 1st of September, 1872, the Assistant Master of Transportation of the Baltimore and Ohio Railroad, and who has been acting since the death of the late Mr. Wm. Prescott Smith as the chief officer of that department, has been elected, by the unanimous vote of the Board of Directors, Master of Transportation of the Baltimore and Ohio Railroad Company.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending March 31 are: freight, $60,498 76; passengers, $33,518 02—total, $94,011 8.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, April 19, 1873.

Stock Exchange and Money Market.

The complaint in the Money line, through the week, has been of extreme stringency, especially in the way of call loans, which have been generally quoted at from ⅛@¼ of one per cent commission, added to the regular legal rate, for the use of funds from day to day, in speculative channels, with exceptional negotiations on one or two days, as high as ⅛@¾ths of one per cent, added to the regular figure, for prompt accommodation, the demand for which has been very urgent, as a rule, chiefly for Stock Exchange purposes. The discussions, relative to the rigid enforcement, or conditional repeal of the usury laws of the State, have tended to augment the difficulties in the way of borrowers. The discount market has been very close for other than the best class of business paper, which has been quoted as rather more salable from 9@12, with undoubted railway acceptances rated from 11@15 per cent per annum. The city banks, last week, added about half a million to their specie reserve and a trifle over half a million to their legal tender hoard. Their deposits were further cut down ¾ths of a million, and their loan and discount averages reduced more than two millions. The banks are still deficient in their obligatory reserve, the last statement showing that they had $3,025,300 less than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of about half a million to its coin balance, and about ⅛th of a million to its currency reserve. Its currency reserves at the close of the week were $15,970,663; and its coin hoard, $41,275,280. The later call loan negotiations indicated renewed pressure, and a recurrence to extreme rates, for prompt aid.

The city banks, in their latest return, show an increase of $553,300 in legal tender notes, and an increase of $469,900 in their specie, with a reduction of $787,800 in their deposits, also a contraction of $2,017,100 in their loan and discount averages, and of $1,400, in their item of circulation. The city bank exchanges, last week, averaged 109¾ millions.

The clearances of the banks averaged through the week 109¾ millions a day, and amounted in the aggregate, for the whole week, to $659,075,392 as against $780,498,464 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $130,676 and its coin reserve $507,513 as the result of the week's business.

The Treasury Department reported its cash balances on Tuesday morning as follows; Currency, $2,137,238; special deposit of legal tenders for the redemption of certificates of deposit, $25,240,000; coin, $70,746,790 00. Coin certificates outstanding, $23,306,100. Legal tenders outstanding, $358,400,308.

The specie reserve of the city banks according to the latest return is $16,134,300, against $19,382,400 same time last year. The city bank deposits are now $186,899,200 against $193,287,100, week ending April 13, 1872. The legal tender reserve amounts to $35,493,800, against $36,828,800 same time last year. The circulation now stands at $27,714,400 against $27,987,000 same time last year. The loans are now $271,516,900 against $274,354,300 at this date last year.

The coin reserve of the city banks is now about 16⅛ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 35½ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 186⅞ millions, against 247½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3,413,479 of currency, and $3,623,475 of gold, the latter including $2,482,000 from customs; and disbursed $3,182,823 of currency and $3,115,961 of gold, the latter embracing $323,760 of coin interest.

Government revenues yielded moderately last week. The excises yielded within the week nearly two millions, and thus far in the current fiscal year beginning with July 1, 1872, $90,314,682. The customs at the port of New York, for the week, were $2,362,159, and at the outports, about $800,000 more, in coin or coin certificates.

Gold has fluctuated widely, having, sold up to 119¼, and down to 117½, on an active movement, mainly speculative. The later dealings indicated much less confidence on the part of speculators for a rise. The export drain was lighter, and the customs call quite moderate. The range of the price during the week has been from 117⅛@119¼ and the closing quotation on Wednesday was 117⅛ against 118⅛ on Wednesday of the preceding week. The specie outflow last week, was $912,314. The Gold Exchange Bank clearances have averaged about 95 millions per day during the week.

The customs demand for Gold last week, averaged $405 000 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $25,125, and thus far in 1873 have been $1,055,631 against $575,316 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $108,340,301 against $127,322,799 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $61,642,564, against $62,480,515 during the same time in 1871-2.

The export drain of specie was $912,314 last week, against $471,023 same week preceding year. The shipments since July 1, 1872, have been $51,686,674 against $28,302,403 during the same portion of 1871.

Foreign exchange has shown more animation and, toward the close, more firmness. Prime bills have been offered with less urgency. Bankers' sixty day bills on London closed at 107⅛@107¾; sight bills on London, at 108¼@108⅛. The week's exports of Domestic Produce have been to the currency value of $5,421,753.

Notwithstanding the extreme severity of the Money pressure, Government securities have been generally quite firm as to values, on a fairly active business, though toward the close there was considerable depression apparent, due, in part, to the decline in Gold, and the panicky temper of the general Stock market.

Government proposes, under the April programme of the Treasury Department, to sell during the month Gold as follows: Thursday, April 24, $1,500,000. And to buy in Five-Twenty bonds, as follows; Wednesday, April 23, $500,000.

Messrs. Jay Cooke & Co. are now drawing exchange on all leading European cities—including cable transfers on Vienna direct.

U. S. sixes of 1881 closed on Wednesday of this week at 118⅞@119⅛; U. S. Five-Twenties of 1862, 116½@116¾; U. S. Five-Twenties of 1864 at 116½@116¾; U. S. Five-Twenties of 1865, 118⅛@119; U. S. Five-Twenties of 1865 consolidated 115¾@116¼; U. S. Five Twenties of 1867, 117¾@117⅞; U. S. Five-Twenties of 1868, 115½@116; U. S. Ten-forties at 112¼@112¾; U. S. Fives of 1881 (Funding Loan) 114@115; Six per cent. currency Sixes from 113½@113¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 2.	April 9.	April 16.
Consols	92⅞	93¼	93⅛
U. S. 5-20s, 1865	94⅛	94¼	94¼
" 1867	93⅝	93⅝	93⅝
" 10-40s	89¼	89	89¼
New Fives of 1881	91	90¾	90⅞
Erie	51¾	51⅛	51¼

State bonds have been moderately sought after at variable prices, closing rather more steadily.

Railway Mortgages have been in fair investment demand, and quite steady, as a rule. Central Pa-

cific Sixes have been in request closing firmly at from 102½@103. Chesapeake and Ohio Sixes have been selling moderately at 87½ and interest. Western Pacific Sixes have been in demand at 94¾@95. The Northern Pacific 7-30 Loan has been inquired for at par and interest.

A brisk movement has been noted in Railway and Miscellaneous share property, but at very irregular rates, closing heavily, influenced by the extreme Money pressure.

The Metal business has been devoid of animation. A light trade has been noted in Copper at about former figures; sales, 50,000 lbs. Lake at 34c.: 59 tons English at 30½c. for best selected. Iron has been generally very quiet, with Scotch Pig quoted much depressed; sales, 300 tons Eglinton Pig, at $52; 150 tons Glengarnock at $53 50@$54. We quote: Glengarnock Pig at $53 50@$54; Eglinton do. at $52; Coltness at $61 50@$62 50; No. 1 American Pig at $50; No. 2 do. at $45@$48; Wrought Scrap at $55@$56; English rails at $70@$71, gold. American Rails at Works, $80@$85; Russia Sheet, 17c. Pig lead dull at 6⅝c.@6¾c. gold, for ordinary foreign; 100 tons Soft Spanish sold on private terms. Silesian Spelter quiet at 7c., gold. Pig-tin quite dull with Straits quoted at 33c., and English at 32½c. gold. Tin Plates have been in slack request, and rather weak in price, influenced, in part, by the stringency in the money line, though stocks are comparatively limited; 500 boxes Charcoal sold at $12. Charcoal Plates quoted here at $12@$12 25; Charcoal Terne, $10 50@$11; Coke, $10@$10 50; Coke Terne, $8 75@9 75, gold, per box. Zinc dull at 10¾c.@11¼c. per lb.

The general markets have shown less activity, with considerable irregularity as to values. Cotton, Flour, Wheat, Wool, and Petroleum closed in favor of buyers. Corn, Oats, Pork, Lard, Whisky, and Naval Stores, firmer. Middling upland cotton, closed on Wednesday at 19½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,253,153 bales, against 2,502,436 bales same time in the preceding year; exports 1,993,133 bales against 1,650,888 bales in the previous year; stock at the ports at latest dates, 503,306 bales against 355,272 bales same date 1871.

Foreign goods have attracted less attention, though buyers have had any existing advantages as to values. The week's imports amounted to $6,271,358, including $1,483,656 of dry goods.

Ocean freights have been moderately active, but rates have shown less firmness.

At the Live Stock Markets, Beeves have been in more request at from 10@14½ cts. Veals at 8@11½ cts.; Sheep at from 5⅞@8¼ cts.; Swine at 5¾@6¼ cts. per lb., all live weight. The week's receipts were 7,167 Beeves, 1,720 Veal Calves, 14,623 Sheep and Lambs, and 43,851 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Tot'l Jan. '73.	$504,381 35	$76,117 90	$580,499 25
Total actual earn'gs, Jan., 1872	$560,904 03	$76,525 64	$637,429 67

Chesapeake and Ohio Railroad.

THE CHESAPEAKE AND OHIO RAILROAD COMPANY control and operate the GRAND CENTRAL TRUNK LINE OF RAILROAD, now built and in running order between Richmond, a tidewater port on the James River indentation of the Chesapeake Bay, and Huntington on the Ohio River—a distance of 427 miles.

It possesses peculiar advantages for through transportation of Western products for consumption and shipment along the Eastern seaboard States.

It has also special advantages as a very direct, attractive and speedy Passenger Line between a large portion of the West and Southwestern cities and Washington, Baltimore, Philadelphia and New York.

It is admirably situated, also, to become a cheap and favored route for both emigrants and merchandize between Europe and the Western States direct. Vessels of the largest class will be able to land alongside the wharves at its deep-water terminus and transfer their passengers and cargoes directly from shipboard to the cars, thus avoiding the annoyance, expenses and delays incident to other routes.

The present terminus and wharves at Richmond afford abundant accommodation for the large general freight and mineral traffic of the Road, which can be transferred to all but the largest class of ocean-going vessels. Ships drawing from 14 to 18 feet of water can always reach the company's docks and proceed to sea without the aid of a pilot. The coal and coastwise freight transfer will be done at this point.

The company have authority for, and have in contemplation, the extension of the line eastward to a point on the deep-waters of the Chesapeake Bay, not far distant from the capes at its entrance, where safe anchorage and a sufficient depth of water to float the largest ship afloat can always be found. The "Allan" Line of Steamships is already running from Liverpool to the Chesapeake; and there is reason to believe that as soon as this deep water extension of the Chesapeake and Ohio line can be constructed, a second line will be ready to seek its wharves, so as to establish a direct through line of shipment between European ports and the Western States.

The "Old Dominion" Line of Steamships, leaving New York and Richmond on alternate days, makes close connections with the Chesapeake and Ohio Railroad. The trip between the two ports is made in 40 hours; the vessels are sidewheelers, and admirably kept. This affords a popular and growing route for travelers, especially tourists and health seekers, and is by far the cheapest and best route for freights from the Southwest.

At Richmond connection is also made with the railroads leading North and Northeast, via the Richmond and Fredericksburg Railroad to Alexandria and Washington, &c.; and also with the railroad lines leading south of Petersburg, Norfolk, Wilmington, Charlotte, Augusta, Charleston, Savannah, Macon, &c.

At Gordonsville, by means of the Orange and Alexandria Railroad, regular connections are made for Washington, Baltimore, Philadelphia and New York by continuous all rail routes. Gordonsville is 76 miles west of Richmond, and through tickets are sold at all principal points to Gordonsville, Richmond or White Sulphur Springs, via Washington City. Passengers leaving New York in the morning can take parlor cars at Jersey City, arriving at White Sulphur Springs the following morning; or they can take sleeping cars to Washington City, and comfortable cars thence to White Sulphur, reaching there the following evening, 24 hours ride from New York.

Connections at the western terminus, at Huntington, are made with regular packet Lines of steamers to Ironton, Portsmouth and Cincinnati; and through them with the U. S. mail line of steamers to Louisville, or the short line of Railroad leading Southwest and Northwest. Excellent passenger accommodations are always to be found on board these steamers. The trip to Cincinnati, 175 miles, is made downward in 15 hours, and the upward trip in 24 to 30 hours. Boats stopping at Huntington on their way to or from New Orleans, Saint Louis, Cairo or intermediate points, can easily transfer freights bound in either direction.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 5, at 313,788 tons, and for the coal year at 3,722,278 tons, against 3,697,759 tons to corresponding time last year, being an increase of 24,519 tons. The bituminous tonnage for the week is 43,044 tons, and for the year 420,122 tons, giving a total of all kinds for the week of 356,832 tons, and for the year 4,142,400, being an increase as against production to same time last year of 89,779 tons.

☞ The revenue of the main stem and branches of the Baltimore and Ohio Railroad Company for the month of March, 1872, was $1,000,869 16, and for the same month in 1873, $1,264,652 29, showing an increase of $263,783 13.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, April 18, 1873.

The SIX PER CENT. GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, being secured by a First Mortgage on a COMPLETED road—which is one of the GREAT EAST AND WEST TRUNK LINES, commanding a large through business, and which, from the immense Mineral, Agricultural, and other valuable resources of the country it traverses, is assured of a very remunerative local traffic—are among the most substantial and satisfactory investment securities in the market; and, at the present price, 87½ and accrued interest, yield a liberal rate of interest on their cost.

They are in denominations of $100, $500, and $1,000, coupon and registered; principal and interest payable in gold coin in New York; interest May and November.

We also buy and sell at current market rates, the WESTERN PACIFIC SIX PER CENT. GOLD BONDS originally negotiated by us, and now quoted at the Stock Exchange, and widely known as favorite securities in the principal money market. Coupon bonds of $1,000; principal and interest payable in gold coin in New York; interest January and July. Price to-day is 94¾@95.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, receive deposits, on which we allow interest, make collections, and do a general banking business.

FISK & HATCH.

New York, West Shore & Chicago Railway.

This company includes a combination of the New York and Fort Lee, the Hudson West Shore, and the West Shore Hudson Railroads, and when completed will be a competing line with the New York Central and Hudson River Railroad. The engineer, in his report of the proposed route and plan, divided the road into three divisions—Eastern, Middle and Western. The Eastern Division, from Jersey City to Catskill, a distance of 110 miles, is on the west shore of the Hudson. The Middle Division, from Catskill to Syracuse, is 163 miles in length. At the former place the line and the river diverge, the route of the railway continuing in almost a direct line to the Mohawk at Schenectady, thence the route lies along the south side of the valley of the Mohawk, and of the Erie Canal to Utica; and from this place it continues in nearly a direct westerly course to Syracuse. The Western Division extends from Syracuse to the International Bridge, at Buffalo, the distance being 147 miles. From Syracuse the line continues almost direct to Buffalo; the Erie Canal and the New York Central Railroad diverging considerably northward at Rochester. The following is an estimate of the cost of constructing the road, on the route described, the estimate contemplating a double track railroad of four feet eight and a half inch gauge:

Eastern Division (110 miles)—For completing graduation, bridges and superstructure, from Jersey City Ferry to Catskill	$7,655,000
Middle Division (163 miles)	10,106,000
Western Division (147 miles)	8,452,500
Total for the 420 miles	$29,213,500
Average per mile	$62,413 19

It is claimed that the new road will shorten the distance between New York and Buffalo 24 miles as compared with the New York Central and Hudson River Railroad. A tunnel under the grounds of the Military Academy at West Point is under construction by the company.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR BAGGAGE STOLEN FROM STATION HOUSE.

The facts in the recent case of Bartholomew *vs.* St. Louis, Jacksonville and Chicago Railroad Company, (53 Ill., 227), are fully and clearly stated in the following opinion by—

WALKER, J.—It appears from the record in this case, that Jennie E. Bartholomew, one of the plaintiffs in error, became a passenger on the road of defendants in error, form Alton to Delhi, a station on the road, and arrived, with her baggage, at the latter place. Upon her arrival, no teams or means being at hand to carry her and her baggage to her father's, a distance of three miles in the country, her trunk was left at the depot until it should be called for and taken away. The trunk was placed in the depot, and during the night after its arrival, the station house was entered by burglars, who broke open her trunk and took therefrom several articles which it contained, and also some tickets and other articles from the company. It appears that Mrs. Bartholomew arrived at the depot late in the evening, which rendered it inconvenient, if not altogether impracticable, to send for and get her trunk from the depot before the next morning. On these facts the jury, under the instructions, found for defendants in error.

It was held, in the cases of Richards *vs.* The Michigan Southern and Northern Indiana R. R. Co., 20 Ill., 404, and Porter *vs.* The Chicago and Rock Island R. R. Co., *ib.*, 407, that when a railroad transports goods and they reach their destination, the liability of the company ceases, as common carriers, when they are unloaded, and placed safely and securely in their warehouse, under the charge of competent and careful servants, ready to be delivered, and the liability of warehousemen for hire attaches. In the Chicago and Alton R. R. Co. *vs.* Scott, 42 Ill., 132, it was said, that to change the relation or duty of the company, from that of a common carrier to that of a warehouseman, the warehouse must be a safe and secure place, in which the goods are stored.

These cases all related to freight in its ordinary sense, as distinguished from baggage, which is usually taken with, and attends persons while traveling. But no difference is perceived between baggage given in charge of the company, and ordinary freight. In each case the company are paid to transport the property. On freight the money is paid directly simply for its transportation, while with baggage, the price paid for its transportation is included in the charge for the ticket the owner purchases for his transportation. In each case the company become equally liable for its safe carriage and delivery, and are under the same responsibility for loss or injury it may sustain. It is true the different kinds of property are carried on different trains, but that can not matter, as their liability is in all respects the same. There being no difference in the duty or liability of the carrier in the two cases, they should be governed by the same rules.

When defendants in error, therefore, transported the trunk to Delhi, to relieve themselves from the liability as common carriers, they should have stored the trunk in a safe and secure warehouse, and then the new relation of a warehouseman would have attached. But the burden of proof is upon the common carrier, to show that the property was stored in a safe and secure warehouse, and until this appears, the company can not be exonerated from the liability of a common carrier. In the case of the Chicago, Rock Island and Pacific Railroad Co. *vs.* Fairclough, 52 Ill., 106, it was held, that where the railroad company placed baggage in a room of their depot and a pane of glass in one of the windows of the room which was without blinds, was only held in its place by tacks, and burglars removed the glass and made an entrance through the opening, the baggage was not safely stored, and the company were liable. In the case at bar, for aught that appears, the depot in which this trunk was stored, may have been entirely insecure against the burglars. The instructions given for defendants in error entirely ignore the requirement that the trunk should have been stored in a safe and secure warehouse to exonerate the company, and in this they were erroneous, and should have been refused or modified before they were given. The judgment of the court below must be reversed and the cause remanded.

Judgment reversed.

Chesapeake and Ohio Railroad.

As many of our shippers are anxious to know how freights are transferred at Huntington from the boats to the cars, we have interviewed a party just from there, who gives the following information on the subject: The company's depot is situated at the top of the bank or levee. At the water's edge they have a fine wharf-boat. From the depot to the wharf-boat they have two tracks, on which they run two cars of about 12,000 pounds capacity each. The motive power is a double steam engine located in the basement of the depot, so constructed that both cars can be used at once or separately, as required; time, from water's edge (at lowest stage) to depot, one minute. A few days since two hundred barrels of flour were taken from the boat and loaded in the cars in fifteen minutes. They propose to transfer all freight the day it arrives. The new schedule for freights, that took effect on the 1st of April, is as follows: Leaving Cincinnati every evening at four o'clock, by either steamer Fleetwood or Potomac; through freight train leaves Huntington next day at 12 M., arriving at Richmond, Va., at 1:20 A. M., the second day; time from Cincinnati to Richmond, fifty-eight hours. At the latter point they make close connections with all lines South.

We understand it is the determination of the company to make this the popular freight route to all coast points as far South as Savannah.—*Cin. Price Current.*

Canada Southern Railway.

This company has applied to the New York Stock Exchange to have its first mortgage bonds put on the regular call, and has made the following official statement:

Organized under charter from the Province of Ontario, Dominion of Canada. Length of main line, from Fort Erie (opposite Buffalo) to Amherstburgh on the Detroit River, all of which is laid with steel rails 60 pounds to the yard, 229 miles; length of St. Clair Branch, from St. Thomas (on the main line) to Mooretown on the St. Clair River opposite the town of St. Clair, Mich., 63 miles; Canada Southern, proper, 292 miles. In addition to the above this company owns a controlling interest in the capital stock of the Toledo, Canada Southern and Detroit Railway Company, running from Toledo, Ohio, to Detroit, Mich., 56 miles. This company also owns the majority of the capital stock of the Michigan Midland and Canada Southern Railway Company, running from St. Clair, Mich., west to Ridgeway, 14 miles. Total 362 miles. The maximum grades on the above 362 miles of road do not exceed 15 feet to the mile, and 96 per cent. of the line is straight. This company has also leased the Erie and Niagara Railway Company, running from Fort Erie, opposite Buffalo, via Niagara Falls, to Niagara City, at the mouth of the Niagara River, on Lake Ontario, 32 miles. Total road owned, controlled and leased, 394 miles. The whole of the above will be opened on the 1st of May for local business, and on the 1st of June for through traffic, via Buffalo, Toledo and Detroit. The first and only mortgage sinking-fund bonds now issued amount to $8,760,000, the authorized amount as per charter of $30,000 per mile on 292 miles of road; principal and interest payable in gold; dated January 2, 1871; due January 1, 1906; interest 7 per cent. per annum, payable January 1 and July 1 each year at the Union Trust Company in New York, or at the company's agencies in London or Frankfort. All the bonds, both registered and coupon, are of the denomination of $1,000 each; and at the option of the holder the coupon bonds are, at any time when the transfer books are open, convertible into registered bonds. The coupon bonds originally issued are numbered from 1 to 8,200 inclusive. The registered bonds from 1 to 560 inclusive. But changes have been made by conversion of coupon into registered since.

Trustees—Wm. L. Scott, of Erie, Pa., Kenyon Cox, of New York.

Capital stock authorized (shares $100 each), $10,000,000; do. issued, $8,000,000; do. unissued, $2,000,000.

Officers—President, William Courtright, No. 13 William street, New York; Treasurer, M. H. Taylor, St. Thomas, Canada; Secretary, Nicol Kingsmill, Toronto, Canada; Assistant Treasurer, Kenyon Cox, No. 31 Wall street, New York; Transfer Agents, Kenyon Cox & Co., No. 31 Wall street, New York.

Directors—M. Courtright, Erie, Pa.; John F. Tracy, Chicago, Ill.; Sidney Dillon, New York; Wm. A. Thomson, Queenston, Canada; Wm. L. Scott, Erie, Pa.; Daniel Drew, New York; John Ross, New York; O. S. Chapman, Canton, Mass.; Benj. F. Ham, New York.

The New York and Long Island Bridge.

The work on this bridge has been commenced under the direction of Mr. Isaac D. Coleman, engineer of the company. The workmen have broken ground at Long Island City, on the line of Franklyn avenue, between Catharine and Crescent streets, for the foundation and retaining walls. This bridge commences on the New York side at Seventy-seventh street and Third avenue, running parallel with Seventy-seventh street on its south side, over the west channel of the East River, across Blackwell's Island and thence over the east channel of said river at First avenue, to Franklyn avenue on the Long Island side. This bridge, as located, will be 9,500 feet in length, and have an elevation over the East River so as to give a clear space of 125 feet above high water. Its crossing upon the island will be between the Workhouse and the Insane Asylum. The spans over each of the channels will be 720 feet, with an inter-immediate span over the island of 560 feet. It will be 73 feet 6 inches in width, accommodating a double-track railway, a carriage way of 24 feet and three footwalks on an aggregate width of 20 feet. There will be two towers on the island and one on each side of the river. These towers will be 206 feet high above high water at the point of supporting the cables. the probable cost of this great undertaking will be from three to five millions of dollars. The grade from Third avenue to the river and from the river to Crescent street, on the Long Island side, will

be 3 feet 3 inches in 100 feet. The towers and anchor piers will have a solid rock foundation. The shortness of the spans over the channels and the island, which are secured by the towers on the island, renders it more feasible and gives it greater advantages than any other location, for a permanent and durable bridge, than has as yet been named.

☞ The Baldwin Locomotive Works of Philadelphia, Penn., has passed from under the control of Mr. Matthew Baird, the distinguished head of the late firm of M. Baird & Co., into the exclusive possession of the other members of the firm, Messrs. Geo. Burham, C. T. Parry, E. H. Williams, W. P. Henszey and Edward Longstreth, by their purchase of Mr. Baird's interest. The partnership expired by limitation and was dissolved on the 8th inst. The style of the firm now is: Burnham, Parry, Williams & Co., and the present firm publish by card that they are authorized to liquidate the affairs of the late firm.

☞ The coal tonnage of the Columbus and Hocking Valley Railroad for the two weeks ending March 31, was 86,740 tons; earnings of the company for the same time, $48,336 16. The coal tonnage for the month was 78,032 tons; earnings, $95,793 85.

FAIRBANKS' SCALES

MANUFACTURED BY

E. & T. Fairbanks & Co.

FACTORY ESTABLISHED 1830.

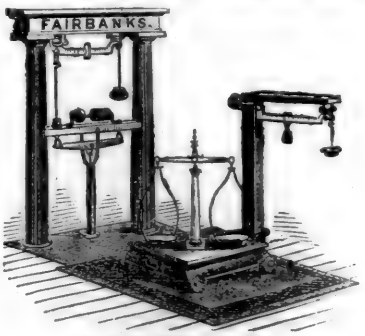
and these *Standard Scales* still manufactured only by the *original inventors.*

R. R. TRACK, HAY, COAL SCALES.

SCALES

For Rolling Mills, Furnaces, Foundries, Miners' Use.

SCALES



For Stores, Mills and Wharves.

SCALES

For Elevators and Grain Warehouses.

SCALES

For Farmers, Butchers, Druggists, &c., &c.

CAUTION.

The well-earned reputation of our Scales has induced the makers of imperfect and worthless balances to offer them as "Fairbanks' Scales," and purchasers have thereby, in many instances, been subjected to fraud and imposition.

If such makers were capable of constructing good Scales they would have no occasion to borrow our name.

BUY ONLY THE GENUINE

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler; steam is let on through the hose B; water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the Steam Water Station Company,

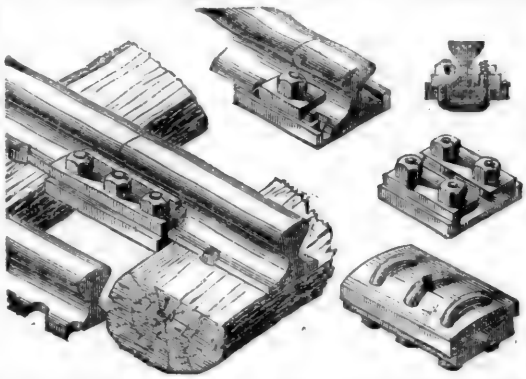
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

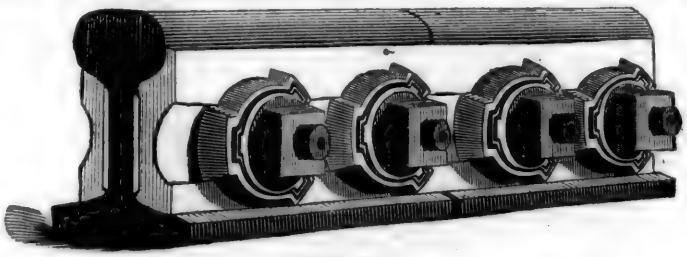
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Clev., Col., Cin. and Ind. R. R.

The injunction procured by the stockholders of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad, deferring indefinitely the ratification of the lease of the road to the Atlantic and Great Western Railway, has been supplemented by a legislative enactment intended to further protect the stockholders. The new law is thus summarized in a letter from Cleveland:—

The bill provides that no proposed purchase, lease or arrangement between the managers of any two railroad companies shall be perfected without the assent of the holders of at least two-thirds of the stock of the company whose road is to be leased; and stipulates that "the rental reserved and secured for said leased road shall be equal to at least the net earnings of such leased road for the fiscal year next preceding the one in which said lease is made." It also enacts that stockholders refusing assent to the lease, &c., if the same be carried, shall be entitled "to demand and receive from such lessee or lessees, previous to such lease, purchase or arrangement being consummated, the average market value of their stock for six months next preceding the day of the meeting of the companies at which said lease is approved as aforesaid on the surrender of their stock." Provision is also made for determining the market value of such stock in cases where the parties cannot mutually agree upon the price. The fourth section requires the lessees to give the stockholders of the road leased "full and adequate security for the payment of rental and for the preservation of the property of the lessor in good condition," &c. And, finally, it is provided that any railroad corporation organized prior to to the present constitution, and leasing its line under this act, shall thereby forfeit and lose the special privileges contained in its original charter, and be held to be recognized under the provisions of the present constitution.

A new Route from New York to the South.

The Chestertown (Md.) *Transcript* says that last week representatives of the New Jersey Southern Railroad were in Kent county, Maryland, with representatives of the Baltimore and Ohio, looking after the interests of the new through route from New York to Washington, via the Peninsula, and then adds:

The result of this conference has made the completion of the railroad through our county to the Bay Shore a fixed fact, being one link in the through route from New York to Baltimore. The plan is as follows: By steamer from New York to Sandy Hook, 28 miles; then by rail across the State of New Jersey to a point opposite Bombay Hook, on the Delaware Bay; thence by steamer across the Delaware; thence through Delaware by rail to Massey's Cross Roads, in this country, and thence by Kent County Railroad to the Chesapeake at Rock Hall or Gale's; thence by boat to North Point, and from there to Baltimore. One of the steamers to ply between New York city and Sandy Hook, the Long Branch, has already made her trial trip. The road from Bombay Hook to Massey's is under contract, to be completed by August 1st, and the Kent county line to the bay has doubtless been put under contract before this goes to press. It is designed to carry the entire trains across the Delaware and Chesapeake Bays. If the Gale terminus on our bay is selected it will be with a view to a through passenger travel; if the Rock Hall terminus, with a special reference to a through freight line. The chances all favor the building of the road from Worton Station direct to the point selected on the bay. In that event the road from Worton to Chestertown will only continue to be used as a local branch.

The Puget Sound Extension of the Northern Pacific Railroad.

The great effort now being put forth by the Northern Pacific Company to extend its road to Puget's Sound will greatly advance the commercial interests of the whole Pacific belt. The arrangements recently made by its managers, by which a force has already been set to work connecting the line already completed with Puget Sound, the entire Oregon Railroad system, and the navigable waters of the Columbia River, will also throw open the exhaustless mineral resources of Washington Territory to California and Oregon, and greatly stimulate the settlement of this whole section.

The finest and most abundant coal deposit on the Pacific Coast is found along the Eastern shore of Puget Sound, and it is said to extend from the Columbia River to Bellingham Bay and British Columbia, outcropping in veins from two to fifteen feet in thickness. The seams have been successfully worked for several years, with at present an annual yield of about 90,000 tons, nearly as hard as anthracite, and found by the San Francisco and China mail steamers suitable for their use. The opening of this coal trade with Puget Sound by railway must furnish great facilities for manufacturers on the Pacific Slope, and give a great impetus to all industrial pursuits. As the new tributary of the Northern Pacific will strike into the very heart of the vast "forest region" skirting the waters of Puget Sound, and abounding in trees

"Fit to be the mast of some tall ammiral,"

with coal and iron at hand in in profligate abundance, it is easy to see that Washington Territory has a magnificent opportunity of carving out for herself a great destiny as a ship-building and maritime State. The fact that it is 1,000

miles nearer from Liverpool or New York, in our continental transit to Japan, by the ports of Oregon and Washington than by the San Francisco route, augments the advantages of the former, and, when the soil and climate are considered, make the vicinity of Puget Sound and the Columbia Valley one of the most inviting homes to be found by the immigrant in the New World.—*Times Editorial.*

New York and Delaware Railway.

Articles of Association of the New York and Delaware Railway were filled at Trenton N. J., on the 19th inst. in the Secretary of State's office, The proposed road is to run from the city of New Brunswick, in Middlesex County, to a point on the Hudson River, within the township of Weehawken, in the county of Hudson. The length of the road will be thirty-two miles, and the capital stock $325,000, in shares of $100 each. The following named persons are the directors: David P. Patterson, Manning F. Knapp, Ashbel Green, Cornelius S. Blauvelt, Wm. S. Banta, John J. Anderson, of Bergen County, New Jersey; E. Boudinot Colt, of Passaic; John M. Courtenay, Wm. Bond, Henry M. Alexander, and Leonvale T. Guthrie, of the State of New York, and Alden Ellis, of Chicago. Subscriptions of stock then followed, and an affidavit that they are made, and that said road is intended to be built in good faith.

Cleveland, Columbus, Cincinnati and Indianapolis Railway.

The earnings of this road for the years ending December 31, 1871 and 1872, compare as follows:

	1871.	1872.
From passengers....	$797,917 49	$810,708 64

	$2,587,896 12	$3,193,644 84
Net earnings.....	$1,330,887 93	$1,379,526 01
Interest and taxes...	325,350 63	327,565 82
Balance applicable to dividends	$1,005,537 30	$1,051,960 19
Dividends—two of 3½ per ct. each.	1,012,312 00	
Surplus for the year 1872		$39,648 19
Add surplus December 31, 1871....		270,763 82
Surplus December 31, 1872.....		$310,412 01

Compared with the previous year the gross earnings of 1872 show an increase of $654,386 80; with an increase in working expenses of $605,748 72—making an increase in net earnings of $48,638 08. Deducting interest and taxes, the net income shows an increase of $46,722 89. The President in his report says:

During the year the board of directors sold, in pursuance of authority of the stockholders, the remainder of the unissued capital stock. Amount realized from capital stock has been—

From February installment, on increase of capital stock authorized in 1871.....	$408,425 00
From sales of 11,560 shares during the year, at the rate of about 90.3 per cent. on the par value.....	1,043,913 23
	$1,452,338 23

The earnings for 1872 exceed those of 1871 16.72 per cent, and the expenses for the same period were increased 23.4 per cent.

The increased percentage of expenses is accounted for by the high price of material and the greatly improved condition of the track.

The tonnage and freight earnings for 1871 and 1872 compare as follows:

EASTWARD.

	Tons.	Earnings.
1871.....	815,516	$1,983,731 22
1872.....	1,045,068	2,410,170 76

Increase in tonnage, 28.15 per ct.; increase in earnings, 21.49 per ct.

WESTWARD.

	Tons.	Earnings.
1871.....	362,141	$889 804 51
1872.....	399,285	1,029,829 15

Increase in tonnage, 10.26 per ct.; increase in earnings, 15.74 per ct.

Total increase freight tonnage, 266,696.446 tons, or 22.65 per ct. Total increase freight earnings $566,464 17, or 19.71 per ct.

By comparison with four previous years, the growth of freight traffic is clearly shown, the number of miles of railway operated being the same each year:

Increase of tonnage over	1871...	22.65 per cent.
" " "	1870...	54.34 "
" " "	1869...	74.97 "
" " "	1868...	129.86 "

Since 1868 the rates of freight transportation have steadily decreased. The benefits of such reduction in rates have *all* been received by the public, as the following statement will show. To provide equipment and facilities to move the greatly increased traffic, a large addition to the capital stock has been made, and the rate of dividend has *only* been maintained.

The average rate per ton per mile in 1868 was 1.937 cents.

The average rate per ton per mile in 1872 was 1.342 cents.

Had the rate been the same in 1872 as in 1868, the *increase* in net earnings on freight would have been $1,524,788 20, showing that the public received ten per cent on your capital while you only received seven.

About one third of the railway is now laid with good steel rail, and your property has been very much improved, and, notwithstanding the severity of the present winter, is now, in its entire extent, in good condition, which will enable the officers to accomplish favorable results during the coming year; and the position your railway now occupies is such as to give it a full share of the freight business of the country.

The constantly increasing traffic calls for an increase of equipment, and many additions to station facilities and side tracks.

Contracts have been made for six locomotives, to be delivered in March and April, 1873; and it is believed that the rolling stock of the company should be further increased by the addition, during 1873, of ten more locomotives, six hundred coal and platform cars, one hundred stock cars, and three hundred box freight cars.

The rate of mileage paid on cars interchanged with other railways, or used by the company belonging to fast freight corporations, is so high that, at all times, the company should own sufficient equipment for the business on its railway, thereby securing full reciprocity when using cars of other companies, by receiving revenue for its cars while abroad.

The Indianapolis and St. Louis Railroad Company (of which this company owns one-half the capital stock) has earned nearly $10,000 per mile during the past year. The net earnings since its Railway opened for business have been sufficient to pay seven per cent on its share capital; but, instead of dividing to the stockholders, the board of directors of that company have expended the surplus in additions to its rolling stock and other permanent improvements.

The Cincinnati and Springfield Railway was opened for business July 1st last, although at that time not fully completed for a large traffic. This company find it a very valuable line, not only as a feeder, but also in the more important item of giving it an independent entry into Cincinnati, and placing the important cities of Dayton and Springfield on the main line between Cincinnati and Cleveland. It is believed that its importance to the company, as well as its intrinsic value, will increase yearly.

The Lake Shore and Tuscarawas Valley Railway was completed during the year, and has already brought a large amount of coal to your railway at Grafton, and, when the miners get fairly at work, after the present strike, will offer an amount of coal for shipment to Cleveland, which with the large amount of coal coming from the Hocking Valley, Straitsville and Shawnee districts, will fully employ all the dock facilities at Cleveland this company can command.

The board take pleasure in acknowledging the industry, fidelity and capacity with which the railway has been managed, during the past year by the several executive officers and their subordinates in the respective departments.

The company have 118 locomotives, 41 passenger, 6 sleeping, 13 baggage, 3 U. S. postal, 1 mail, 1 directors', 1 paymaster's, 1711 box, 239 stock, 493 flat, 580 coal and 52 freight train caboose cars. 21 locomotives were added during the year, and 1 broken up; and 19 were changed from wood to coal burners. The company now have 86 coal burning and 32 wood burning.

Sixteen locomotives and 7 passenger cars were purchased, and 8 passenger, 6 baggage, 2 U. S. postal, 100 box, 100 stock, 100 coal, and 7 caboose cars built by the company for the Cincinnati and Springfield Railway.

The total mileage for the year was as follows: passenger trains, 744,307; freight trains, 2,986,590; construction and repairs, 147,630; fuel trains, 98,630—total, 3,877,157, against 3,270,327 in 1871—an increase of 606,830, or 18.6 per cent. The cost per mile run for repairs (including the expense of changing wood to coal burners) was 4.29 cents. The amount paid for increase to locomotive equipment was $247,310 90. Cost for addition to passenger equipment, $28,649 04; do. for new freight car equipment, $430,933 95.

There was paid during the year for foreign car service—to the Empire Line, $30,273 86; to the Merchants' Dispatch Transportation Company, $22,200 89; to the Union Star Line, $1,889 65; and individual cars, $1,722 59—leaving the balance for car service against the company, $54,616 36 at the close of the year.

The total tonnage moved in 1872 was 1,444,352 tons, against 1,177,657 tons in 1871—an increase of 266,696 tons, or 22.65 per cent.

The renewals of track embrace the following:

4,672 gross tons Bessemer steel; 200 gross tons new iron rail; 4,479 gross tons re-rolled iron rail; 1,666 old scrap rail; 404,460 lbs. spike; 479,995 lbs. iron joint splices; 312,182 lbs. track bolts and nuts; 15,153 repaired rails; frogs and switches, $21,500. There were 49¼ miles of track re-laid with Bessemer steel, and 44¼ miles with new and re-rolled rail; 45 miles of track were thoroughly, and about 15 miles partially ballasted, and 207,949 cross-ties renewed.

There was charged to construction account: new tracks and extensions of sidings, $145,690; permanent improvements and repairs on Springfield Branch, $112,899 82; real estate on Central Tract and new work for tracks, bridges and docks thereon, at Cleveland, $635,235 05; extra cost steel rail, $155,748 41; grounds at Springfield, for connection with Short Line, $30,000; farm at Catawba, to secure gravel pit, $15,712 20; grounds at Indianapolis outer depot, for increased yard, $13,936 23; for first class shop, round house and improvements at Delaware, $69,207 65; for excess in weight of new rail on Indianapolis Division, new water stations and coal bins, new car repair shops at Cleveland, $42,739 03—making a total of $1,220,674 39.

The assets and liabilities of the company, as shown on its books, are as follows:

ASSETS.

Cost of road, depots, shops and equipment		$16,395,579 15
Materials on hand:		
For repairs of track	$119,642 48

PHELPS, DODGE & CO.

Their Statement Relative to the Revenue Dispute—A Clear and Concise Explanation of the Facts.

Messrs. Phelps, Dodge & Co. have prepared the following statement relative to the dispute between their firm and the Customs Department about certain goods imported by them. A great deal of obloquy has been cast upon this reputable house, in consequence of the merits of the case not being properly understood. The statement herewith given furnishes a complete exoneration of the firm, as will be seen by a perusal:

APRIL 15, 1873.

To our Friends and the Public:

For a period of nearly four months our firm has been made the subject of accusation and criticism, so harsh and unjust, that it has seemed to us as if the generally accepted rule, which assumes "all accused innocent until proved to be guilty," had been at least in our case, set aside in favor of that other principle "that all accused shall be held guilty until they establish their innocence."

During nearly all this period, by reason of various circumstances, such as the fact that the matters involved were still the subject of controversy between our firm and the Government; and above all, that by the taking and retention of our books and papers by the authorities we were not in full possession of all the evidence relied on by the Government to sustain the charges preferred against us, it has not been considered expedient to say anything in the way of public explanation; but the time has now come when an explanation is proper.

In the extensive importing business in which we are engaged, tin plate constitutes the chief article subject to an *ad valorem* duty; and we are associated with the house of Phelps, James & Co., of Liverpool, which is largely occupied with its procurement and shipment. As the trade, furthermore, which we do in this article is very large, and as it is entirely impossible to purchase at any time any very large quantity from accumulated stocks, it has been long the custom of our Liverpool house to arrange for the manufacture of supplies through contracts extending over lengthened periods; and also, in many instances, to advance to manufacturers the various constituents of their business, and even capital, and receive in return the finished product at prices conditional upon the fluctuating values of the raw materials, and through settlements effected at very considerable intervals.

The complicated tariff question now arises, In what manner are tin plates and similar products manufactured and purchased under such conditions to be invoiced.

The fundamental tariff law provides that duties on merchandise shall be assessed on "*the actual market value* or wholesale price thereof at the period of exportation, in the principal markets of the country from which the same shall have been imported;" but another provision of another act further requires that although the duties assessed must be on "*market value*," the invoice accompanying it, in case of purchase, must declare the *actual* cost—a statement which, in some cases, as above explained, is often a matter very difficult of exact determination at the precise date of shipment.

To add still further to the complication of legal requirement, the ruling of the United States Treasury, according to which the law is administered, is to this effect: That all purchased goods must be entered at the Custom-house at *actual cost* when that is higher than the market value at the time of shipment; but at *market value* when that is higher than actual cost. With a business largely done, as ours is, on contracts for future delivery, it therefore often happens that, on an advancing market, the contract price paid by us may be considerably less than the market value at the time of shipment, in which case, if we invoice at Liverpool at the price paid, the authorities in New York may advance the value, or, under certain circumstances, demand a penalty or complete forfeiture on the ground of undervaluation. On the other hand, on a falling market, an invoice rate representing actual cost may be greatly in excess of market value at the time of shipment; but in such cases no allowance whatever is made to the importer. And thus it has actually happened that during the past year—which has been characterized by the most remarkable and violent fluctuations in the prices of metals, (tin plate selling for 28 shillings per box in January, 44 shillings in July, and 35 shillings in December—we have paid, on aggregate overvaluations, a very large increase of duties over and above what would have been required had the goods been purchased at the date of shipment.

Again, the very form of consular oath, to which, as citizens of the United States interested in a house in Liverpool, we are required to subscribe, is not necessarily equivalent to the declaration which the counsel himself is required to make

and attach to the invoice; inasmuch as the *first* declares the actual cost, while the *second*, which immediately follows, and is upon the same page, is to the effect that the consul believes the merchant's declaration, and that the invoice exhibits the actual market valuation; which last the invoice cannot, unless "actual cost" and "market value" are held to be equivalent.

With this brief explanation of the letter of the law under which our goods are required to be invoiced, and its method of administration, we will endeavor to make clear wherein, through its supposed infraction, we have offended and been made subject to penalties.

As has been already stated, the articles before mentioned imported by our firm are purchased in large quantities of many different makers, sometimes outright, sometimes under conditional and long continued contracts. They arrive at Liverpool in many different lots every day, and are sent directly to the steamer, which often sails the same day. Triplicate invoices, one of which must go by the steamer with the goods, are required to be made out and taken to the consul's office for certification before 1 o'clock.

Under such circumstances, small errors in the invoices received from the many different makers, or disagreements between the Liverpool house and the makers in respect to the qualities or prices to be paid for particular goods, are almost unavoidable; but at the same time it was not charged by the Government that any of our goods had been passed through the Custom-house except at their fair market value. It has, however, happened, that on the receipt, from time to time, of sundry small quantities of special goods—mostly extra and unusual sizes—due on old orders or contracted for months in advance of delivery, our Liverpool correspondents have been at a loss to know how to invoice them.

The market value, in the first place, was different from contract cost. The requirement of law next was that they should swear before the consul as to actual cost, and that the consul shall certify as to market value, which, according to the practice of the consul's office, is treated as the same. Then as the goods in question were mainly remnants of contracts delivered long after the time agreed on, and as there was a possibility of some deduction in the periodic settlements for non-fulfillment of contract, the matter of cost itself, within certain limitations was not fixed, but contingent. Under such circumstances, as the quantity and value of the goods in question—as will be shown hereafter—were very small as compared with our regular and accompanying shipments, our friends in Liverpool, without perhaps sufficient consideration met the practical difficulty of the law by marking up these small items in the invoice, where market value had advanced over cost and making a reduction where market value had declined below cost.

In such instances, and in the way of explanation, the Liverpool house sometimes sent small memoranda by the same or the following steamer, and in few cases letter-press copies of the bills of manufacturers to them; the precise object of which bills and memoranda were to explain that such and such numbers of an invoice were remnants of an old order in respect to which the contract prices varied to a small extent, more or less than the invoiced (but intended to be) true market value at the time of shipment; the exact truth, as investigation subsequently showed, being, that the changes in question, on the side of *over*-valuation and in favor of the Government, were very largely in excess of those in the direction of *under*-valuation and in our favor.

These bills and memoranda we, carelessly, did not examine personally, not regarding them in any sense as invoices or as of the slightest importance as respects the Custom-house; and, under these impressions, they were, on arrival, handed over to the assistant clerk who copied invoices into our foreign invoice book, to be pinned, without concealment, to its pages.

It is foreign to this explanation to dwell on the origin of the suit instituted against us by the Government, but it is sufficient to say that this clerk, who some years since was taken into our employment in destitute circumstances, and who was dismissed for complicity in allowing dishonest persons to enter our store secretly and at night, in order to inspect our letter-books and papers, did carefully examine the bills and memoranda in question. And, after surmising that they were not in accordance with the letter of the law, and, in place of acquainting us with the fact, *as was his duty*, removed them from the invoice book to which they had been attached, and, after suppressing those showing instances where the Government had been benefited, but collecting and carefully preserving the few where a small benefit had accrued to the firm, but himself in communication with the Treasury agents.

What followed was an invitation for two members of the firm to visit the Custom-house, where they were informed that evidence had been obtained by the Government implicating in extensive frauds the house which they represented.

They at once denied any purpose or intent to defraud the Government, as well as any knowlenge whatever of any irregularities in our business in connection with the Custom-house; and as a further earnest of good faith and conscious integrity, they at once waived the service of a warrant which had been prepared against our books and papers, and voluntarily and immediately placed the same at the disposal of the authorities. We also at the same time, gave our word that, if the Government had any just claims against us by reason of the infraction of any law, we would pay the same to the uttermost farthing, without causing legal delays or expenses; and subsequently, at the suggestion of the then United States District-Attorney, Hon. Noah Davis, now Justice of the Supreme Court of New York, that the matter should be adjusted on the basis of our paying an amount equal to the whole value of the items, in our different invoices, against which any charge of irregularity had been preferred, we accepted the same as a basis of settlement. This amount was subsequently approximately ascertained to be $260,000, which sum we deposited to await the action of the Treasury Department in a *pro forma* suit which was then agreed upon between the District-Attorney and our counsel.

With this understanding, in perfect good faith on our part, and, as we feel bound to acknowledge, with an absence of anything like a spirit of vindictiveness on the part of the authorities, the investigation commenced in December; the Government being in full possession of our books and papers, and also aided by our dismissed clerk, who by becoming an informer would be entitled to a large share of all forfeitures which through his instrumentality might be established. The result was that, to our surprise and astonishment, the slips and memoranda of the special goods referred to were regarded by the special agent of the Treasury as constituting in themselves "*duplicate*" invoices and evidences of illegal entry, and as such subjecting us to the full penalty of the statute, which, in substance, provides that when any part of an invoice is made in violation of the law the whole invoice or its value becomes liable to forfeiture; but that the Secretary of the Treasury may accept a compromise of its full penalty when, upon the certificates of the Treasury Agent, the District Attorney and Solicitor of the Treasury, he believes it proper and for the interest of the Government to do so.

Having come to this final conclusion, the Government examined all our invoices for a period of five years, and from the whole number, representing an importation of at least forty millions and on which duties to the extent of upward of eight millions had been paid, selected about fifty, which by reason of the memorandum slips were held to be vitiated. The aggregate value of all the goods included under this number of invoices was estimated at about *one million dollars*, and as it was claimed that the Government had the right, after establishing illegality in the smallest particular, to confiscate every item of such invoices, a *pro forma* suit for the above sum was instituted against us. The aggregate value, on the other hand, of the several items in the fifty invoices alleged to be vitiated, amounted when taken separately, to $271,017 23; and by the payment of this sum, the suit and claim of the Government were subsequently settled.

But it should not at the same time escape attention that the amount of alleged errors of these several items, whose aggregate value was $271,000, was in itself a comparatively small sum, not exceeding $10,000 to $15,000, if estimated at the maximum; and that of this sum the duties which could have possibly accrued to the Government constituted but a fraction. In short, if they had been assessed at the maximum rate imposed since 1863, the amount would have been less than $4,000, but in fact we are given to understand that the whole amount of loss which after a careful examination of our books it can be claimed that the Government has sustained by reason of the above irregularities whereof we have been accused, (not taking into consideration the cases where we had paid on over-valuations,) is not in excess of $2,000; or, to put the matter still differently, if the case had been one between two merchants, covering a period of five years and involving transactions to the extent of $40,000,000, (and considering only the invoices in question,) the supposed discrepancies of account could have been satisfactorily settled by the payment on our part of from $2,000 to $4,000, but in the case of the Government and the merchant the former can only be satisfied, under existing laws, by the payment of $271,000, and can [illegible]r claim to have acted generously, inasmuch it did not take from us a million.

As further proof and illustration of our statements, we give the following example of one of the memoranda returned to us by the authorities after settlement, and regarded by them as fully conclusive against us: In July, 1871, we received per steamer Algeria an invoice of 2,194 boxes tin plates, included under which was a lot of 174 boxes of odd sizes, 24x24XXXX, and 24x14½XX, (marks which the trade will understand,) the remnant of an old and special contract. All these goods, it is admitted by the Government were invoiced at their true market value at the time of shipment, were so certified by the Consul at Liverpool, and so passed after examination by the appraiser in New York. But there was, in addition, a memorandum transmitted apprising us that the 174 boxes, in virtue of an old contract, would be charged to the Liverpool house at a price which differed from the then actual market value to the extent of about a sixpence per box. The total value of the whole invoice was £3,237 14s. The total value of the 174 boxes was £293 4s. 2d., and the difference between the actual market value of these last and their contract cost was £1 7s.; on which difference the duty of twenty-five per cent would have amounted to £1 1s. 9d., or a little more than $5. And yet, on account of this small difference in the general settlement, as a penalty we paid the full value of the 174 boxes, namely, £293 4s. 2d., or upward of $1,400. And thus the delinquencies ran throughout the whole of this extraordinary transaction.

But in admitting these irregularities, we do not admit that the Government, by reason of the same, has really sustained even the trifling loss that has been estimated; for the very principle which caused a few items to be irregularly invoiced led to errors against us, and in favor of the Government, of many times the amount claimed to have been lost by the Customs, one single contract during the past year for special brands and sizes, which cost, net, £42,889 6s, having been invoiced to us at £54,655 17s., and passed for the payment of duties at the Custom-house at such later valuation.

In view of these facts, it is also proper for us to state why we were induced to yield to, rather than contest, the demands of the Government, when we found they were resolved upon.

And first and foremost, we regarded it as a question *for the Government to determine*, whether the enormous forfeitures incurred by us, without design or motive of fraud, misstatement, or concealment, were to be exacted because it was so written in the law, or were to be adjusted rather to the actual quality of the transaction. But when the measure of forfeiture finally exacted was insisted upon, and its legality was treated as equivalent to its justice, our own sense of its injustice and oppression could not relieve us from the necessity in which we had before placed ourselves, of accepting the Government measure of its rights and our obligations. It may be true that in our confidence in our rectitude and in the justice of the Government, we had not given due attention to the disturbing element introduced into the dealings of the Government with its citizens, by the immense private interests of revenue officers and informers, which our system has created and tolerates.

A second and subordinate consideration, but one of much weight, especially with the senior members of the firm, confirmed us in disposing of the case by settlement rather than by controversy. In the whole long course of our business, it has been at once our fortune and our pride to have had no serious litigations; and that this enviable record should not be interrupted by long and bitter controversy with the Government seemed but justly within our choice, provided the sacrifice we made to secure it was, as it has been, wholly our own. And if there are any who may be inclined to judge us harshly for such a decision, we would ask them to recall to mind the peculiar rigor of our present tariff law; the enormous confiscations which it is allowed to the Government to make under it; and furthermore, that during the whole continuance of the suit, our books and papers would be under the control of the authorities, and our business be liable to be interrupted, and our credit affected by rumors and misrepresentations, which it would be exceedingly difficult, if not wholly impossible, to at once refute or answer.

In view, then, of this statement, the correctness of which we believe the officers of the Government will affirm in every essential particular, and in support of which we append letters from the special agent of the Treasury Department, the Consul at Liverpool, who for twelve years certified to the correctness of our invoices, and the gentleman who, at the inception of the suit against us, filled the office of United States District-Attorney, we will ask the Press, we will appeal to the great masses who know us, and who do not know us, whether it is probable that a firm which pays annually to the Government hundreds of thousands of dollars in duties, whose total business transactions are measured annually by millions, would knowingly, willfully, and systematically defraud the revenue by means of short-paid duties to the extent of a few thousand dollars, extended over a period of five years? And we further respectfully ask the Press, and the community, which may have prejudged us, whether, after so many years of honorable life and unsullied reputation, such a calumny against us can be believed and accepted.

And on this statement, and asking attention to the letters which we annex, we submit our case to the just judgment of our friends and the public.

PHELPS, DODGE & CO.

No. 1.

OFFICE OF B. G. JAYNE, SPECIAL AGENT
UNITED STATES TREASURY DEPARTMENT
CUSTOM HOUSE, NEW YORK, March 31, 1873.

Hon. Wm. E. Dodge:

DEAR SIR: The suit brought against your firm for $1,000,000, was not for duties but for the value of certain invoices.

In these invoices the price of a portion of the merchandise was stated below the purchase price.

The value of that portion of the invoices upon which the value was understated amounted, when taken separately, to $271,017 23, the sum paid by your firm. The duties lost by the Government by the undervaluation were but a fraction of the sum paid.

Many charges made in the public prints against your firm had no foundation in truth.

Very respectfully, your obedient servant,
(Signed,) B. G. JAYNE.

No. 2.

CAMDEN, N. J., April 8, 1873.

GENTLEMEN: In reply to yours of yesterday, I have to say that during the time I was Consul at Liverpool, there was every disposition shown by the house of Phelps, James & Co. to comply with the Revenue laws in making out their invoices; in fact, no house there seemed more solicitous and scrupulous in this particular than did this house. Mr. James, the senior member of this firm, used frequently to consult with me as to the mode of making them out, and the prices or values to be stated.

There were very often difficulties experienced on the part of exporters as to the sums or prices to be inserted when there were long running contracts for the delivery of goods, and this house always had contracts running.

I never saw any disposition on their part to violate the law in any particular, and I do not think they ever did so intentionally.

Very truly yours, &c.,
THOMAS H. DUDLEY.

PHELPS, DODGE & Co.

No. 3.

Letter from Hon. Noah Davis, late United States District-Attorney, and now Judge of the Supreme Court of the State of New York.

NEW YORK, April 11, 1873.

Messrs. Phelps, Dodge & Co.:

GENTLEMEN: I have received yours of the 9th inst., asking me, now that the proceeding recently taken against you by the Government has resulted in a final settlement, to give you a statement in relation to the claim made against you, and the manner in which it was met and adjusted by you, and such other matters in connection therewith as I may feel at liberty to communicate. As an act of justice toward you, I think it my duty to comply with the request.

Information in the case was first given to B. G. Jayne, Esq., special agent of the Treasury Department. At that time I was the United States Attorney for this district—the officer charged with the duty of conducting legal proceedings in such cases. After Mr. Jayne had partially investigated the case he laid the facts and papers then in his possession before me. I examined them and came to the conclusion that they were sufficient to justify a more thorough investigation. I requested that some of the leading members of your house should be invited to come to the Custom-house, that I might have a personal interview with them. Mr. William E. Dodge and Mr. James came in response to the Collector's message, and evidently without the slightest idea of its object. I stated to them the charges that had been made, the grounds on which they were based, and the steps that had been taken and my conclusion that a full investigation ought to be had. Those gentlemen took the matter in a spirit of most perfect fairness and frankness, inviting the closest scrutiny, and offering without reserve to place at once in the hands of myself or the other officers of the Government all the books or papers of the firm that might be desired and to afford every facility in their power to an inquiry into all their dealings with the Custom-house, asserting that if any irregularity existed in the dealings of their house with the Government, it was unknown to them and wholly unintentional. They also expressed themselves on behalf of their firm, ready and willing, if there had been any irregularity, to pay not only what the Government might have lost by reason thereof, but any penalty to which they had inadvertently subjected themselves. I suggested that Mr. Jayne with such assistance as he might need, should go with them to their place of business and receive whatever books and papers he should desire. To this they promptly acceded, and Mr. Jayne did accompany them, and was put into possession of the books and papers. A full and careful examination was then made by and under the supervision of Mr. Jayne, he having access to all your books and papers and possession of all that were deemed necessary to enable him to ascertain the facts. I was advised from time to time of the progress of the investigation, and when it was concluded I examined the papers and docu-

ments presented to me containing the case of the Government. From this examination I became satisfied that there had been during the past five years a considerable number of violations of the customs revenue laws by your house, all alike in their character; but that those violations had occurred without any actual intent on your part to defraud the revenue. The infractions of the statute were, however, of such a character as left exposed to forfeiture invoices of goods to the amount of about $1,000,000. On conferring with your counsel I found you still desirous to meet and adjust the matter on any basis that would cover any fair claim for duties or penalties that the Government thought proper to enforce. I myself suggested without knowing what the amount would be, that the value of the articles, in the several invoices, actually affected by the alleged undervaluation should be ascertained and that the amount so found should be taken as the basis of the settlement. The suggestion was accepted, and the amount was approximately ascertained at about $260,000. It was then arranged between your council and myself that a suit should be commenced, and that the sum arrived at should be at once paid into court as a settlement of the claims. At that stage of the transaction my term of office expired; but I understand that a suit was commenced by my successor which has been compromised on the basis arranged with me at the value of the articles mentioned, as afterward ascertained.

If I had come to the conclusion that you had acted with an actual design to defraud the Government, I should have insisted upon the forfeiture, not only of the value of the articles above referred to, but of the entire invoices of which they formed a part, amounting to fully $1,000,000; but my examination, with the explanations made to me by you, showed clearly as I thought, and still think, that the idea of defrauding the Government of its lawful duties had never entered your minds, while doing a portion of your business in a manner which the Courts would declare to be in conflict with the statutes. I was confirmed in this by the very meagre amount of duties lost to the Government. In a business with you of many millions of dollars during the period of five years in which the alleged irregularities occurred, and during which you had paid to the Government several millions of dollars in duties, the whole amount lost by the alleged fraud fell short of the sum of $3,000.

I have since learned (a fact which I did not know at the time) that by applying the same rule of valuation adopted by you, and which in the instances covered by the settlement resulted in an undervaluation, to the same goods in other invoices imported during the same period the result has, in those cases, been an overvaluation upon which the Government received duties beyond what would have been payable under the correct rule of valuation, to an amount very considerably in excess of the duties lost. This fact has confirmed my conviction of your entire innocence in the whole business of any actual intent to defraud.

In conclusion, I beg leave to add that during my connection with the office of United States Attorney, I knew of no case in which such a prompt and earnest desire to court and aid investigation, to correct any error, and right every wrong that might appear to have been done to the Government or its revenues, was manifested, as that constantly shown in yours.

I am, very respectfully yours,
NOAH DAVIS.

☞ A contract has been taken by responsible parties to complete the Shenango and Allegheny Railroad within four miles of Greece City, in four months. It will connect with the Allegheny Valley Railroad at Brady's Bend or at Parker City.

☞ Ground was broken on the 17th inst., on the Anderson, Lebanon and St. Louis Railroad, at Anderson, Indiana.

Commerce of New York.

The foreign imports at New York for the month of March, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$20,779,299	$18,625,391
Do. for warehousing	15,585,953	12,697,010
Free goods	2,561,827	11,303,582
Specie and bullion	291,189	814,688
Total entered at port...	$39,218,268	$43,440,621
Withdrawn fr. wareh'use	10,998,300	12,192,307

The foreign imports at New York for three months from January 1, were:

	1872.	1873.
Entered for consumpt'n..	$59,753,377	$56,606,864
Do. for warehousing	45,061,042	33,916,586
Free goods	7,715,276	28,518,799
Specie and bullion.	574,212	1,062,580
Total entered at port...	$113,103,907	$120,104,829
Withdrawn fr. wareh'se.	35,132,203	32,821,697

The foreign imports at New York for nine months ending March 31, were:

	1872.	1873.
Six months....	$183,028,276	$199,326,050
January....	35,679,496	37 803,691

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, April 26, 1873.

Stock Exchange and Money Market.

Money, though quite active, has been less stringent as a rule than usual of late. The speculative demand has been decidedly urgent, but the available supply of funds has been more liberal, the banks gaining materially in their reserves, through the influx of currency from the interior, and thus being enabled to make more liberal advances. The rapid recovery in the share speculation and heavy purchases for the new *Bull* account toward the close have increased the demand for aid on temporary loan, while the decline in the rates of interest to about 7 per cent on stocks has directed the attention of some of the banks and street lenders to merchant and railroad paper, going at 9 to 12 per cent per annum. The rates on call loans ranged from 7 per cent to the Government house, to the same rate, and a fractional commission, varying from ⅛@⅙ of one per cent for the use of Money, to carry over Stock from day to day. The city banks made an addition of $1,126,000 to their legal tender reserve, and of $268,100 to their deposit account, while reducing their loan and discount averages $1,326,300. A slight loss of specie, and an unimportant contraction in the item of circulation were reported. The daily exchanges of the banks, through the week, were on an enlarged scale. The U. S. Sub Treasury augmented both its coin and currency reserves, the latter quite liberally. The city banks, last week, slightly reduced their specie reserve while adding about 1⅛ million to their legal tender hoard. Their deposits were increased about ¼th of a million, and their loan and discount averages reduced about 1⅜ millions. The banks are still deficient in their obligatory reserve, the last statement showing that they had $983,950 less than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of about ⅜ths a of million to its coin balance, and about 1¾ millions to its currency reserve. Its currency reserves at the close of the week were $17,713,451; and its coin hoard, $41,631,585.

The city banks, in their latest return, show an increase of $1,126,000 in legal tender notes, and a decrease of $17,900 in their specie, with an addition of $268,100 to their deposits, also a contraction of $1,826,300 in their loan and discount averages, and of $1,100, in their item of circulation. The city bank exchanges, last week, averaged 147 millions.

The clearances of the banks averaged through the week 147 millions a day, and amounted in the aggregate, for the whole week, to $862 472,883 as against $659,075,392 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $1,743,787 and its coin reserve $356,305 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $16,116,400, against $18,278,400 same time last year. The city bank deposits are now $187,167,300 against $195,630,700, week ending April 20, 1872. The legal tender reserve amounts to $36,619,800, against $39,909,300 same time last year. The circulation now stands at $27,713,300 against $27,911,500 same time last year. The loans are now $270,190 600 against $273,050,600 at this date last year.

The coin reserve of the city banks is now about 16⅛ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 36⅝ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 187½ millions, against 247½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $4,071,316 of currency, and $7,044,913 of gold, the latter including $2,305,000 from customs; and disbursed $2,328,629 of currency and $6,688,608 of gold, the latter embracing $651,231 of coin interest.

The cash balances under the control of the Treasury Department on Monday were: Currency, $2,568,524; special deposit of legal tenders for the redemption of certificates of deposit, $26,315,000; coin, $72,186,841. Coin certificates outstanding, $22,885,000. Legal tenders outstanding, $358,117,433.

Government revenues were rather moderate during the week. The excises yielded within the week over 2 millions, and thus far in the current fiscal year beginning with July 1, 1872, $91,939,949. The customs at the port of New York, for the week, were $2,266,691, and at the outports, about $750,000 more, in coin or coin certificates.

There has been a less confident movement noted in Gold since our last. The speculative inquiry has been less animated. The export drain has been moderate, as has likewise been the Customs call. The increased offerings of foreign exchange have been against a buoyant market. The range of the price during the week has been from 117@118¼ and the closing quotation on Wednesday was 117⅛ against 117⅛ on Wednesday of the preceding week. The specie outflow last week, was $842,603. The Gold Exchange Bank clearances have averaged about 91 million per day during the week.

The customs demand for Gold last week, averaged $384 160 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $1,055,631 against $575,316 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $110,642,232 against $130,484,395 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $62,893,795, against $62,584,869 during the same time in 1871-2.

The export drain of specie was $842,603 last week, against $899,592 same week preceding year. The shipments since July 1, 1872, have been $52,529,277 against $30,291,995 during the same portion of 1871.

The foreign exchange have been more active and quoted much firmer, since our last, though closing less buoyantly, under the more liberal offering of bills. Bankers' sixty day bills on London closed at 108½@108¾; sight bills on London, at 109⅛@109¾. The week's exports of Domestic Produce have been to the currency value of $6,947,560.

Government securities have advanced sharply, on a brisk demand, for the favorite issues mainly on investment account, in good part for export. The offerings have been on a restricted scale. Government is now disbursing the May interest on the Five Twenties, without rebate.

Government bought in on Wednesday $500,000 Five-Twenties at 114 95@115 38.

U. S. sixes of 1881 closed on Wednesday of this week at 120⅝@120⅞; U. S. Five-Twenties of 1862, 118¼@118⅜; U. S. Five-Twenties of 1864 at 118⅛@118⅜; U. S. Five-Twenties of 1865, 120@120¼; U. S. Five-Twenties of 1865 consolidated 117⅛@117¾; U. S. Five Twenties of 1867, 119⅛@119¾; U. S. Five-Twenties of 1868, 117½@117¾; U. S. Ten-forties at 113⅝@113⅞; U. S. Fives of 1881 (Funding Loan) 116@116¼; Six per cent. currency Sixes from 114½@114¾.

State bonds have attracted more attention closing with more firmness, on the more popular issues.

There has been much more activity noted in the line of Railway and Miscellaneous share property, with a decidedly stronger range of prices, though fluctuations have been frequent.

Railway Mortgages have been in better request, on investment account, and held with more confidence. Central Pacific Sixes have been more sought after closing firmly at from 103¼@103½.

Chesapeake and Ohio Sixes have been in fair demand at 87½ and interest. Western Pacific Sixes have been inquired for at 94¾@95. The Northern Pacific 7-30 Loan has been of readier sale at par and interest.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex-May coupon.

Messrs. Phelps, Dodge & Co., the oldest as it is the foremost firm in the Metal trade in this city, has made a frank, clear, and self-evidently truthful statement of its business relations, to and with the revenue department of the Government, in an exhibit which has been quite extensively published. For many months, the house had been assailed by the harpies of the revenue service, and their political backers, in one line or another, and charged with intentional deception and fraud in the entry of goods at this port, at undervaluations. Much of the detraction has also been due to trade rivalry, and jealousy. The house was thus forced into conflict with the Treasury Department, its business embarrassed, and its honorable record impeached. All this, too, while the respected partners in the concern in this city, and their representatives abroad, admittedly made every possible effort to enable the customs officials to ascertain the real facts of the case, and stood ready at all times and under all circumstances, to render to the Government all its just dues, even to the last cent. Threatened with what promised to become protracted litigation, and persistent annoyance in the prosecution of its legitimate business, though unconscious of any intentional wrongs, it made an offer of compromise as the lesser of two evils, which was accepted by the Secretary of the Treasury, and the firm promised exemption from further persecution. In the published statement, this eminently trustworthy house makes a plain exhibit of the whole case, in the confident belief that the public will receive its exposition as a vindication of the course it adopted to put a summary end to its troubles.

In General Business a much freer movement has been noted, especially in the line of domestic produce. Breadstuffs, Provisions, Naval Stores, and Petroleum closed rather stronger. Cotton, Hops, Wool, Hides and Leather weaker in price. Middling upland cotton, closed on Wednesday at 19⅜ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,279,620 bales, against 2,534,812 bales same time in the preceding year; exports 2,058,518 bales against 1,718,782 bales in the previous year; stock at the ports at latest dates, 471,750 bales against 318,516 bales same date 1871.

Foreign merchandise has been rather more sought after, and quoted steadier in price as a rule, although the less desirable styles of Dry Goods and raw Sugars have been favoring buyers. The week's imports amounted to $12,346,614, including $3,300,999 of dry goods.

Ocean freights have been fairly active, rates however, have been quoted lower.

At the Live Stock Markets, Beeves have been moderately at from 9¼@14 cts. Veals at 6@11⅛ cts.; Sheep at from 5¾@8½ cts.; Swine at 6@6½ cts. per lb., all live weight. The week's receipts were 9,248 Beeves, 3,277 Veal Calves, 20,068 Sheep and Lambs, and 40,729 Swine.

Illinois Central Railroad.

The statement of this Company for the month of February, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	618.85 for	$4,813 20
Acres Free Lands Sold	68.62 for	577 58
Total sales during the m'th of February, 1873	687.47 for	$5,390 78
To which add Town Lot Sales	..... for	.....
Total of all	687.47 for	$5,390 78
Cash collected in February, 1873		$59,368 24

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$320,482 00	$56,936 00	$377,418 00
Passengers	85,782 60	23,508 40	109,291 00
Mails	6,375 00	3,059 33	9,434 33
Other sources	64,625 00	2,180 67	66,805 67
Tot'l Feb.'73.	$477,264 60	$85,684 40	$562,949 00
Total actual earn'gs, Feb., 1872	$456,948 62	$74,678 06	$531,626 68

☞ Judge Emmons, in the United States Circuit Court at Cleveland Ohio, on the 15th inst., granted an injunction restraining the proposed leasing of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad and its dependencies to the Atlantic and Great Western Railway Company, but denied it as to the proposed five millions increase of the capital stock of the company. An injunction against both was granted by Judge Paine in the Cuyahoga Common Pleas at Toledo on the 14th inst. The meeting of the stockholders of the former road called for the 16th inst., was of course not held—the passage of the Railway Lease Bill by the Ohio Legislature on the 14th inst., and the action of the courts, rendering it unnecessary.

☞ The earnings of the South Carolina Railroad for the year ending December 31, 1872, were $1,401,211 25, the expenses $856,105 61, and the net earnings $545,105 64. In 1871 the earnings were $1,325,442, the expenses $879,858 63, and the net earnings $445,583 37—showing an increase in earnings of $75,769 25, with a decrease in expenses of $23,753 02—making the increase in net earnings $99,522 27. After paying interest account, the net profits of 1872 are $137,381.

☞ A dispatch, dated Cleveland, Ohio, April 23, says: It is reported that J. H. Devereaux, general manager of the Lake Shore and Michigan Southern Railway, has tended his resignation to the directors, and has been elected president of the Cleveland, Columbus, Cincinnati and Indianapolis Railway, in place of H. B. Hurlbut, who has resigned; also, that Mr. Devereaux will be elected vice-president of the Erie road, in place of General Diven, and that he will have the general management of the Atlantic and Great Western Railroad.

☞ By an announcement elsewhere it will be seen that the Chesapeake and Ohio Railroad Company are actively constructing an extension of their line to the deep waters of the Chesapeake Bay, in order to accommodate foreign bound shipments making a direct line from Western cities to Europe. An issue of new seven per cent Bonds based on this line, and other works of improvement, is offered for sale by their Financial Agents, Messrs. FISK & HATCH, as therein set forth at length. The price of the new bonds is 90 and interest.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 12, at 319,926 tons, and for the coal year at 4,046,415 tons, against 4,036,322 tons to corresponding time last year, being an increase of 10,093 tons. The bituminous tonnage for the week is 47,359 tons, and for the year 476,632 tons, giving a total of all kinds for the week of 367,285 tons, and for the year 4,523,047, being an increase as against production to same time last year of 83,119 tons.

☞ We learn from Cape Breton, Nova Scotia, that the steamship Great Eastern, after laying the new Atlantic cable, is to take a cargo from Cow Bay, C. B., to Europe, on her return trip, to consist of fifteen thousand tons of coal, and that one of the principal shippers in Cape Breton has contracted to load the monster steamer in fifteen days.

☞ The certificate of incorporation of the Cleveland and Chagrin Falls Railroad Company, with a capital stock of $100,000, was filed with the Secretary of State, at Columbus, Ohio, on the 16th inst. The southern terminus will be near the center of Solon township, and the northern terminus at Chagrin Falls.

☞ The Frederick and Pennsylvania Line Railroad Company are now running two regular passenger trains per day from Frederick, Md., connecting with the Western Maryland Railroad at Littlestown for Baltimore, Hagerstown and points north. The travel so far has been very encouraging.

☞ The Union Pacific Railroad Company sold during the month of March 17,626 95-100 acres of land, at an average price of $4 79 per acre, amounting to $84,461 99. Total sales to April 1, 1873, 708,437 50-100 acres, at an average price of $4 22 7-10 per acre, amounting to $3,008,480 31.

☞ Work was to have been commenced at San Diego, on the Texas and Pacific Railroad, on the 22d inst.

☞ The Nashua, Acton and Boston Railroad is rapidly approaching completion, and the iron will probably be all laid by the first of May.

BANKING HOUSE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK. April 24, 1873.

The present high price of Government Securities is increasing the demand for first-class Railroad Bonds; and as the amounts now offering are comparatively small, is is reasonable to suppose the present difference of from TWENTY to THIRTY per cent. cannot be obtained for any great length of time. Government Bonds are higher now than for several years past. A "Five-twenty" Bond at 120, paying six per cent. on the par value, yields but a small income on its market price, and if an entirely safe investment can be obtained with a difference of 200 to 300 dollars on each 1,000, it is largely to the interest of the holders to make the exchange.

We are recommending the following for such Exchanges or for new investments—all of them payable in gold, principal and interest.

The CHESAPEAKE AND OHIO SIX PER CENTS at **88** and accrued interest, interest payable May and November; these bonds are issued in denominations of $100, $500, and $1,000. The road, 420 miles in length, is now completed, and the business offering is very large, and increasing daily.

The WESTERN PACIFIC SIX PER CENTS at the market price, which is to-day **95**, flat. These bonds are $1,000 each; interest payable January and July. This road having been consolidated with the great CENTRAL PACIFIC, and payment of its bonds, principal and interest, assumed by them, we see no good reason why they should not soon approximate in price to Central Pacifics—now 103, and becoming very scarce in the market.

Also, the CHESAPEAKE AND OHIO SEVEN PER CENTS, interest payable January and July, secured by a First Mortgage on the Extension to deep water on Chesapeake Bay, on the proposed Kanawha River Branch, and on the Great Bridge to be built over the Ohio River at Huntington, and a Second Mortgage on the Main Line, with all its equipments, depots, &c.

Only **$3,000,000** of these Bonds will be offered for sale at present. Price **90** and accrued interest.

We consider them amply secured, and a very desirable investment. The proceeds will be used in adding largely to the present equipment, and in extending to deep water on the Chesapeake Bay, where the largest steamers in the world can load and unload alongside the cars.

The amount of money to be invested within the next few months will be very large; the Government disbursement alone for the next three months will reach $100,000,000, and the May and July dividends of the banks, railroads, and other corporations as much more.

We continue to deal in Government and Central Pacific Bonds, receive deposits, on which we allow interest, make collections, execute orders at the Stock Exchange per cash, and conduct a general banking business.

FISK & HATCH.

☞ The wooden bridge of the Boston and Albany Railroad, at Springfield, Mass., 1,360 feet in length, is to be immediately replaced by an iron structure built from designs furnished by Charles Hilton, Esq., engineer, of Albany. It will be similar in style to the upper bridge there.

Journal of Railroad Law.

COMMON CARRIERS—DELAY IN TRANSPORTING STOCK—CONSTRUCTION OF CONTRACT.

The facts in the recent case of Illinois Central Railroad Company *vs.* Owens, (53 Ill., 391), are fully and clearly stated in the following opinion by—

BREESE, CH. J.—This was an action of assumpsit, brought to the circuit court of De Witt county, by Owens & Strain against the Illinois Central Railroad Company, as common carriers. There was a trial by a jury, and a verdict for the plaintiffs. A motion for a new trial was made by the defendants which the court overruled, and rendered judgment on the verdict.

To reverse this judgment the defendants appeal.

The property in question was a lot of hogs, shipped under the following contract:

FREIGHT OFFICE ILLINOIS CENTRAL R. R. Co.
Clinton, Ill., Dec. 6, 1864.

Received of R. V. Owens three (3) cars hogs, 150, more or less, shipper's count, to be delivered at Chicago station, at special rates, being forty seven dollars per car. In consideration of which, and for other valuable considerations, it is hereby mutually agreed that said company shall not be liable for loss by jumping from the cars, delay of trains, or any damage said property may sustain, except such as may result from a collision of a train, or where cars are thrown from the track in course of transportation.

To be fed and taken care of by owner.

No. of cars 926, 752, 218.

Subject to 2½ per cent U. S. tax.

J. A. RUSSACK, Agent.
R. V. Owens.

The question is upon the construction of this contract.

By the terms of the contract, the liability of appellants was limited to damages which the property might sustain from a collision of trains, or when cars should be thrown from the track in the course of transportation.

The case shows that one car was thrown from the track by reason of a broken rail, while all the cars containing appellees' hogs remained on the track, and it is insisted by appellants that for that reason, the appellees cannot recover. Their idea is, because the cars containing the hogs remained on the track, therefore they should not recover.

We think this is a view of the contract quite too narrow to meet the intention of the parties. We have no doubt that damage from delay occasioned by cars thrown from the track, though the cause itself is embraced within the exception of the contract, is as much a ground of recovery as if the hogs had been killed or crippled directly by the accident, and this was the view of the circuit court and which we approve. The proof shows beyond all controversy that there were many hours of delay at the place of the accident and further delay occurred by reason that the train thereby lost (the right of the road) and which delay we think was fairly attributable to the accident, and for whatever hogs were lost or for whatever shrinkage occurred by reason of such delay appellee should be allowed to recover. But the evidence satisfies us that all the delay was not attributable to this accident; a part of it arose from other causes, the chief of which was the extreme cold weather. Had not the accident by means of the broken rail occurred the evidence satisfies us that the train must have been delayed more or less by the intense cold. But for this it would not have been necessary to divide the train at Kankakee, a station between the place of the accident and Chicago, and by reason of which the hogs were detained some hours. This delay was certainly not within the exception of the contract and by its terms appellants are not responsible for the damages occasioned by it. It may be appellants, notwithstanding the contract, might be liable for damages which were caused by reason of the gross negligence or wilful misconduct of their servants, but there is no pretense of such here. Manifestly they acted in good faith and with a view to get the hogs to their place of destination as speedily as possible. Appellants must be held exempt from damages resulting from any delay produced by causes other than the accident and this by a fair interpretation of the contract.

The court erred, therefore, in instructing the jury that they were liable for all damages which occurred during the entire trip, however occasioned.

A point is made that the action is brought by Owens & Strain when the contract is executed by Owens alone. The proof is that these parties had no particular way of signing the firm's name; that it was sometimes signed Owens & Strain sometimes Strain and sometimes Owens as in this case. The property was partnership property.

For the reasons given the judgment is reversed and the cause remanded.

Judgment reversed.

New York and New England Railroad.

A meeting of the holders of Berdell mortgage bonds of the Boston, Hartford and Erie Railroad was held in Boston on the 17th inst. for the purpose of forming a new corporation to assume the management of the road. The meeting was called to order by Wm. T. Hart of the Trustees, and R. R. Bishop was chosen secretary. Mr. Hart said that the bondholders were entitled to organize under the mortgage, all the requirements of the mortgage having been complied with, including the three weeks after the eighteen months after the trustees came into possession, and the required public notice in the newspapers. Mr. Thornton K. Lothrop then offered the following votes, which were severally adopted:

Voted, That we, holders of bonds secured by the mortgage bearing date March 19, 1866, by the Boston, Hartford and Erie Railroad Company to Robert H. Berdell and others, do now organize and form a corporation under the name of the New York and New England Railroad Company, with a capital stock of twenty millions of dollars, divided into shares of one hundred dollars each.

Voted, That this meeting do now proceed to the election of fifteen directors for the New York and New England Railroad Company, by ballot.

Voted, That the seal of the New York and New England Railroad Company be a circle, with the coats of arms of the States of New York, Massachusetts, Connecticut and Rhode Island displayed thereon, and the words "New York and New England Railroad Company, 1873," surrounding them; substantially in the form now presented to this meeting.

Voted, That we now proceed to adopt by-laws for the government of the corporation.

The by-laws provide, 1st—That there shall be fifteen directors to be chosen annually, one of whom shall be President of the Board and the corporation, and they may also elect a Vice President; 2d—The annual meetings are to be held in Boston on the first Tuesday of December; 3d—Special meetings may be held at any time by a vote of the directors, on the written request of stockholders holding not less than ten thousand shares; 4th—The Treasurer is to be chosen by the directors annually and to give $25,000 bonds; and the other articles relate merely to routine matters usual in the management of such corporations.

Voted, That the Directors be authorized and directed to receive surrender of the bonds secured by the mortgage bearing date March 19, 1866, by the Boston, Hartford and Erie Railroad Company to Robert H. Berdell and others; and to issue in exchange for the same, stock in said New York and New England Railroad Company, in the proportion of ten shares of stock for each bond so surrendered to be exchanged; and to appoint an agent or agents for said purpose.

Voted, That the Directors be authorized to audit the accounts of the Trustees in possession of the Boston, Hartford and Erie Railroad; and that said Directors have full power to settle said accounts, and to obtain a deed of conveyance from said Trustees to said New York and New England Railroad Company of all the property, premises, estate, and franchises conveyed in mortgage by the Boston, Hartford and Erie Railroad Company to Robert H. Berdell and others, and of all additions thereto, and of all other property in their hands, or to which they have a right or title, belonging to said trust.

A committee was then appointed to receive, assort and count votes for directors, who subsequently reported that 85 ballots had been cast, representing $5,688,000 of bonds. All the ballots were for the following gentlemen, who were declared elected:

Massachusetts—William T. Hart, John Foster, Thornton K. Lothrop, Francis Dane, Edward W. Kinsley.

New York—Peter H. Watson, William Butler Duncan, Samuel L. M. Barlow, Robert M. Olyphant.

Connecticut—Marshall Jewell, Frederick J. Kingsbury, John F. Slater, William J. Hamersley.

Rhode Island—James Y. Smith, Royal C. Taft.

Mr. Lothrop called the attention of the bondholders to the necessity of surrendering their bonds before they could participate in the earnings of the new corporation.

The Hoosac Tunnel.

The Legislative Committee on the Hoosac Tunnel have substantially concluded their labors, and will soon report. There will probably be three reports. A majority of the committee will report to consolidate the Fitchburg, Boston and Lowell, Vermont and Massachusetts, Troy and Boston and Troy and Greenfield Railroads, and pay the State for the use of the Tunnel. A minority of the committee will report a bill authorizing the State to take possession of the Fitchburg, Troy and Boston, Troy and Greenfield and Vermont and Massachusetts Railroads, paying them a fair rental and realizing from the Tunnel whatever they can. The roads are to retain their corporate existence, and to furnish four trustees to the State five, the whole forming a board who shall select the management of the line. One member of the committee will also report a bill to lease the Tunnel to the Vermont and Massachusetts Railroad. *Boston Journal.*

☞ The Central Railroad Company of New Jersey has passed its usual quarterly dividend of 2½ per cent. The Elizabeth *Journal* is assured that the road is earning money, and that the dividend is only deferred to the six months' term. President Johnston proposed a scrip dividend, on account of the high price of money, but the board did not ratify his views.

☞ In Baltimore there are in operation five street railway companies, with a capital of about $1,500,000, and running 127 cars. They pay no dividend, being required to pay over to the city treasury from 12 to 14 per cent (20 per cent of their gross earnings) on their capital per annum.

☞ The contract for building an iron bridge over the Connecticut River at Springfield, Mass., for the Boston and Albany Railroad, has been awarded to Thomas Leighton, of Rochester, N. Y., for $242,000.

☞ Col. DeGraff will resume work immediately upon the Winona and St. Peter Railroad. He has about fifty miles of track to lay, and a little grading to do to finish up the work. He expects to complete it in two months.

☞ The President has directed an order to be issued, giving the right of way to the Flint and Pere Marquette Railroad through township 18, north range 16 west, in Michigan, formerly an Indian reservation.

Railroad Superintendent.

A RAILROAD MAN of five years experience, both as Agent and as Manager of a short road, desires a position of responsibility for which he can give ample testimonials.
Address Box 1470, N. Y. Post Office.

PHILIP G. SCHOFIELD,

(Successor to PETER SCHOFIELD,)

For Farmers, Butchers, Druggists, &c., &c.

CAUTION.

The well-earned reputation of our Scales has induced the makers of imperfect and worthless balances to offer them as "Fairbanks' Scales," and purchasers have thereby, in many instances, been subjected to fraud and imposition.
If such makers were capable of constructing good Scales they would have no occasion to borrow our name.
BUY ONLY THE GENUINE

CAN NOT **FREEZE** IN ANY **CLIMATE,** UNDER ANY **CIRCUMSTANCES.**

COSTS LESS Than One Half the Price of a FROST PROOF TANK.

The Engineer in charge of the Locomotive attaches the Hose A to a steam valve in the boiler. Steam passed through the pipe D and slip joint F into the globe H, producing a vacuum; the water is then lifted through the pipes I I and forced through the column E and hose C into the tender, filling any ordinary tender in about three minutes. When steam is shut off all the water in the pipes returns into the well, and any condensed steam passes off through the drip valve G, leaving nothing to freeze. The handle B serves to turn the discharge pipe and hose in any direction. The water delivered into the tender is warm, thus utilizing the steam used. The discharge tubes, represented above made of hose, can be made of iron if preferred.

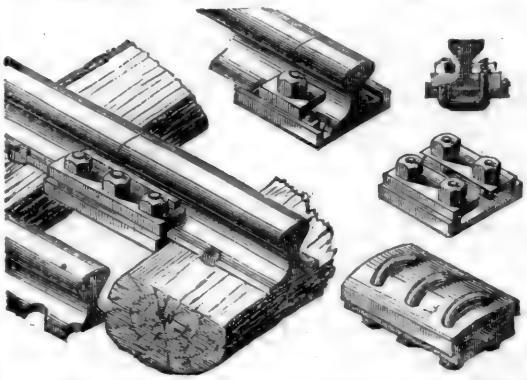
THE LOCK-NUT & BOLT COMPANY OF NEW YORK,

No. 61 Broadway, New York.

Manufacturers of all kinds of **BOLTS** for FISH-BARS, BRIDGES, CARS, MACHINERY, &c., with the "CUMMING NUT-LOCK," the only method of locking a nut to the bolt.

PATENTED June 16, 1868.



IMPROVED August 23, 1870.

Unequalled for Cheapness, Simplicity and Effectiveness.

DESCRIPTION.—A pointed copper key is placed in a groove cut in the threaded part of the bolt, *over which* the nut is screwed to its position, cutting its own thread in the copper, thereby taking up all the slack between the bolt and the nut. By riveting up against the face of the nut the projecting portion of the copper key, the nut is firmly locked in its position, but can be readily adjusted or removed with a wrench without injury to either bolt or nut.

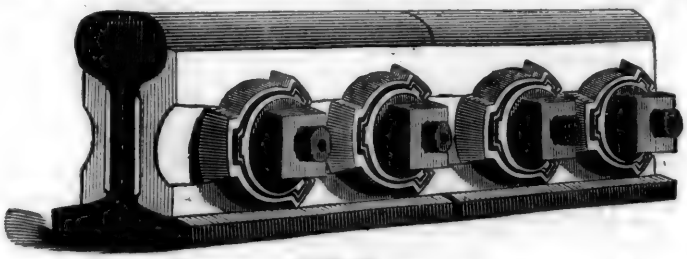
Severely tested for over *four years*, they have *never failed*, and are *now in use on over fifty Railroads*, giving perfect satisfaction. We solicit a trial *anywhere*.

Licenses Granted to R. R. Companies, Car Builders and others.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Pennsylvania and Delaware Railway.

The Pennsylvania and Delaware Railway connects with the Pennsylvania Railroad at Pomroy, about forty miles from Philadelphia, from which point it runs a southeast course, following the line of Buck creek, crossing Doe run, and after passing over Pusey's Summit, intersects White Clay creek, which it follows to Newark, Del. Before reaching Delaware City, the Christiana creek and the waters of Red Lion are crossed. The first town of any size on the new road after leaving Pomroy is that of Chatham containing about 500 inhabitants. A short distance south of this Avondale is reached, at which place the Baltimore Central Railroad is crossed. Landenburg, a few miles further down the White Clay creek, is the present terminus of the Wilmington and Western Railroad, and with this the Pennsylvania and Delaware Railway connect. Newark, Del., is immediately on the line of the road, and here a connection is made with the Philadelphia, Wilmington and Baltimore Railroad. At Kirkwood trains also connect with the Delaware road. The entire distance from Pomroy to Delaware City is 40 miles. A train of cars passed over the entire road on the 23d ult. The Pennsylvania Railroad is about to lease the new road. An extensive wharf and a large quantity of land in the immediate vicinity of the wharf has been purchased by that company.

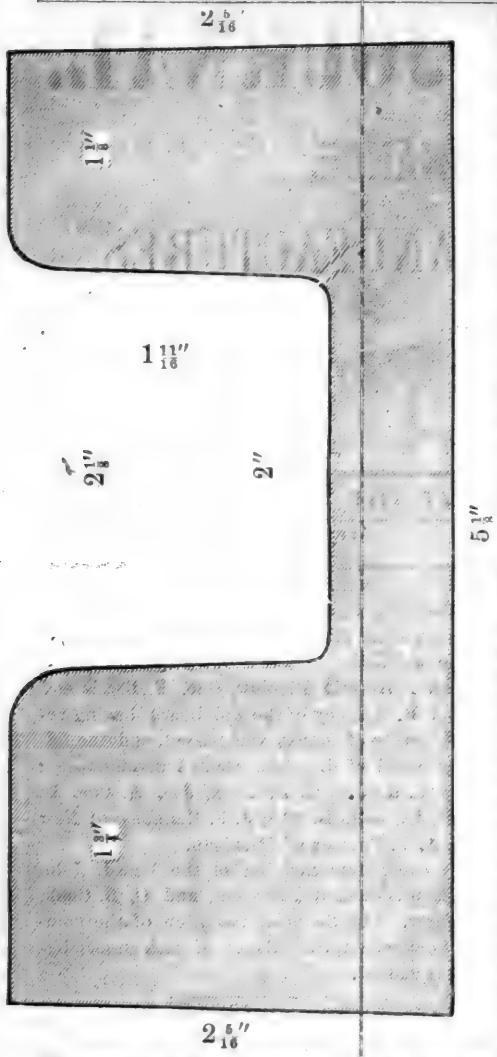
Allouez Mining Company.

The annual meeting of the stockholders of this company was held in Boston on the 9th inst. and the large number of 14,075 shares out of 20,000 was represented. The Boston *Journal* says that the attendance of stockholders in person was unusually large, and all went away well pleased with the present and future prospect of their property. The agent, A. P. Thomas, made a report, giving the details of operations thus far, which showed that the mine was rapidly approaching the period when the shareholders may look for a return for past outlays. At present the three shafts are down an average of 168 feet, the deepest being 216 feet. By the first of January next the connections will be made at the third level and the mine be ready to commence the business of stoping or taking out Copper, when it is expected that dividends will be earned from the first six months' product. The lode, or vein, is 28 feet wide, with an average of 12 feet productive ground. The agent gives 2 per cent as the minimum percentage of Copper, but feels confident that it will be much higher, and even at 2 per cent the mine would pay a large profit owing to the great width of vein and the ease with which it can be worked.



Messrs. Horatio Bigelow, Geo. F. Bemis and Samuel R. Spinney of the old board having resigned, a vote of thanks was passed, and the following board of directors elected unanimously: James P. Brewer, O. B. Cook, Jas. A. Coe, D. Nevins, Jr., John Brooks, J. F. Emmons of New York; A. P. Thomas of Michigan.

At a subsequent meeting of the board, John Brooks was elected President, and O. B. Cook, Treasurer. The financial condition of the company is excellent, the balance of cash assets being $51,923 97.

Fairbanks' Scales.

There are but few persons who have not had the opportunity of seeing or at least hearing about Fairbanks' scales, but there is a very considerable number not aware of the place where they are manufactured, or the extent of the establishment which turns out so many of these indispensable articles. Mr. Fairbanks the inventor of the scales which bear his name, and which have become familiar in all quarters of the globe, commenced business in a small way at St. Johnsbury, Vt., about thirty years since. So rapidly did the trade develop under energetic management that the establishment to-day covers ten acres of ground, furnishes employment to six hundred men, and manufactures upward of fifty thousand scales annually, embracing three hundred varieties, from the most delicate standard of the druggist or banker, to the ponderous hay, railroad-car or canal boat scales, weighing five hundred tons at a time. The yearly sales of the establishment amount to $2,000,000. The products are shipped to every quarter of the globe, and it is estimated that 300,000,000 of the world's population have adopted the Fairbanks' scale as a standard of accuracy. The Scales have come off victorious in the numerous competitions for prizes, and at the great Paris Exposition they received the highest premium over thirty three manufacturers from all parts of the world.

The constantly increasing demand for the scales in this country has necessitated the opening of branch establishments in all the large cities. A list of the principal of these will be found in their Advertisement on page 545 of this week's issue.

Wharton's Rolled Bessemer Steel Grooved Rails for Railway Curves.

PATENTED JUNE 4, 1872.

We give above a cross-section of the Wharton Steel Rail for city railway curves, to supersede the necessity for a guard rail, and to facilitate the laying of rails around street corners. The paving can be made flush with the rail. The inventor, Mr. Wm. Wharton, Jr., the inventor of the now celebrated Safety Switch, manufactures these curved rails to order with any required radius, at his factory, southeast corner of Washington avenue and Twenty-fifth street, Philadelphia, and of any lengths not exceeding 25 feet, all ready to lay down without cutting. Special attention is given by him to the fitting up of tracks and curves, including frogs and switches, for depots, warehouses, wharves, &c.

As these curved rails are made of rolled Bessemer steel, and from a mere glance at the wood cut section above, it is easy to see the economy of their use in comparison with that of the common form of iron tramway bent rudely to fit the sharp curves of street railways. Their economy and durability have already been tested; for there are at least a thousand of them in use on city railroad tracks, although of a lighter pattern than the above. The steel grooved rail is even cheaper in first cost than where an additional T rail is employed as a guard, four rails being reduced to two; to say nothing of the extra labor of laying down in the latter case. The rolled and grooved steel rail is lighter, and, therefore, cheaper also than curved cast iron rails.

The weight of the rail shown above is 80 lbs., and it price 8 cents per pound, cash paid, at the works, and it is delivered curved to any radius, cut to lengths ordered, fitted, and drilled for spikes ready for use. But if flat Bessemer steel rails be wanted for the outside rail of the curve they will be furnished.

Address WM. WHARTON, JR., Post Office Box 2745, Philadelphia, Pa.

Ohio Railway Lease Bill.

The following is the exact text of the bill passed by the Ohio Legislature on the 14th ult., to which reference was made in our last issue:

A BILL to amend section twenty-four of an act entitled "an act to provide for the creation and regulation of incorporated companies in the State of Ohio," passed May 1st, 1852; (S. and C. page 271,) and supplementary to said act.

SECTION 1. Be it enacted by the General Assembly of the State of Ohio, That section twenty-four of the above recited act be so amended as to read as follows:

SECTION 24. Any railroad company heretofore or hereafter incorporated, may at any time, by means of subscription to the capital stock of any other company or otherwise, aid such company in the construction of its railroad for the purpose of forming a connection of said last mentioned road with the road owned by the company furnishing said aid, where the road of the company so to be aided does not form a competing line; or any railway company organized in pursuance of law may lease or purchase any part or all of any railroad constructed by any other company, if said companies' line of said road are continous or connected and not competing as aforesaid, upon such terms and conditions as may be agreed upon between said companies respectively, or any two or more railroad companies whose lines are so connected and not competing may enter into any arrangement for their common benefit, consistent with and calculated to promote the objects for which they were created; Provided, that no such aid shall be furnished, nor any purchase, lease or arrangement perfected until a meeting of the stockholders of each of said companies shall have been called for that purpose by the directors thereof, on thirty day's notice to each stockholder, at such time and place, and in such manner as is provided for the annual meetings of said companies, and the holders of at least two-thirds of the stock of each company, in person or by proxy, shall have at such meeting assented thereto; and provided, that in case of the lease of any railroad situate in whole or in part within this state, the rental reserved and secured for said leased road, shall be equal to at least the net earnings of such leased road for the fiscal year next preceding the one in which said lease is made.

SEC. 2. Any stockholder who shall refuse his assent to said lease, and signify the same by notice in writing to the lessee or lessees within sixty days thereafter, shall be entitled to demand and receive from such lessee or lessees previous to such lease, purchase or arrangement being consummated, the average market value of his stock for six months next preceding the day of the meeting of the companies at which said lease is approved as aforesaid on the surrender of his stock. If the stockholder and the lessee cannot agree as to the value of the stock, it shall be lawful for the parties to submit the question to arbitration, which arbitration shall be conducted in accordance with the provisions of the law in force regulating arbitrations (so far as the same may be applicable,) by three disinterested persons to be appointed upon the motion of either of the parties by the judge of the court of common pleas of the county in which the person owning the stock shall reside, or in case he be a non resident of the state, or any county through which said road shall pass, then in the county in which the principal office of the company shall be kept, and if any such stock holders shall refuse to submit the question to arbitration, the proper judge shall, upon the application of any director of either companies to the contract, appoint the arbitrators, who shall proceed to ascertain the value of the stock in the same manner as if the question had been submitted by consent of both parties, and if the party owning the stock shall refuse to receive the amount so awarded in any case provided for in this section, it shall be lawful for the company to deposit the same with the clerk of the court of common pleas of the county in which the arbitration shall be held, which deposit shall operate the same as if payment was made to the owner of the stock.

SEC. 3. In all cases of arbitration under the provisions of the foregoing section, it shall be the duty of the party desiring such arbitration to give the opposite party at least ten days' notice of his intention to apply to the judge for the appointment of the arbitrators, which notice shall be served in the same manner as is provided for the service of a summons, and shall specify the time and place of the hearing of such motion; Provided, that in cases of non-residents the notice shall be by publication made in the same manner and for the same time provided by the code of civil procedure.

SEC. 4. No railroad company in this state shall lease the road of said company to any other railroad company, unless the lessor shall require and receive full and adequate security for the payment of the rental and for the preservation of the property of said lessor, in as good condition as on entering into possession.

SEC. 5. That original section twenty-four is hereby repealed, and this act shall take effect and be in force from and after its passage.

Sec. 6. Provided that any corporation of the State, organized prior to the present constitution, taking any action under or in pursuance of any of the provisions of this act, shall thereafter and thereby be deemed to have constituted to be, and to have and exercise all and singular its franchises as a corporation, under and by virtue of the present constitution and laws passed in pursuance thereof of the State and not otherwise.

Northern Central Railway.

We gave in our issue of March 15th the Report of the President of this company for the year ending December 31, 1872, showing the receipts from operations of the road to have been $4,598,820 19, the operating expenses $3,437,050 97, and the net revenue $1,161,769 22. From the Treasurer's statements, which have since been received, we learn that the receipts and expenses were apportioned as follows:

RECEIPTS.

Main Line	$3,095,602 50
Shamokin Division	309,361 86
Elmira Division	580,299 79
Chemung Division	227,236 15
Canandaigua Division	386,319 89
Total earnings	$4,598,820 19
Capital stock issued	240,300 00
Consolidated mortgage bonds issued	197,000 00
Income convertible bonds issued	439,000 00
Income bonds issued for stock of Chemung R. R. Co., and Elmira, Jefferson and Canandaigua R. R. Co.	2,750,000 00
Floating debt—increased	816,810 40
Total	$8,541,930 59

EXPENDITURES.

Main Line	$2,289,136 98

Interest, dividends, &c., Elmira and Williamsport R. R.	165,000 00
Interest, Chemung R. R. and Elmira, Jefferson and Canandaigua R. R.	146,681 00
Rent, Elmira, Jefferson and Canandaigua R. R.	25,000 00
Sinking funds	64,000 00
Construction	172,975 83
Real estate	9,108 94
Equipment	173,688 32
Stock of Chemung R. R. Co., and Elmira, Jefferson and Canandaigua R. R. Co	2,750,000 00
Profit and loss account, charged for rebuilding ten spans of Dauphin Bridge, destroyed by fire, increased cost of steel rail, and discount on bonds	499,082 52
Total, as above	$8,541,930 59

From the Report of the Superintendent we learn that the company have 140 locomotives—84 on the Main Line, 46 on the Elmira and Canandaigua Division, 9 on the Shamokin Division, and 1 on Baltimore and Potomac Railroad. The car equipment consists of: 69 passenger, 22 baggage, 16 express, 4 postal, 995 box, 544 gondola, 51 stock, 101 box and stock, 38 stone, 4,275 coal, 185 lime, 11 tool, and 60 freight, and 4 M. of W. cabooses. The mileage of locomotives was as follows:

	Main Line.	Shamokin Division.	E. & C. Division.
Passenger	584,308	31,492	337,251
Ballast	44,195	.....	1,285
Freight	1,479,766	171,460	684,186
Total	2,108,269	202,952	1,022,722

—the total mileage being 3,333,943, against, 2,962,398 in 1871 an increase of 371,545.

There were carried during the year 1,110,110 passengers an average distance of 26.43 miles, or 29,348,564 passengers carried one mile. The tonnage for the year aggregated 4,769,895 tons hauled an average distance of 41.69 miles, or 198,888,911 tons hauled one mile.

The tonnage on the Main Line and branches for the year compare with 1871 as follows:

	1871.	1872.
Main Line	1,964,013	2,062,050
Shamokin Division	750,445	683,631
Elmira Division	360,870	402,460
Chemung Division	311,127	856,020
Canandaigua Division	774,945	765,734
Total	4,161,400	4,769,895

—showing an increase in tonnage of 608,495 tons.

The financial condition of the company, December 31, 1872, was as follows:

ASSETS.

Railway and appurtenances		$10,535,909 31
Canton Extension		334,356 83
Real estate		796,563 88
Equipment		3,223,407 73
		$14,890,237 75

The officers of the company for 1873, are as follows:

President.—J. D. Cameron.

Vice President—J. N. Dubarry.

Directors.—Wm. Colder, A. E. Kapp, George Small, Edward C. Biddle, John M. Kennedy, B. F. Newcomer, Henry Welsh, Thomas A. Scott, Jacob P. Jones, Wistar Morris, S. M. Shoemaker, Strickland Kneass.

Secretary.—Robert S. Hollins.

Treasurer.—J. S. Leib.

Auditor.—Stephen Little.

General Superintendent.—A. R. Fiske.

☞ The U. S. Supreme Court has decided in the case of Ripley, Administrator, v. The Railway Passenger Insurance Company of Hartford, that there can be no recovery of the amount of the policy as the deceased was not at the time of his death on a public or private conveyance, but after traveling from Grand Haven to Dalton, Michigan, was walking home after midnight and was waylaid and beaten to death; the Court holding that walking is not traveling by public or private conveyance. Private conveyance naturally suggests a vessel or vehicle belonging to a private individual.

New York and New England Railroad.

It is intimated that the New York and New England Railroad Company, which succeeds to all the rights and franchises of the Boston, Hartford and Erie Railroad Company, is largely controlled in the interest of the Eastern Railroad. The President of the Eastern is one of the principal stockholders of the New York and New England Road, and was quite active in the meeting Thursday. Other Eastern Railroad men are said to be holders of stock in the new company. So far as known at present no definite plan has been laid out, but it is believed that the Eastern Railroad officials are very anxious to control a through line from Portland to New York, and the old Hartford and Erie offers about the only feasible route. A bill is now before the Legislature to authorize the Union Freight Railroad to draw passenger-cars over its tracks, and if that bill becomes a law it will be a very convenient method of transferring passengers from the Eastern Road to the New York and New England without their leaving their seats. Of course, if such is the design of the Eastern Road the completion of the route to New York will be pushed forward as rapidly as possible.—*Boston Herald, Apl.* 19.

Shenandoah Valley Railroad.

The Shepherdstown (W. Va.) *Register* says that the contracts for the construction of the second division of the Shenandoah Valley Railroad, between Riverton and Luray, Va., have been assigned. It is expected that the work will be commenced by the contractors with a large force on every section, and that it will be pushed to completion at the earliest possible time. The masonry for the bridge over the Shenandoah river, at Riverton, will be commenced as soon as the water shall have fallen to its ordinary stage. It is expected that the remaining sixty miles between Luray and Fisherville, on the Chesapeake and Ohio Railroad, will be put under contract by the first of June.

☞ The Richmond (Va.) *Whig* says "that only about $120,000 has been paid at the State treasury in interest on the State debt. This is two per cent for six months on only $6,000,000. The bondholders do not seem eager to take their interest in this way, preferring (notwithstanding the agreement entered into at the conference between a committee of the Legislature and certain representatives of the bondholders) to use their coupons in payment of taxes and other demands due the State. It thus happens that there is still about $1,200,000 in the State treasury, notwithstanding the diminished cash receipts by reason of the payment of taxes, &c., in coupons."

☞ The annual meeting of the Cary Improvement Co. was held in Boston on the 1st inst. The report of the Treasurer showed the receipts for the year to have been $216,257 52; expenditures, $214,307 84; balance on hand, $1,949 63; assets, $302,518 68; liabilities, $165,951 46, and about 10,000,000 feet of land. The following officers were unanimously elected; Directors, A. P. Blake, S. Willard, William Pratt, Thomas Hope, R. A. Richards, John C. Jones; President, S. Willard; Secretary, W. Pratt.

☞ Mr. W. A. Brooks and Mr. C. A. Alberga, the engineers sent out to report to the bondholders on the Honduras Interoceanic, have returned to England by the Nile. They report the railway in good working order, and have left Mr. George Innes and a competent staff to carry on the increasing traffic over the open portion.

Athens and Lamia Railway.

A surveying party, headed by M. Roussin, engineer of the Enterprise Generale of Roumelian Railways, has just returned from Greece, where it has lately explored the country through which the railway from Athens to Lamia is destined to pass. The valleys of the Cephissus and Oropos and the plains of Livadia were visited in succession by the railway explorers, who, after traversing the Pass of Thermopylæ and the Valley of Ellada (Spercus), finally reach Lamia. From thence they crossed the mountain chain which constitutes the frontier line between Greece and Turkey, and penetrated into Thessaly as far as Lake Nitziro, the survey covering altogether a distance of some 162 miles. On their return to Athens, the engineers traversed the coast of the Atalanta Channel, passed through the town of the same name and the valley of Fouilpula, adjoining that of the Cephissus. Here they resumed their original route as far as Thebes, and from thence continued their journey to Athens by way of the Kassa Pass, Paleo Kontura, Mandra, and Kontura —a line of route somewhat shorter, but presenting much greater engineering difficulties than that which has been traced out of the projected railway through the Cephissus and Oropos valleys.—*Levant Herald*, Apl. 2.

Railroads vs. Express Companies.

In October last a bill in equity was filed in the United States Circuit Court by the Adams Express Company against the Philadelphia and Reading Railroad Company, complaining that the defendants were interfering with the business of the Express Company; that the Adams Express Company was organized under the laws of the State of New York, duly authorized by said laws to sue in the name of its president, and that the defendants were created by an act of the General Assembly to build a railroad between given points for the conveyance of passengers and transportation of the mails, or of goods, wares, merchandise, minerals, &c.; and that the act fixes the price at which any species of merchandise shall be transported; further, that there had been established for many years past an extensive business in this district and county as well as elsewhere, known as the express business, carried on by individuals and corporations, arising from the limitation of the proper business of railroads; that the express business is valuable from the responsibility with which it is conducted and the facilities it affords, &c.; that the defendants, without any charter or other authority, and in violation of the rights of the Adams Express Company, established the express business, and were carrying express matter, and had denied the complainants the facilities heretofore enjoyed by them. The Court was asked to restrain the Philadelphia and Reading Railroad Company, its agents and servants, from carrying on the independent express business of collecting, transporting and delivering express matter beyond the termini and to and from the stations.

Yesterday, opinions were delivered by Judges McKennan and Cadwallader, refusing the injunction asked for. Both entered very fully into the merits of the question in dispute. Judge McKennan said that the purpose of an injunction was to protect vested rights from injury and to prevent wrong; it was intended that a preliminary injunction should preserve matters as they were when it is sued, and not to undo what had already been done; and in order to claim the benefit of this remedy the party must show a clear interest in danger of being injured. If the defendants should attempt to exercise any franchise not conferred by their charter, it was for the Express Company to call them to account, for they had no interest or authority that would entitle them to question the defendants' acts, unless they were in direct conflict with the rights of plaintiff. I find that, possessing the right, the defendants seek to appropriate the profits of a business of which the Express Company had previously a monopoly, the defendants do not thereby incur a liability to the Express Company.

Their relations to each other arise out of the defendants' character as common carrier, and the Express Company has a right to complain only of a refusal or failure to perform any of the duties required of them by law to the complainants as shippers. The transportation of freight has not, and cannot be, refused by them—and therefore, they are not entitled to the relief prayed for.—*Phila. Ledger, Apl.* 26.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF-YEAR ENDING JANUARY 31, 1873.

The receipts on capital account during the half-year to January 31, 1873, amounted to £323,336, arising as follows:—

Five per cent preference stock, in full of final instalment	£43,022	
Six per cent bonds in full of issue	250,000	
8,300 reserved ordinary shares sold	170,150	
Shares issued on conversion of preference stock during the half year at the rate of 5 shares for every £100 stock:—£94,720 stock converted into 4,736 shares of £20 each	£97,088	
Less preference stock cancelled on conversion	94,720	2,368
		£465,540
Deduct final series of 4 per cent bonds paid 1st January, 1873		142,204
		£323,336

The total receipts to capital account amounted on January 31, 1873, to £6,896,694. The charges to capital account during the half-year amounted to £634,664; of this sum the engineer's report shows an expenditure for roadway, sidings, station buildings, &c., and a proportion of the cost of steel rails laid in the track, amounting altogether to £54,782. There has been further expended on capital account for land purchased at Detroit for new freight warehouse, land for new car shops and additional sidings at London, &c., £5,950; also for additional equipment—for locomotives, £100,734; for cars, £97,549; for the Glencoe loop line, £362,987, and for new car ferry boat, £4,420. The total expenditure to January 31, 1873, amounted to £6,788,335, leaving a balance at credit of capital account of £108,359. The receipts and expenditure on revenue account for the half-year have been as follows:—

Gross receipts		£595,840
Working expenses, including renewals and all charges		376,513
		£219,327
From which is deducted—		
Interest on bonds, &c.	£37,585	
Discount and charges on conversion of American currency	33,182	
Amount set aside for renewal of ferry steamers	3,000	
Alteration of gauge account	9,100	
		82,817
		£136,509
Add profit on working Galt and Guelph railway	£1,904	
Balance of interest account	2,319	
		4,223
		£140,732
Add surplus from last half-year		1,486
Amount available for dividend		£142,218

The dividend for the half year on the 5 per cent preference stock amounts to £5,802; and from the balance the directors recommend a dividend on the ordinary shares at the rate of 6 per cent per annum, payable in London on the 22nd April, which will absorb £132,534, leaving £3,882 to be carried forward to next half-year. The aggregate revenue receipts (exclusive of those of the Galt and Guelph, the Wellington, Grey, and Bruce, and the London and Port Stanley railways) exhibit a gross increase of £68,490, which consists of—

Increase in way passenger traffic	£13,167
" through passenger traffic	14,552
" way freight & live stock traffic	6,888
" through freight and live stock traffic	32,922
" mails and express freight	962
	£68,490

The way or local business amounted to 41.35 per cent of the whole earnings of the line as compared with 42.56 per cent in the corresponding half year. The through traffic represented 58.65 per cent, against 57.44 per cent. Freight rates, both through and local, have not materially differed from those in force last half year. The earnings have been seriously diminished by reason of the ice blockade in the Detroit river, which existed more or less, for two months, preventing the regular transport of the through business, and much interfering with the local traffic. During the past winter there have been at times no less than 1,200 to 1,500 cars on each side of the river, delayed twelve or fifteen days awaiting ferriage. In order to mitigate this difficulty in the future, another car ferry boat is in course of construction, which will be available for the next winter's traffic. The receipts and ordinary working expenses per train mile for seven corresponding half-years, compare as follows:—

Half-year ending	Gross earnings per train mile. s. d.	Working expenses per train mile. s. d.
Jan. 31, 1867	9 9	4 7¼
" 1868	9 7¼	4 5¾
" 1869	9 0¼	4 3¾
" 1870	8 7¼	4 9¼
" 1871	7 9	4 6¼
" 1872	8 0¼	4 8
" 1873	7 10	4 9¼

The great increase in expenses, and consequent decrease in net earnings, is attributable to two causes—the extraordinary severity of the weather during this winter, which has equally affected all the railways in this section of the county, and the advance in wages and in the price of stores and supplies has affected Canadian as it has English railways. The increase in wages alone in the departments connected with working the railway has amounted to no less than £24,127, or an advance of 22 per cent in excess of the corresponding half-year. The accumulation of ice in the Detroit river augmented the ferriage expenses to the extent of £7,057, or 97 per cent above the similar expenditure in the corresponding period. The following table exhibits the receipts and expenses for seven corresponding half-years:—

RECEIPTS.

Half-year ending	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
Jan. 31, 1867	168,986	161,254	1,273	331,513
" 1868	186,537	213,476	800	400,813
" 1869	186,703	238,764	846	423,312
" 1870	183,741	239,535	907	424,183
" 1871	173,170	270,464	716	444,349
" 1872	194,823	331,763	766	527,352
" 1873	232,504	371,573	763	595,840

EXPENSES.

Half-year ending	Including renewals. £	Per cent of gross receipts.
Jan. 31, 1867	166,632	50.26
" 1868	193,667	48.31
" 1869	209,752	49.55
" 1870	243,380	57.37
" 1871	267,481	60.19
" 1872	313,636	59.47
" 1873	376,513	63.19

The discount and charges on the conversion of American currency for the half-year amounted to £33,182, as compared with £27,819 in the corre-

sponding half-year. The conversions were made at an average of 113 7-10, the average price of gold for the half-year being 113¼. Following the system commenced last half-year, there has been charged to the half-year's revenue the estimated loss on the balance of American funds in hand to Jan. 31, 1873, although unconverted at that date. The ferry steamers' renewal fund has been credited with the usual half-yearly amount and accrued interest, and after deducting the cost of constructing the car ferry steamer Transit, there is a balance at the credit of the account of £16,412. The sum of £9,100, being the same half-yearly amount as heretofore, has been charged against revenue toward defraying the cost of change of gauge, the account for which now stands as follows:—Total cost chargeable to change of gauge account, £88,140; charged against revenue during two years to January 31, 1873, £36,400; remaining yet to be charged, £51,740. Therefore, the annual sum of £18,200 applied over the next three years will more than suffice to meet the total cost in the five years, as originally estimated. It has been found necessary, in consequence of the inadequate supply of narrow gauge rolling stock, to defer removing the third or outer line of rails between London and Hamilton until the spring, the pressure of the winter's business requiring the use of the broad guage locomotives on that portion of the line. The charges for repairs and renewals of rolling stock have been continued at the fixed mileage rate as in the two previous half-years. There has therefore been charged £11,422 for locomotive repairs, and £3,272 for car repairs, more than the amount expended, leaving a balance at credit of locomotive renewal fund, with accrued interest, at January 31, £20,096; and at car renewal fund, £8765; making a total of £28,861 standing at the credit of a suspense account for re construction and renewal of engines and cars at January, 1873. The main line is now laid with 154 miles of steel rails, leaving 75 miles of iron to be replaced by steel this year. It will be seen that the effect of the use of steel rails is be ginning to have a sensible influence upon the expenditure of this department. The first steel rails laid down three years ago on the heavy gradients are still wearing satisfactorily, whereas the iron rails formerly used on the Copetown incline failed before they had been twelve months in the track. The pressure of the through traffic during the past six months has entirely overtaxed the utmost resources of the railway. The gross earnings of the main line during the half-year have amounted to $11,165 per mile of railway, Some relief will be derived from the loop line, which was partially opened at the end of February last; but to enable this additional traffic to be economically and expeditiously carried, it will be necessary to double the existing main line from Windsor, its western terminus, to its junction with the loop line at Glencoe, a distance of 80 miles—to lay down additional siding accommodation, and to provide further equipment of rolling stock for use on the whole system. The ordinary general meeting of shareholders will be made special, at which the directors will ask for power to raise additional capital to the estimated amount of £1,000,000, for the purpose of doubling the western portion of the line; to provide a further increase of rolling stock; and for other works rendered necessary for the future expected increase of traffic. The Wellington, Grey, and Bruce Railway is now in operation, and worked by this company from Guelph to Southampton on Lake Huron, a distance of 1024 miles. The same working agreement has been entered into for the South Bruce division of that line, from Palmerston to Kincardine, which is also a port on Lake Huron. This line will be 67 miles in length, and it is expected to be completed in the ensuing season. The interchanged traffic derived from the Wellington, Grey, and Bruce Railway has increased the Great Western main line earnings by £12,349, and the traffic brought on to the Galt and Guelph Railway has resulted in a profit on the working of that line of £1,904. A line of railway under the title of the London, Huron and Bruce Railway Company is in course of construction, commencing near London on the Great Western main line, and extending to Wingham, a station on the Wellington, Grey and Bruce Railway, a distance of about 70 miles. An arrangement has been proposed to this company to work the line, when completed, at 70 per cent of its gross earnings, and to appropriate a sum equal to 20 per cent of the traffic interchanged between the two companies, to be applied to the acquirement of the bonds of the London, Huron and Bruce Company at par—the issue of which is limited by their charter to $12,000 per mile. The directors recommend this for adoption. Since the issue of the last report, many difficulties have arisen in the prosecution of the drainage tunnel under the Detroit River, which was being undertaken at the joint expense of the Michigan Central and Great Western Companies. Should these difficulties prove to be insurmountable, it will be necessary to consider the alternative of the construction of a bridge by the two companies, which it is estimated can be built at a less cost and with less delay than the tunnel. It is of the most vital importance to ensure an unbroken through communication during winter with the Western States. The directors are glad to report continued unanimity to exist with the American railways in connection with this company; and it has been mutually agreed with the Michigan Central Company that an adequate supply of rolling stock is to be provided by both companies, in order more efficiently to carry out the one purse system for the division of through traffic under the ten years' agreement. The last half-year's report mentioned that an arrangement had been negotiated with the Grand Trunk Company concerning the joint proprietorship of the International Bridge at Buffalo, in course of construction. The board have now to report that the Grand Trunk Board declined to seal the agreement drawn up by their own solicitor, without a preliminary payment of £20,000 by this company; which the directors having then no power to make, the Grand Trunk Company withdrew from the proposed agreement. The receipts and expenditure of the Detroit and Milwaukee Railroad have been as follows for the year ending December 31st, 1872:—Receipts, £283,891; expenses, taxes, &c., &c., £193 037; balance to meet interest on bonds, £90,764. Unfortunately the entire stoppage of the through traffic, owing to the harbors of Milwaukee and Grand Haven being frozen up during the past winter, has seriously impaired the earnings of the company; but as this is a state of circumstances very rarely experienced, it should not be regarded as a permanent weakness of the company.

The Clifton Forge Railroad.

President Huntington, of the Chesapeake and Ohio Railroad, in answer to a letter from Col. Lamb, of Norfolk, Va., upon the subject of the Clifton Forge (Va.) Railroad, says:

"I would say that I cannot at this time answer your inquiries as fully as I would like to, as we have not the necessary surveys on which to base our action. I will say, however, in a general way, that the Chesapeake and Ohio Railroad will, as soon as they get some other interests closed up, make a thorough survey from Clifton Forge out to the Chesapeake Bay, and as soon thereafter as circumstances will permit, they will build a road from Clifton Forge to Lynchburg, there to connect with other roads, or else build a road of their own to deep water. In whatever we do we shall, of course, be governed by the best interests of the southeastern portion of Virginia, as well as of the Chesapeake and Ohio Railroad Company."

☞ The South Simcoe Junction (Ca.) Railway Company has been formed, and stock to the amount of $60,000 subscribed—an amount sufficient to enable the company to organize under the charter. A general meeting for the election of directors will shortly be held.

Wilmington and Reading Railroad.

The Wilmington and Reading Railroad Extension—first from Birdsboro' to Reading and thence to the Lehigh river—is advancing rapidly toward a successful completion, and has, within a few days, made several important steps of progress.

The contracts for the graduation and masonry of the upper half of the Berks County Railroad, (referred to above as the extension from Reading to the Lehigh,) were arranged last week. This portion is between Lenbartsville and Slatingville, and is generally light work, which can be rapidly prepared for the track.

Financial arrangements between the Wilmington and Reading and the Berks County corporations were also consummated, by which nine miles of road between Birdsboro and Reading will be promptly built. Considerable work is done, and the iron to put down the track is already provided, but a heavy rock cutting has impeded progress. This will now be promptly finished, and in four months it is expected that the trains will run direct between Birdsboro and Reading, over the extension, without using as now, the tracks of the Philadelphia and Reading Company.

Another important matter is the sale of all the remaining second mortgage bonds of the Wilmington and Reading Railroad. The improving prospects of the road have now enabled the company to place the whole of them on satisfactory terms, and enable it to perform all its part of the development and extension.

The Pennsylvania Legislature has presented to the Berks County Railroad the right of way through the City of Reading. The right of way is given through Front street, the same on which the Berks County road proposed to lay its rails several months ago, under authority of the Reading City Councils.

Within a year, it is confidently hoped to have our whole line, of one hundred miles, between Wilmington and the Lehigh Coal Region, via the great manufacturing district of Reading and vicinity, completed and ready for operation.—*Wilmington Commercial.*

Improvements on the Delaware.

The Pennsylvania Railroad Company are enlarging their elevator at Washington-street wharf, and when it is finished will be prepared to receive and ship twice the amount of grain formerly done. As it is a matter of great importance, on account of the immense quantity of grain that will be shipped from that point, to have the most accurate and durable railroad track and hopper scales, care has been taken to make a proper selection among the different makes, for a few pounds on each draught from the actual standard weight would amount to tons during the year. We are glad to state that the contract has been awarded to our fellow-townsmen, the Messrs. RIEHLE BROTHERS, proprietors of the "*Philadelphia Scale Works*," who have made rapid strides toward perfection in the art of making scales. This firm deserve patronage and encouragement for their untiring energy and enterprise in the face of the strongest opposition.—*Phila. North American.*

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending April 19, at 372,576 tons, and for the coal year at 4,413,786 tons, against 4,422,980 tons to corresponding time last year, being a decrease of 9,194 tons. The bituminous tonnage for the week is 59,344 tons, and for the year 534,928 tons, giving a total of all kinds for the week of 431,920 tons, and for the year 4,948,714, tons, an increase as against production to same time last year of 76,024 tons.

☞ The estimated earnings of the Kansas Pacific Railway for the week ending April 15 are: freight, $48,888 59; passengers, $33,499 41—total, $82,388 10, an increase over corresponding week of 1872 of $8,990 48.

Imports of Iron and Steel.

Dr. Edward Young, Chief of the Bureau of Statistics, Treasury Department, Washington, D. C., has furnished for publication the following statement of imports of iron and steel, and manufactures thereof, during the year ended December 31, 1872:

Pig iron, tons	591,934,780	$7,269 850
Castings, tons	814,265	38 564
Bar iron, tons	179,152,186	4,837,832
Boiler iron, tons	1,369,158	59,993
Band, hoop and scroll iron, tons	24,759,754	748,509
Railroad bars or rails,		
Of iron, lbs	762,128,379	14,498,612
Of steell, lbs	299,571,205	8.207.013
Sheet iron, lbs	20,298 100	1,263,112
Old and scrap iron, tons	248,444	7,617,468
Anchors, cables, chains of all kinds, lbs	71,751,141	622,908
Hardwares		325,208
Fire arms		811,972
Steel ingots, bars and wires		4.106,087
Cutlery		2,272,467
Files		676,814
Saws and tools		476,927
Other manufactures, not specified		6 743,183
Total imports		$60,575,514

☞ The Harrisburg Car Manufacturing Company, at Harrisburg, Pa., is now filling orders for stock cars for the New York Central and Hudson River Railroad; gondolas for the Pennsylvania Railroad; iron tank oil cars for the Union Tank Line, and eight-wheel iron-bottom coal dump cars for the Westmoreland Coal Company. Twelve cars per day are turned out. The officers of the company are: Wm. Calder President, and W. T. Hildrup Superintendent.

☞ The Staunton *Valley Virginian* says that the business of the Chesapeake and Ohio Railroad is rapidly increasing. Cars are passing east and west much more frequently than heretofore, and as a slight indication of the enlargement of the commerce over it, we may mention that there lie over at this depot each night eight engines. Before the completion of the road from two to four was the average.

☞ Coupons due May 1 on the Income and Extension Bonds and on the Equipment Bonds of the Trustees and Managers of the Vermont Central and Vermont and Canada Railroad will be paid at their office, No. 18 Sears Building, Boston.

☞ The bondholders of the Queen Anne's and Kent Railroad have instructed their Attorney, John B. Brown, Esq., to file a bill for the sale of the road for overdue interest on their bonds. The amount claimed is $12,000.

☞ The Fairbanks Scale Works, St. Johnsbury, Vt., have received a $30,000 order from the Russian government, for scales to be used in custom houses and on railroads.

☞ The New York canal commissioners have designated the 15th of May as the time when navigation on the canals will be resumed. The Oswego canal, which has been damaged, is excepted.

☞ The Pittsburgh, Virginia and Charleston Railway has been opened as far up as Dravosburg, opposite McKeesport, and trains are now running regularly to that point.

New Jersey Railroads.

Movements are already making under the General Railroad law of New Jersey. Among the announcements made of operations begun we notice that of the re formed National Railway Company of New Jersey, under renewed articles of association. Its charter runs for fifty years. The road is to extend from some point on the Hudson river or New York Bay through Bound Brook to the Delaware river at Yardleyville, a distance of sixty miles. The capital stock is $7 500,000. The necessary papers, it is said, have all been filed, and the company will at once take all the property of the National Company and proceed to complete the road. It is said that the company expects to have cars running from Philadelphia to Bound Brook by July a year. Equally prompt with this new road and opposition line to New York, the Pennsylvania Railroad Company has taken action, and the Trenton *Sentinel* says it means business, and intends to proceed, under what is termed the New Jersey Railway Company, to construct a through road from the Delaware river, at a point four miles above Trenton, by way of Bound Brook and Newark to Jersey City. The road will run at some places directly alongside of the National Railway Company's proposed road, and will as sure a sharp competition for the local travel and freight taking that route. At the Delaware river the road will connect with one said to be already chartered by the Pennsylvania Legislature, and will thus reach this city. A number of the leading capitalists of New Jersey have already identified themselves with the enterprise, but it is understood that it will be under the control of the Pennsylvania Railroad, which company finds it absolutely necessary to have largely increased facilities for the accommodation of the business which it accumulates here from the South and West and carries thence across New Jersey to the Hudson. The president of this new company is Mr. E. T. Green, a prominent lawyer of Trenton. The route here chosen for additional facilities for transportation is said to be in lieu of additional tracks for some time in contemplation by the old company on the line of their present roads, but which, upon inquiry, it found would cost more to purchase the additional right of way in the cities through which their present line passes than to build a new road on a route as yet unoccupied by large towns or cities, and hence, as a matter of economy, had resolved to build the road upon the survey designated in the papers just filed in the Secretary of State's office. Several other roads under the general law are in progress or in contemplation, mostly in East Jersey. One exception is that of the Absecom and Great Bay Company, which intends to build a branch from the Camden and Atlantic Road at Absecom northwest to Leeds' Point, about seven miles. From Leeds' Point a ferry is proposed to Tucker's Beach and Tuckerton. Stock to the amount of $300,000 has been subscribed and work is to be commenced at once. The best of the New Jersey papers favor the new law, and predict from it the most salutary results in the way of railway enterprises, which, it is claimed, will greatly increase the value of lands and quicken all sorts of manufacturing, thus bringing to the State Treasury a large revenue in the way of taxes, sufficient in a few years, it is thought, to pay the war debt, the expenses of the public schools and the State Government, thus relieving the people from all taxation for those purposes. As the General Railway bill passed the Legislature with nearly the united strength of the Pennsylvania Railroad Company in that body in its favor, it is fair to presume that the great company accepts it in the belief that its advantage is largely in its favor.—*Phila. Ledger.*

☞ The Glens Falls Railroad Company is authorized and empowered to extend its railroad from the village of Glen Falls to the village of Caldwell, at the head of Lake George. All the laws applicable to the said Glens Falls Railroad Company are made applicable to said extension.

Illinois Central Railroad.

The statement of this Company for the month of March, 1873, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,012.14 for	$16,240 88
Acres Free Lands Sold	160.00 for	1,760 00
Total sales during the m'th of March, 1873	2 172.14 for	$18,000 88
To which add Town Lot Sales	for	
Total of all	2,172.14 for	$18,000 88
Cash collected in March, 1873		$63,241 86

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$358,856 00	$67,210 00	$426 066 00
Passengers	107,087 45	41.738 75	148 826 20
Mails	6,375 00	3,059 83	9,434 83
Other sources	65,625 00	2,010 67	67,635 67
Tot'l Mar.'73	$537,943 45	$114,018 75	$651,962 20
Total actual earn'gs, Mar., 1872	$476,688 79	$98,704 49	$575,898 28

☞ From the Report of the Treasurer of the Boston Water Power Company it appears that the amount of cash on hand April 30, 1872, was $5,212 07; loans on interest, $314,574 20; balance of receivables, $172,001 90; received from sewer assessments during the year, $805 53; mortgage notes receivable, $715,205 56; bills payable for money borrowed and notes given for filling, $929,033 33. Disbursements for the year: For filling, $1.456,909 24; salaries, $9000; legal expenses, $4,262 90; taxes to State, $14,118 80; interest and dividends, $94,064 11; constructing sewer, $12,549 99. The bills payable amount to $700,000. The liabilities of the company amount to $2,043,703 21; assets receivable, $1,506,828 13; unfilled land, 9,456,172 square feet; filled land, 782 000 feet. Scrip of November 15, 1872, to the amount of $515,000, is outstanding.

☞ The Cincinnati *Gazette* says that work on the Chicago extension of the Baltimore and Ohio Railroad is to be commenced at once, and will be pushed through rapidly. Contracts for grading have been let for the sections commencing at Defiance, O., and extending to Syracuse, Kosciusko county, Ind. This division comprises sections commencing at No. 87 and ending at No. 160, being a distance of 75 miles. Contracts for ties, etc., have been awarded. The contractors will in a few days put on a large force of men, and hurry the work through.

☞ The total export of iron rails from Great Britain in March was 42,964 tons, against 70,112 tons in March last year, and 81,754 tons the year previous. For the three months ending with March the exports were 134,515 tons, against 201,821 tons last year and 174,479 tons the year before. The amount sent to the United States in each of the last three months has been—69 458 tons in March, 129,605 in February, and 102,965 in January. The pig iron sent to this country has been—28,808 in March, 82,337 in February, and 85,869 in January.

☞ Mr. Wilson Shaw has been elected Secretary and Treasurer of the Portland (Me.) Railroad Company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, May 3, 1873.

Stock Exchange and Money Market.

Money has been in more liberal supply during the week, but the demand for accommodation has been quite active, especially from speculative sources, and call loans have been generally quoted up to from 7 per cent in currency and gold, to $\frac{1}{16}$th of one per cent commission, added to the legal rate, for the use of funds from day to day, though toward the close the symptoms were favorable to an easier movement for the borrowing interests. The total failure of the Atlantic National Bank, through the defalcation of its cashier, tended to disturb confidence, and was made the utmost of by the operators for lower values at the Stock Exchange. In the discount line, there was rather more animation within the range of from 8@12 per cent per annum, for the best grades of business paper. The May gold interest on the public debt, prepayment of which began on Monday without rebate, amounted to $17,174,882, of which about $15,000,000 is yet to come out. On Wednesday the Treasury redeemed in legal tender notes $390,000 three per cent certificates, and on May 31st will redeem $325,000 more. On June 1st the redemption of $50,000,000 of called 5 20 bonds begins. On July 1st the Treasury will disburse about $25,000,000 gold and $1,938,705 currency, interest on public debt. These, with other free disbursements of interest and dividend Monies, in May and July, promise much relief to the general market. The city banks made an addition of $1,070,800 to their legal tender reserve, and of $1,053,300 to their deposit account, while reducing their loan and discount averages $888,700. A further slight loss of specie, and a trifling addition to the item of circulation were reported. The daily exchanges of the banks, through the week, were on a reduced scale. The U. S. Sub Treasury augmented both its coin and currency reserves handsomely. The banks are still deficient in their obligatory reserve, the last statement showing that they had $309,275 less than the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of over $\frac{5}{8}$ths of a million to its coin balance, and $\frac{3}{4}$ths of a million to its currency reserve. Its currency reserves at the close of the week were $18,444,418; and its coin hoard, $43,288,563.

The clearances of the banks averaged through the week 115⅝ millions a day, and amounted in the aggregate, for the whole week, to $693 515,940 as against $862,472,883 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance $729,968 and its coin reserve $656,967 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $15,989.700, against $18, 112,500 same time last year. The city bank deposits are now $188,220,600 against $203,139,100, week ending April 27, 1872. The legal tender reserve amounts to $37,690,600, against $45 527,400 same time last year. The circulation now stands at $27,737,700 against $27,840 000 same time last year. The loans are now $269,301 900 against $274,926,500 at this date last year.

The receipts at the Sub-Treasury in April were $50,110,754, including $10,063,200 from Customs, payments, $44,620,091, including $4,272,796 of coin interest.

The coin reserve of the city banks is now about 15⅞ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 87⅝ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 188¼ millions, against 247½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3,095,579 of currency, and $4,981,141 of gold, the latter including $2,410,618 from customs; and disbursed $2,365,611 of currency and $4,324,164 of gold, the latter embracing $661,581 of coin interest.

Government revenues were on a moderate scale last week. The excises yielded within the week about 1½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $93,153,104. The customs at the port of New York, for the week, were $2,410,618, and at the outports, about $825,000 more, in coin or coin certificates.

The cash balances under the control of the Treasury Department on Tuesday were as follows: Currency, $3,046,844; special deposit of legal tenders for the redemption of certificates of deposit, $29,000,000; coin, $76,151,320. Coin certificates outstanding, $26,323,800. Legal tenders outstanding $357,835,982.

Gold has been less active and quoted cheaper, the later dealings indicated a more confident speculative inquiry. The customs and export drain were comparatively moderate. The range of the price during the week has been from 116⅞ @117⅞ and the closing quotation on Wednesday was 117¼ against 117½ on Wednesday of the preceding week. The specie outflow last week, was $773,018. The Gold Exchange Bank clearances have averaged about 59½ millions per day during the week.

The customs demand for Gold last week, averaged $401.700 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $38,130, and thus far in 1873, have been $1,097,018 against $622,639 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $113,052,850 against $133,594,403 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $63,055,376, against $65,087,254 during the same time in 1871-2.

The export drain of specie was $773,017 last week, against $1,715,619 same week preceding year. The shipments since July 1, 1872, have been $52,987,129 against $31,540,250 during the same portion of 1871.

Foreign Exchange has been moderately active and held with rather more confidence. Bankers' sixty day bills on London closed at 108⅛@108¾; sight bills on London, at 109⅜ @109⅝. The week's exports of Domestic Produce have been to the currency value of $5,855,290.

Under the Treasury programme for May, Government proposes to sell through the Sub-Treasury Gold to the amount at least of $6,000,000 as follows: Thursday, May 1, $1,000,000; Thursday, May 8, $1,500,000; Thursday, May 15, $1,000,000; Thursday May 22, $1,500,000; Thursday May 29; $1,000,000. And to buy in a million of Five-Twenties as follows; Wednesday, May 7, $500,000; Wednesday, May 21, $500,000.

Government securities have met with a ready sale at generally strong and buoyant prices.

U. S. sixes of 1881 closed on Wednesday of this week at 120⅞@121; U. S. Five-Twenties of 1862, 118¼@118¾; U. S. Five-Twenties of 1864 at 118½@118¾; U. S. Five-Twenties of 1865, 120½ @120¾; U. S. Five-Twenties of 1865 consolidated 117¾@117⅞; U. S. Five Twenties of 1867, 119⅝ @119⅞; U. S. Five-Twenties of 1868, 118@ 118¼; U. S. Ten-forties at 113¾@114; U. S. Fives of 1881 (Funding Loan) 116@116¼; Six per cent. currency Sixes from 114⅞@115¼.

State bonds have been more sought after and held with more confidence.

The Railway and Miscellaneous share speculation has been fairly active, but at an irregular range of prices, the fluctuations having been frequent, and rather violent. The later dealings indicated more steadiness.

Railway Mortgages have been in fairly active demand on investment account, and the more substantial issues have been held more firmly.

Central Pacific Sixes have been in good request closing at from 103½@104. Chesapeake and Ohio Sixes have been in good demand and quoted up to 88 and interest. Western Pacific Sixes have been more sought after at 95. The Northern Pacific 7-30 Loan has been selling quite readily at par and interest.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	April 16.	April 23.	April 30.
Consols	93½	93½	93⅝
U. S. 5-20s, 1865	94¼	*91⅝	92
" 1867	93⅝	93¾	93¾
" 10-40s	89¼	89¼	89¼
New Fives of 1881	90⅞	90	90
Erie	51¼	51⅛	50½

* Ex-May coupon.

The May coupons of the first mortgage six per cent bonds of the Chesapeake and Ohio Railroad Company are now being paid at the banking office of Messrs. Fisk & Hatch.

The Metal trade is reviving very slowly. Copper has been quoted about steady, with a limited inquiry almost wholly for job lots. Sales, 50,000 lbs. Lake at 83c., and 59 tons English best selected, at 30½c. Scotch Pig-iron has been further depressed on a restricted trade; sales, 150 tons Glengarnock at $50@$51, and 250 tons Eglinton and Glengarnock at $49@$51. Other kinds quiet; 200 tons No. 2 American Pig sold within our range. We quote: Glengarnock Pig at $50@$51; Eglinton do. at $49@$50; No. 1 American Pig at $50; No. 2 do. at $46@$48; Wrought Scrap at $52@$55; English rails at $70@$71, gold; American Rails at Works, $80@$85; Pig lead quiet at 6⅝c. gold, for ordinary foreign; sales, 50 tons. Spelter dull but steady at 7⅞c.,@8c., gold. Pig-tin inactive; 75 slabs Straits sold at 32. Tin Plates in light demand, with sales reported of 500 boxes Charcoal on private terms; 250 boxes Charcoal Terne, at $10 75, and 500 boxes Coke on private terms. Charcoal Plates quoted here at $11 75@$12 25; Charcoal Terne, $10@$10 75; Coke, $9 75@$10 50; Coke Terne, $8 50@9 75, gold, per box. Zinc unchanged, dull.

General business has been somewhat brisker especially in the leading kinds of domestic produce, in good part for export, but prices have been irregular. Breadstuffs closed weak. Provisions firm. Cotton easier. The receipts at all the ports, since Sept. 1, have been 3,226,180 bales, against 2,557,622 bales same time in the preceding year; exports 2,118,477 bales against 1,740,498 bales in the previous year; stock at the ports at latest dates, 448,400 bales against 295,950 bales same date 1871.

Foreign goods have been moderately sought after at about previous figures. The week's imports amounted to $10,340,763, including $2,088,748 of dry goods.

Ocean freights have been moderately active, but quoted lower, closing rather more steadily.

At the Live Stock Markets, Beeves have been in fair request at from 9¼@14 cts. Veals at 5@12 cts.; Sheep at from 5@8 cts.; Swine at 6¼@6½ cts. per lb., all live weight. The week's receipts were 9,471 Beeves, 3,170 Veal Calves, 16,663 Sheep and Lambs, and 44,795 Swine.

At the auction sale of Scranton Coal on Wednesday, 80,000 tons were disposed of at from $4 22½@$5 12½, as against $4 15@$5 04 in March.

Illinois Central Railroad.

At a recent meeting of the Directors of the Illinois Central Railroad Company, held at the company's office in this city, the following preamble and resolutions were adopted:

The directors of this company having made arrangements for through communication from Chicago and St. Louis to New Orleans, which they believe will largely increase its business and revenue, desire to provide for outlays required to perfect this connection; also for the extensive and important works in progress upon the Lake Shore at Chicago and to make further provision of steel rails; and therefore determine that the requirements for these purposes may best be provided for by an issue of shares. It is therefore resolved as follows:

First—To increase the capital stock of the company from $25,500,000 by a further issue of shares to the extent of twenty (20) per cent thereupon.

Second—That subscriptions from shareholders to the new stock, in even shares, in the proportion of one to every five shares registered in their names upon the 15th day of June next, shall be accepted at par.

Third—That the payment of fifty per cent of these subscriptions shall be made upon the 1st day of July next, at which date the company will issue receipts certifying said payment; and the remaining fifty per cent shall be payable on the 1st day of August, 1874.

Fourth—These certificates shall bear interest at the legal rate of seven per cent per annum, until the 1st day of August, 1874, payable on the 1st days of January and August, 1874, at the office of the company in New York, at which last day, on the completion of the payment, the certificates shall be exchanged for the share certificates of the company, to be entitled to dividends declared thereafter.

Fifth—The certificates shall be transferable in sums of $50, or the multiples of 50, so that, when the second payment to the company is made, the total amount will correspond to the shares to be issued.

☞ The next dividend of the Pennsylvania Railroad declared, after the full payment of allotments on the 24th of May next, will be in November, when the allotments so paid up by May 24 will be entitled to full dividend. The coming May dividend will be declared before the time limited for the May allotments comes round, consequently the latter cannot be included.

☞ Commissioner Douglas has daily visits from agents or attorneys of railroads asking that their corporations be relieved from the 5 per cent penalty and 1 per cent a month interest on the tax which the Supreme Court has decided is due on dividends declared during the first seven months of 1870. The commissioner has decided that he has no authority to remit these penalties.

☞ The survey of the Chesapeake and Ohio Railroad has been completed to Yorktown, on the Virginia Peninsula. No survey on the Peninsula lower than Yorktown will be made at present.

Chesapeake & Ohio Railroad—Low Grades.

Next in importance to a short line rail and water-transport connections, are its advantages in grades. These are so decided as to be equivalent, in effect, to a shortening of its line from 20 to 50 miles over other parallel routes. The profile of the Chesapeake and Ohio elevations represents a nearly uniform assent, of the easiest grades, from the Ohio river to the summit of the Allegheny chain—208 miles. From Huntington to Clifton Forge, a distance of 231 miles, trains running eastward encounter no grade exceeding 30 feet per mile; and going westward, the direction of lightest trains, no grade east of the summit exceeding 60 feet per mile, and on the west slope of the mountains a light descending grade uniform, or very nearly so, all the way to the Ohio. When the Cincinnati and Chesapeake Railroad is completed, this stretch of easy grades will be prolonged still further, there being no grade between Huntington and Cincinnati, 150 miles, exceeding 15 feet per mile. Together, these will furnish a line of unparalleled gradients, especially as it includes the crossing of the main chain of the mountains, which is only to be overcome on other lines by long detours to the northward; or by continuous heavy grades.

On the remainder of the line, east of Clifton Forge, 192 miles, the grades are generally light, there being less than 10 miles in all exceeding 60 feet; the highest being less than those in common use on east and west lines, and equal to such as are found between New York and Philadelphia.

In the hauling of heavy freights, and also in the economical carriage of passengers, light grades are entitled to great consideration. The Baltimore and Ohio Railroad has at one portion of its line 17 miles of continuous heavy grades, fully 116 feet per mile, on which supplementary power and specially constructed engines are required. The Pennsylvania Railroad also employs grades of 95 feet per mile for several miles in crossing the Allegheny range. The grades of the Erie Railway are heavy at several portions of its line, involving grades of 80 feet to the mile, and must always present a serious obstacle to economy of transportation. Though the average grade of the New York Central line is light it reaches at one point 80 feet per mile. The lengthening of the line to avoid heavy grades, calls for corresponding expenditure in the longer haul between common points.

The following table, compiled from the published data of a large Locomotive manufacturing establishment, will show the relative loss of hauling power by the heavy grades:

	Freight Engine.			
	on Level.	20 ft.	60 ft.	100 ft.
Maximum load for locomotive.....	2,000 tons.	990	460	285

The Chesapeake and Ohio Railroad is remarkably free from short curves, which are incident to many new lines. The lowest radius of curvature between Richmond and White Sulphur Springs is 1,442 feet; and between the latter point and the Ohio River terminus the minimum curvature is the same, with a single exception on the New River Division.

☞ The Long Island Railroad Company has declared a dividend of 10 per cent, payable in stock, on the 28th of May.

Banking-House of Fisk & Hatch,
No. 5 Nassau-st., New York, May 2, 1873.

The present high price of Government Securities is increasing the demand for first-class Railroad Bonds; and as the amounts now offering are comparatively small, is is reasonable to suppose the present difference of from twenty to thirty per cent. cannot be obtained for any great length of time. Government Bonds are higher now than for several years past. A "Five-twenty" Bond at 120, paying six per cent. on the par value, yields but a small income on its market price, and if an entirely safe investment can be obtained with a difference of 200 to 300 dollars on each 1,000, it is largely to the interest of the holders to make the exchange.

We are recommending the following for such Exchanges or for new investments—all of them payable in gold, principal and interest.

The CHESAPEAKE AND OHIO SIX PER CENTS at **88** and accrued interest, interest payable May and November; these bonds are issued in denominations of $100, $500, and $1,000. The road, 420 miles in length, is now completed, and the business offering is very large, and increasing daily.

The WESTERN PACIFIC SIX PER CENTS at the market price, which is to-day **95**, flat. These bonds are $1,000 each; interest payable January and July. This road having been consolidated with the great Central Pacific, and payment of its bonds, principal and interest, assumed by them, we see no good reason why they should not soon approximate in price to Central Pacifics—now 103, and becoming very scarce in the market.

Also, the CHESAPEAKE AND OHIO SEVEN PER CENTS, interest payable January and July, secured by a First Mortgage on the Extension to deep water on Chesapeake Bay, on the proposed Kanawha River Branch, and on the Great Bridge to be built over the Ohio River at Huntington, and a Second Mortgage on the Main Line, with all its equipments, depots, &c.

Only **$3,000,000** of these Bonds will be offered for sale at present. Price **90** and accrued interest.

We consider them amply secured, and a very desirable investment. The proceeds will be used in adding largely to the present equipment, and in extending to deep water on the Chesapeake Bay, where the largest steamers in the world can load and unload alongside the cars.

The amount of money to be invested within the next few months will be very large; the Government disbursement alone for the next three months will reach $100,000,000, and the May and July dividends of the banks, railroads, and other corporations as much more.

We continue to deal in Government and Central Pacific Bonds, receive deposits, on which we allow interest, make collections, execute orders at the Stock Exchange per cash, and conduct a general banking business.

FISK & HATCH.

☞ The coupons due the first day of May on the Port Huron and Lake Michigan Railroad First Mortgage Bonds, will be paid in gold coin on and after that date at the banking office of Kemye & Cox, No. 51 Exchange Place, New York.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR ESCAPE OF FIRE FROM THEIR LOCOMOTIVES—LIABILITY OF PROPERTY OWNERS—WHEN INJURY IS TOO REMOTE.

The facts in the recent case of The Toledo, Peoria and Warsaw Railway Company *vs.* Pindar *et al.*, (53 Ill., 447), are fully and clearly stated in the following opinion by—

WALKER, J.—It appears from the record in the case, that about the first day of October, 1867, a train on appellants' road, in charge of the employees of the company, passed through the town of Fairbury. It appears that fire was communicated in several places in the village, which was extinguished without producing any serious injury. But the "Dresser Warehouse," a building erected by the company, also took fire and was consumed. There being a high wind at the time, fire was blown across the street and communicated to the store of appellees, consuming the same, together with some $3,600 or $3,700 in treasury and Bank notes, and a large amount of goods, as appellees contend. This suit was brought to recover for the loss, and on the trial below the jury found a verdict in favor of the appellees for the sum of $14,000, upon which, after overruling a motion for a new trial, the court rendered a judgment, to reverse which this appeal is prosecuted.

It is insisted that there was carelessness on the part of the employees of the road, from which the injury resulted; that had due care been observed the accident would not have occurred, and the injury would have been avoided. It is also claimed that the engine threw an unusual quantity of sparks and fire, and owing to the dry weather and the highly combustible condition of the buildings near the road, the company are chargeable with gross negligence in failing to provide against the danger of communicating fire along the line of their road.

These bodies should be held to the exercise of due diligence in operating their machinery. They should be required to provide and keep constantly in use, and in proper repair, the most approved machinery to prevent fire from spreading from their engines to the farms and buildings along the line of their roads, and if an overload of their engines would, with the best appliances in use, in generating steam, produce the escape of sparks and fire to a dangerous extent, then such conduct would be gross negligence. But if the company have provided, and have attached and in proper condition the best appliances, and have only the proper amount of weight of train attached, then the company have not, in making up their train or in attaching the engine thus equipped, been guilty of negligence; and unless wanting in some other requirement, they should not be held guilty of such negligence as requires them to respond in damages. Whether in this case there was such negligence was a question for the determination of the jury from all of the evidence on the trial. It was for them to say whether the fire was communicated from the engine, and if so, whether the company had observed the proper precautions for its prevention, or were guilty of negligence; and whether they have found correctly we do not propose to inquire, as the judgment of the court below must be reversed on another ground, leaving the question of negligence and responsibility of the company under the evidence to another jury, unbiased by any views we may entertain on that question.

It appears from the testimony of one of the appellees and their witnesses, that the money was in the till of the store, and in a bureau drawer in the upper story of the house, and it appears there was nothing to prevent Henry Pindar, or his sister, Miss Pindar, from saving it. There were two pair of stairs leading from the store to the room in which the bureau containing the money was situated, and there was no obstruction preventing access to it. Appellee, Henry Pindar, testifies that there was nothing to prevent his saving the money had he thought of it; that failing to do so, was all that prevented his saving it. Miss Pindar testifies that she thought of it, but in the confusion forgot it, and that she could have saved it had she not forgotten it.

Even if appellants were guilty of negligence, appellees were bound to use reasonable efforts to preserve their property. When the fire escaped they had no right to fold their hands and permit their property to be consumed without effort for its preservation, and then claim the right to recover the loss from the company. It is incomprehensible to us, that where it was so accessible and easily secured, no effort was made to remove the money. Unless he was careless or even reckless, we suppose his first thought would have been of the money. Unless indifferent of his loss, we do not comprehend why appellee should have thought of the horses, of comparatively small value, and not of so large a sum of money. Such a course of action would seem to imply a high degree of indifference to his interest, or strong feelings of humanity; but if the latter, we are not prepared to say that appellants should be prejudiced thereby.

There was nothing to prevent the preservation of the money, and failing to do so, appellees must sustain the loss. Had it required effort of an unusual or dangerous character, the case would have been different. But we fail to see that there was danger, and but slight effort was required to obtain it, and thus prevent its destruction. In this respect the evidence fails to sustain the verdict, and the judgment must be reversed.

After the case was submitted on briefs and arguments, appellants have filed a further brief, in which they raise the question whether the facts do not show that the injury was too remote to authorize a recovery. This question seems now to be raised for the first time in the case. It is a question of fact for the jury, to be found under the instruction of the court, and as they have not passed upon it, and as the case will be submitted to another jury when the facts proven, for aught we know, may be different, we deem it improper to discuss the evidence on the question, but leave the parties to contest it before another jury, who have the right to pass upon it unprejudiced by any view we may entertain of the evidence.

The judgment of the court below is reversed and the cause remanded.

Judgment reversed.

☞ The Baldwin Locomotive Works, of Philadelphia, Pa., are just finishing a number of engines for Russian railroads. They are of the usual American style of wood-burning locomotives.

Steel Rails in Canada.

Evidence of the value of steel rails in the severe climate of Canada is afforded in the present Great Western of Canada report. That company has already 154 miles of steel rails down, leaving 75 miles more to be laid with steel in place of iron. The Directors observe—"It will be seen that the effect of the use of steel rails is beginning to have a sensible influence upon the expenditure of this department." The cost of maintenance of way in the past half-year is only £93,180 against £105,-691 in the corresponding period of the previous year, although the traffic was larger and the trains more numerous. The percentage of the maintenance has fallen to 15.64 per cent. of the receipts, against 20.04 per cent.

☞ The tax of five per cent heretofore deducted from each interest and coupon payment of bonds issued by corporations of Pennsylvania is repealed, and the same put upon the companies and made payable 1st of January and July to the State Treasurer. Those companies that have interest and coupons maturing on the 1st of July next claim that the payment of the 5 per cent to holders does not then begin, for the reason that the interest heretofore withheld had accrued up to that under the old law.

☞ At a recent meeting of the directors of the Southwest Pennsylvania Railroad Company, J. K. Ewing, A. E. Wilson, and Thomas A. Scott, were appointed a committee, with power to revise the present line as run from Connellsville to Uniontown, to locate the road, and to let the same. It is the intention of these gentlemen to enter upon their duties at once, and the probabilities are that the road will be let in a very short time, and that the work of constructing it between the points named will be prosecuted to completion without delay.

☞ The Directors of the New York and New England Railroad Company, elected by the Berdell bondholders on the 17th ult., met at the office of the trustees of the Boston, Hartford and Erie Railroad on the 29th, and organized by electing Wm. T. Hart president, and H. C. Luce treasurer. The executive committee consists of Messrs. Watson, Foster and Lathrop, and the finance committee of Messrs. Jewell, Barlow and Dare. Charles P. Clark, of Boston, was elected general manager.

☞ The Secretary of the Interior has decided that the Winona and St. Peter's Railroad Company is entitled to the lands in controversy between that company and the St. Paul and Sioux City Railroad Company. This controversy involved about 50,000 acres, and grew out of overlaping land grants. The decision of Secretary Delano in favor of the Winona and St. Peter's Company sustains the action of the commissioner of the general land office.

☞ At the recent annual meeting of the Copper Falls Mining Company, James A. Coe was elected President, and Oliver B. Crook Secretary and Treasurer. From a report of the treasurer it appeared that the company had on hand a balance of assets over all liabilities, Feb. 1, 1873, of $36,792 53. Besides this, there was a balance of about $13,000 due the company for copper sold in New York.

☞ The New Haven, Middletown and Willimantic Railroad was opened from Middletown to Willimantic on the 26th ult. The whole length of the road from New Haven to Willimantic is about 52 miles.

Notice to Contractors.

SEALED PROPOSALS WILL BE RECEIVED until noon of THURSDAY, May 15th, 1873, for the GRADING AND MASONRY of the Second Track on the main line of the Pittsburgh, Fort Wayne and Chicago Railway.

Between Highland and Enon, Pa., about 8 miles in length.

Between Beloit and Alliance, Ohio, about 5 miles in length.

Between Alliance and Louisville, Ohio, about 11½ miles in length.

Between Orville and Wooster, Ohio, about 13 miles in length.

Between Mansfield and Cresline, Ohio, about 11 miles in length.

Between Crestline and Bucyrus, Ohio, about 12 miles in length.

Between Lafayette and Delphos, Ohio, about 19 miles in length.

Between Fort Wayne and Hadley, Indiana, about 4 miles in length.

Between Columbia and Pierceton, Indiana, about 11 miles in length.

The work will be divided into sections, and proposals may be submitted for the grading or masonry separately.

The company reserve the right to reject any or all proposals. Good and sufficient security for fulfillment of contracts (by bond or bonds) will be demanded. Profiles can be seen and all information obtained on and after May 1st, 1873, for that portion of the proposed work situated between Highland and Cresline, at the Chief Engineer's Office, Pittsburgh, Pa., and for the portion west of Cresline at the Engineer's Office, Fort Wayne, Ind.

Proposals must be enclosed in sealed envelopes endorsed "Proposals for Second Track," and addressed to the undersigned at his office in Pittsburgh, Pa.

FELICIAN SLATAPER.
Chief Engineer.

Pittsburgh, April 22, 1873.

59 Liberty St., New York.

LANSDELL'S

Patent Portable Railway Syphon.

The Portable is invaluable on a freight or construction train, being used to take water at points where there are no water stations. With it water can be taken from any point within one hundred feet of the track where there is water six inches or more in depth. The valve C is tapped into the locomotive boiler: steam is let on through the hose B, water is drawn through the orifices D D, and forced through the hose E into the tender, filling any tender with warm water in from six to twelve minutes.

Lansdell's Patent Steam Syphons, Double Suction, adopted by the United States Board of Supervisors, and approved by the Secretary of the Treasury for use on Steamboats.

For Price and particulars, apply to the General Agents of the **Steam Water Station Company,**

LENG & OGDEN,

IRON AND STEEL DEALERS & IMPORTERS,

No. 4 FLETCHER STREET, NEW YORK.

Sole Agents for Crodende Steel Gun Barrels and Moulds, and the Cold Drawn Patent Weldless Steel Tubes.
